Vol. 82*

BIBLIOTHECA THERAPEUTICA,

OR

BIBLIOGRAPHY OF THERAPEUTICS,

CHIEFLY IN REFERENCE TO

ARTICLES OF THE MATERIA MEDICA,

WITH

NUMEROUS CRITICAL, HISTORICAL, AND THERAPEUTICAL ANNOTATIONS,
AND AN APPENDIX CONTAINING THE BIBLIOGRAPHY OF
BRITISH MINERAL WATERS.

BY

EDWARD JOHN WARING, M.D.,

FELLOW OF THE ROYAL COLLEGE OF PHYSICIANS OF LONDON, FELLOW OF THE
ROYAL COLLEGE OF SURGEONS OF ENGLAND, LATE SURGEON IN
HER MAJESTY'S INDIAN ARMY.

TO

S E C O N D V O L U M E .

IN issuing the second and concluding volume of the 'Bibliotheca Therapeutica,' I feel it due to myself to offer a few remarks in explanation of the delay which has occurred in its completion. This has been mainly due to a mistaken calculation on my part as to the time requisite for preparing the three copious indexes, (extending over 120 pages) with which this volume concludes, and which have entailed a far greater amount of labour than was originally anticipated. The labour and consequent delay will, however, it is confidently believed, be fully counterbalanced by the additional value these indexes impart to the book as a work of reference. Thus, with the Index of Diseases before him, the student has a bird's-eye view of the principal remedies recommended from time to time in the treatment of individual diseases, and the dates of their respective employment; whilst further reference to the body of the work, in the manner pointed out in the index, will disclose the name of the authority, and other particulars of special interest to the pathologist and therapist.

With every endeavour to preserve throughout the work, uniformity in the orthography of foreign surnames, it has been found almost impossible to accomplish this with satisfaction in several instances. Many of the names have, as a matter of necessity, been taken from catalogues of current literature, and those acquainted with this class of works well know how frequently inaccuracies and

discrepancies in the orthography of surnames occur. The French rendering of German and the German rendering of French names are equally confusing. This point came prominently to the front in preparing the Index of Authors, and much delay, as well as anxiety, has it cost me. As a general rule, it may be taken for granted that, where minor differences (beyond those noticed in the list of corrigenda) are found to exist between the names in the body of the work, and those in the index, the latter, having been subjected to stricter scrutiny, may be regarded as the more correct.

Another point in connection with the Index of Authors requires a word of explanation, viz. the omission of capitals to German nouns. It having been decided, in this index, to exclude all capitals excepting to proper names, this rule has been applied to German substantives, contrary to the generally received custom; and I may add that this innovation (for such it is) has not been adopted without consultation with those well versed in German literature.

In conclusion, I desire to record my grateful acknowledgments to those friends who have rendered me essential service in seeing the sheets of this volume through the press; they are specially due to Mr. J. A. Broun, F.R.S., and his family, to Mr. B. R. Wheatley, the Resident Librarian of the Royal Medical and Chirurgical Society; and to my nephew, Mr. Edward E. Nicholson, of Worcester College, Oxford. I would also tender my best thanks to Dr. John Macpherson for numerous valuable notes relating to works on the various Mineral Waters of Great Britain.

E. J. WARING.

LONDON,

June 14th, 1879.

CONTENTS OF VOL. II.

BIBLIOTHECA THERAPEUTICA.

PART SECOND.

(Continued.)

ARTICLES OF MATERIA MEDICA ARRANGED ALPHABETICALLY—(Continued).

FAGUS SYLVATICA, Linn.

The Beech.

1700. EYSSON, R. Diss. de Fago. Groningæ, 12mo.
1826. CASPARI, K. Untersuchungen über die spezifischen Heilkräfte der Buchenkohle (Beech charcoal) und deren Anwendung gegen Krankheiten. Leipzig, 8vo.
Most of Caspari's works are homœopathic; whether this one partakes of the same character I have no means of ascertaining.
1852. KRUMM, M. Diss. chemica de partibus anorganicis Fagi sylvaticæ et Carpini betuli. Bonn, 8vo, pp. 35.

FEL. BILE.

As a Therapeutic Agent.

1704. HOFFMANN, F. De Bile medicina et veneno corporis. Hallæ, 4to.
1741. ZELLER, J. G. De Bile et ejus usu medicamentoso. Pragæ, 4to.
1752. KALTSCHMIDT, —. Diss. de Bilis interno et externo usu medico. Jenæ, 4to.
1794. REICHE, C. *Fel Taurinum inspissatum e numero præstantium anthelminticorum expungendum esse. Francof. ad Viad. 4to, pp. 20.
1846. CLAY, C. Observations on the use of Inspissated Ox-gall in the treatment of various diseases, particularly those in connection with derangement of the digestive function, deficiency or vitiated secretion of bile, habitual constipation, habitual diarrhœa, indigestion, and other results of sedentary employment. London, 8vo, pp. 16. *Bibl. Med.-Chir. Soc.*
The title speaks for itself; it is described as a very interesting pamphlet in *London Med. Gazette*, August 21st, 1846, p. 337, where a summary of its contents is given.

FERRUM.

Iron and its preparations generally.

1580. FRAMPTON, J. Joyfull Newes out of the New-found World, &c., being a translation from the Spanish of Dr. Monardes; where-unto are added three other bookes treating of.....3 the properties of Yron and Steele in Medicine. London, 4to.
Bibl. Coll. Surg. Lond.
1649. BOURGES, J. DE. *Ergo obstructo lieni Chalybs. Paris, 4to.
1654. DRELINCURTIUS, C. An affectioni Hypochondriacæ Chalybis usus? Monspel. 12mo.
Bibl. Coll. Phys. Edin.
1658. MICHAELIS, J. *Anatomia Martis seu Dissertatio medico-chymica de Ferro. Resp. E. Schmidt. Lipsiæ, 4to, pp. 60.
Bibl. Banks.
1665. BAUSCH, J. L. Schediasmata bina curiosa de lapide Hæmatite et Ætite. Lipsiæ, 8vo.
Bibl. Linn. Soc.
1672. KRAUSSEN, R. W. *Mars salutifer omnigenorum morborum debellator. Præs. A. S. Scholzen. Jenæ, 4to.
1675. PELLETIER, N., et GIRARD, J. R. *Ergo magnis lienibus Ferrum. Paris, 4to.
1682. JANI, J. F. *De Martialium operandi modo. Ultraject. 4to.
1683. VATER, C. *De virtute Martis adstrictoria et aperitiva. Wittembergæ, 4to.
1685. BEUTTEL, J. G. *De medicamentis Martialibus. Præs. J. M. Hoffmann. Altdorfii, 4to.
1686. PRICE, J. *De Marte. Hardervici, 4to.
Bibl. Med. Chir.-Soc.
1688. JÜRGENS, J. Autoschediasma de Vitriolo. Copenhagen, 12mo, pp. 130.
Bibl. Banks.
1692. CHIRAC, P. An Incubo Ferrum rubiginosum? Monspelii, 12mo.
1701. HOMBERGK, J. P. *De Marte et remediis Martialibus. Marburgi, 4to.
1703. ROBERG, L. De Vitriolo. Resp. J. Moræus. Upsaliæ, 4to, pp. 22.
Bibl. Banks.
1711. WEPFER, B. *De medicamentis Chalybeatis, eorumque virtute contraria aperiendi scilicet obstruendi, &c. Præs. D. Nebel. Heidelbergæ, 4to (in *Haller, Disp. Med. Pract.*, vii, p. 165.)
Bibl. Med.-Chir. Soc. (Haller).
1713. VESTI, J. *De Martialium natura, usu et abusu ad neotericorum mentem. Præs. J. S. Vogel. Erfordii, 4to.
1713. ZANNICHELLI, J. J. De Ferro ejusque nivis præparatione, &c. Venetiis, 4to. Alt. ed. 1719.
Bibl. Coll. Phys. Edin. (ed. 1719); *Manchester Med. Soc.* (1713).
1715. EISENMANN, G. H. *De medicamentis Martialibus. Præs. J. S. Henninger. Argentorati, 4to.

1718. SEYFFERD, H. C. Paradoxum medicum, quod sit in Marte quidquid quæerunt medentes. Erfordiæ, 4to.
1731. GERDING, J. U. *De Marte et remediis metallicis. Harderv. 4to. *Bibl. Roy.*
1734. BLECOURT, J. A. DE. *De Ferro. Duisburgi, 4to. *Bibl. Roy.*
1736. GOURRAIGNE, H. *De Ferri usu et abusu in medicina. Montpellier, 8vo.
1738. FINDEISEN, J. C. Diss. chimico-medica de Ferro. Præs. D. M. Alberti. Halæ, 4to, pp. 19. *Bibl. Banks. (sub nom. Alberti).*
1738. BOSE, G. M. *Diss. de Marte congelante. Lipsiæ, 4to.
1738. JUSSIEU, A. DE. *Herbis an Ferro promotior tutiorque abscessuum a congestione curatio. Resp. L. Ferret. Paris, 4to.
1739. LAVINGTON, A. *De Ferro. Lugd. Bat. 4to, pp. 30. *Bibl. Med.-Chir. Soc.*
1742. DEHN, J. Diss. medica de Ferro chymicè et medicè considerato. Erfordiæ, 4to, pp. 28. *Bibl. Banks.*
1748. WEBER, J. J. De remediorum Martialium interno usu. Halæ, 4to.
1749. LEHMANN, J. D. De viribus et usu Ferri in medicina. Præs. A. E. Buechner. Halæ, 4to. *Bibl. Med. Soc. Lond.*
1751. LOEBER, F. E. *De præstantia Martis in morbis chronicis. Jenæ, 4to.
1753. WRIGHT, E. *De Ferri historia naturali, præparatis et usu medico. Edin. 8vo. *Bibl. Med.-Chir. Soc. ; Coll. Phys. Edin.*
1759. CARTHEUSER, J. F. *Diss. de crocis Martialibus. Francof. ad Viad. 4to.
1761. LABBE, H. *Specimen chemico-medicum de Marte. Lugd. Bat. 4to, pp. 36. Idem. in *Schlegel, Thes. Mat. Med.*, vol. iii, art. 39, p. 385. *Bibl. Banks ; Med.-Chir. Soc. (Schlegel).*
Treats chiefly on the physical characters and chemical history of iron. The medical portion, which is quite subsidiary, presents nothing original, and little that is noteworthy beyond some quotations from Van Swieten, Boerhaave, &c., on the use of iron in chlorosis, &c.
1768. KAËHLER, L. S. *De Ferro ejusque præcipuis præparatis. Lipsiæ, 4to, pp. 32. *Bibl. Med.-Chir. Soc. ; Banks.*
1771. RIESENBERGER, J. P. De Ferro et nonnullis inde originem petentibus medicamentis. Gottingæ, 4to. *Bibl. Med.-Chir. Soc. ; Acad. Edin.*
1773. GMELIN, J. F. *Diss. chemico-medica: an adstringentia et roborantia strictè sic dicta, Ferreo principio suam debent efficaciam? Resp. C. H. Hoelder. (In *Baldinger, Sylloge*, ii, p. 159). Tubingæ, 4to. *Bibl. Acad. Edin. ; Med. Soc. Lond. (sub nom. Hoelder).*

1861. FAUCONNEAU DUFRESNE, V. A. De l'utilité des Préparations Ferrugineuses en général et en particulier des pilules de Vallet. Paris, 8vo.
1863. RICHTER, C. A. W. Über die Art der Wirkung der Eisenmittel in Chlorotischen und Anämischen Krankheitsformen. Neuwied, 8vo, pp. 30.
1864. DRAPER, H. N. Manual of the medicinal preparations of Iron, including their preparation, chemistry, physiological action and therapeutical use. Dublin, 12mo, pp. 131.
Bibl. Med.-Chir. Soc.
An excellent little work in its way, evidently the composition of a chemist rather than a physician. It gives a description of between forty and fifty preparations in which iron is the principal or most important ingredient. The practitioner is thus enabled to vary his formula to suit any variety of stomach, fancy or taste.—*Medical Times and Gaz.*, Feb. 1, 1865, p. 183.
1865. DRUITT, R. The right use of Iron and other remedies in the Cattle Plague. London, 8vo. *Bibl. Med.-Chir. Soc.*
1866. MILLET, A. De l'emploi des Préparations Ferrugineuses dans le traitement de la Phthisie Pulmonaire. Paris, 8vo, pp. 98.
1867. DELIQUX DE SAVIGNAC. De l'emploi des sels de Fer comme contre-poisons des Cyanures et particulièrement du Cyanure de Potassium. (Ex. in *Bull. de Thérapeutique*, lxxii, p. 309.)
1868. MARTIN, G. P. *Préparations et usages thérapeutiques du Fer. Paris, 4to.
1874. LEBAIQUE, E. Note sur le mode d'action des Ferrugineux et sur le Fer Dialysé en particulier. Paris, 8vo, pp. 8.
1874. GIRARD, C. Étude sur les Ferrugineux, et en particulier sur le Protoxalate de Fer. Paris, 18mo, pp. 80. Spanish transl. Paris, 8vo, 1875.

FERRI ACETAS.

Acetate of Iron.

1866. LUSSANO, F. Saggio sugli usi medico-chirurgici dell' Aceto de Ferro. Milano, 16mo, pp. 94.
1866. SAVOYE, M. Médication ferrugineuse. Avantages du sirop anti-anémique à l'Acétate de Fer et à l'écorce d'orange. Lyon, 8vo, pp. 60.

FERRI BROMIDUM.

Bromide of Iron.

1875. GARNIER, F. Du Proto-bromure de Fer : ou révolution dans la thérapeutique de la Chlorose. Lyon, 8vo, pp. 14.

FERRI CARBONAS.

Carbonate of Iron.

1806. CARMICHAEL, R. An Essay on the effects of Carbonate of Iron upon Cancer, with an inquiry into the nature of that disease. Second ed. 1809. Dublin, 8vo, pp. 116. *Bibl. Med.-Chir. Soc.*

The nature of the cases reported in this essay are doubtfully cancerous. This view is strengthened by the rapidity with which the ulcerations healed under the use of the remedy, so unlike what we know of the history and progress of cancer in general, *e.g.* the case of a young lady cured in six days of a severe ulceration of the nose, presumed to be cancerous, which had resisted the most powerful remedies for years. All the cases related in the text are similar to this; they are all examples of phagedenic ulceration either in the face or legs. In the postscript indeed, there are some cases more like cancer in which the preparations of iron were employed with good effect.—*Edinburgh Med. Surg. Journ.*, ii, 1806, p. 373.

1820. HUTCHINSON, B. Cases of Tic Douloureux successfully treated. London, 8vo, pp. 71. Second ed. 1822, pp. 180. *Bibl. Med.-Chir. Soc.*

Mr. Hutchinson's remedy in these cases was carbonate of iron, prepared from the sulphate by precipitation by means of carbonate of soda in doses of grs. xxx to lxxx, twice or thrice daily. He records several cases successfully treated with it. See *Edinb. Med. Surg. Journ.*, April, 1822, p. 310.

1826. DREYFUS, P. B. *Sur les Névralgies en général et leur traitement par le Sous-carbonate de Fer. Strasbourg, 4to.

Two illustrative cases from this essay are cited by Bayle, *Bibl. Thérap.*, iv, p. 307.

1827. DUPARQUE, M. Mém. sur les propriétés anti-névralgiques du Sous-carbonate de Fer. (*Nouv. Bibl. Méd.*, i.) Paris, 8vo.

1828. REYMANN, J. N. *De Ferro carbonico.

Dorpati, 8vo, pp. 56.

1844. MEILLET, A. Note sur l'emploi des Ferrugineux et sur le Carbonate de Protoxyde de Fer comme préservatif des Coliques de Plomb dans les fabriques de céruse. Paris, 8vo

FERRI CITRAS et FERRI AMMONIO-CITRAS.

Citrate and Ammonio-citrate of Iron.

1860. JABLONOWSKI, J. De Santonini... Citratis Ferrici intra organismum humanum rationibus. Dorpati, 8vo, pp. 37.
1867. RIVA, S. Lusinghieri risultamenti ottenuti nella cura del Cholera mediante l'uso sia del Citrato Ammoniacco di Ferro, sia del solfato dello stesso metallo. Parma, 8vo, pp. 9.
1868. PAGANUZZI, L. Sull' azione del Citrato di Ferro Ammoniacale, studii sperimentali ematologici. Padova, 8vo, pp. 30.
1868. GUGLIELMI, D. Metodo per curare Cholera Asiatica col Citrato di Ferro solubile. Nuova ediz. Roma, 8vo, pp. 167.

FERRI FERRO-SESQUICYANIDUM.

Prussian Blue, Prussiate of Iron, etc.

1668. BAUSCH, J. L. De Cæruleo et Chrysocolla. Jenæ, 12mo.
Bibl. Med.-Chir. Soc.
1822. WETZLAR, G. De materiæ nonnullarum, imprimis Kali Borussici in organismum transitu. Marburgi, 8vo.
1822. ZOLLICKOFFER, W. Treatise on the use of Prussiate of Iron or Prussian Blue in Intermittent and Remittent Fevers. Frederick, Maryland, U.S., 12mo, pp. 32. *Bibl. Med.-Chir. Soc.*
- Dr. Zollickoffer, of Baltimore, was the first to bring to notice the anti-periodic powers of the ferro-cyanide, and in this essay he relates a number of cases of fever successfully treated with it, in doses of grs. iv—vij, every four hours.

FERRI IODIDUM.

Iodide of Iron.

1834. THOMSON, A. TODD. Observations on the preparation and medicinal employment of the Ioduret and Hydriodate of Iron. London, 8vo, pp. 64. *Bibl. Coll. Surg. Lond.*
- The author in this work first drew the attention of British practitioners to the employment of this valuable preparation. He mentions cases of atonic dyspepsia, scrofulous affections, chlorosis, amenorrhœa, bronchocele, tabes mesenterica, rachitis and incipient scirrhus, in which it was used with more or less benefit. The chief objection to the whole of these cases being received as evidence of the efficacy of the iodide of iron is that in not one of them was it given alone, and that its use was either preceded by, or conjoined with other medicines of acknowledged power in removing deranged health dependent on disorders of the digestive system.—*Edinburgh Med. Surg. Journ.*, xliii, 1835, p. 489-492.
1836. GROSOURDY, —. *Des Iodures de Fer, de Plomb, et de Mercure. Paris, 4to.
1857. GILLE, F. Monographie thérapeutique et pharmacologique de l'Iodure de Fer. Paris, 12mo, pp. 448.
1858. ——. L'Avenir Médical de l'Iodure de Fer. (*Journal Olinique des Hôpitaux de Paris*, 1858, No. i.)

FERRI LACTAS.

Lactate of Iron.

1840. GELIS, A., et CONTÉ, J. L. Mémoire sur l'emploi du Lactate de Fer. (Ex. in *Gaz. Médicale*, 1840.) Paris, 1840.

The authors adduce several cases of chlorosis and other states of the system (anæmic, &c.) usually relieved by steel medicines in which the lactate produced excellent effects; in some it succeeded after the usual ferruginous preparations had been fairly used without benefit.—*Med.-Chir. Rev.*, Oct., 1840, p. 511.

1860. (Anon.) De l'assimilation du Lactate de Fer et des avantages que présente ce sel sur les autres préparations ferrugineuses au point de vue de la digestion. Paris, 8vo.
1872. LELONG, E. M. *Essai thérapeutique du Chloro-lactate acide de Fer. Paris, 8vo.

FERRI OXALIS.

Oxalate of Iron.

Paris, 4to, pp. 91.
1858. GUERIN, B. M. *Essai sur les applications thérapeutiques du Perchlorure de Fer. Paris, 4to, pp. 58.
- The author treats of the use of the perchloride in aneurisms, varices, nævi, panniform keratitis, hæmorrhoids, hæmorrhages, erysipelas, purpura, dysentery, and other affections. He has evidently bestowed much attention on the subject, and has brought together many interesting facts.
1858. BOUROT, M. P. A. *Considérations sur la Pourriture d'Hôpital observée en Orient et sur son traitement par le Perchlorure de Fer. Strasbourg, 4to, pp. 41.
1859. JODIN, N. De la nature et du traitement du Croup et des Angines Couenneuses, &c. ... 2. Que la base du traitement repose sur l'application des topiques parasitiques, &c. Paris, 8vo, pp. 39.
- A suggestive brochure. Of all parasiticide agents M. Jodin prefers liquid perchloride of iron, because it completely penetrates the cryptogam which he regards as the essential origin of the disease; its action is limited to the surface, and it may be absorbed without danger. He declares that it has never failed in the numerous cases in which he has applied it. See analytical review in *Amer. Journ. Med. Sci.*, Jan., 1861, p. 200-210.

1862. JONES, J. *On the use of Perchloride of Iron and other Chalybeate Salts in the treatment of Consumption; being a critical inquiry into their physiological action and therapeutic properties.* London, 8vo, pp. 110.
It is by careful statistical inquiry, such as this, that the true value of a remedy is tested. Dr. Jones makes no pretensions to originality in the use of the perchloride of iron in phthisis, but he has a higher claim; he has thoroughly worked out a series of cases in which its therapeutic powers have been carefully tested, and he presents the evidence to his readers in a form which enables them to examine its validity.—*Medical Times and Gaz.*, July 12th, 1862, p. 40. His estimate of its powers in phthisis is, however, too highly coloured.

FILIX MAS.

Rhizome of *Aspidium (Nephrodium) Filix Mas*, Swartz.

- 1737? SWAMMERDAM, J. *De Filice Mare Dodonæi, diss. epistolaris.* Impr. in ejus *Biblia Naturæ*, vol. ii, p. 906-910. *Anglicè*
On the *Felix mas* or *Male Fern* of *Dodonæus*. Printed with his
Book of Nature, p. 151-153. *Bibl. Banks.*
1775. [NOUFFER.] *Précis du traitement contre le Ténia ou ver solitaire pratiqué à Morat en Suisse.* Paris, 4to.
Bibl. Acad. Edin.
1775. [NOUFFER.] *Traitement contre le Ténia ou ver solitaire pratiqué à Morat...examiné et approuvé à Paris.* Paris, 4to.
- This and the preceding memoir, "imprimés par ordre du roi," contain the official notification of the secret remedy of Madame Nonffer, the widow of a Swiss surgeon, which Louis XVI had purchased for 18,000 francs. The principal or active ingredient in her nostrum was the powdered rhizome of the male fern, which consequently was brought prominently to notice, especially in France.
1777. SIMMONS, S. F. *An account of the Ténia or Long Tape Worm, and of the method of treating it as practised at Morat, in Switzerland.* Translated from the French, with preface, notes and plates. London, 8vo, pp. 80.
- The treatment here indicated is mainly by the male fern root. See *Duncan's Med. Commentaries*, v, 1777, p. 70.

1821. GEBHARD or GEBHARDT, B. D. *Diss. sistens analysin chemicam Radicis Filicis Maris. Kiliae, 4to.

1826. BATSÓ, V. *De Aspidio filice mare. (Historisch-chemische Betrachtung über die Wurzel des männlichen Farnkrautes.)

Vindobonæ, 8vo, pp. 37.

M. Batsó in this memoir announces the discovery of an acid, *filicie acid*, and an alkaloid, *filicine*, in the root of the male fern, in which he considers the anthelmintic power of the remedy to reside.

1826. PESCHIER, C. Sur un nouveau moyen de tuer le Ténia vulgaire. (Ex. in *Bibliothèque Univ. de Genève*, xxx, 1826, p. 205.)

Notwithstanding previous testimonies in favour of male fern it seems to have fallen into comparative disuse till the publication of this memoir by Dr. Peschier, who was one of the first to point out the superior advantages of the resinous oil extracted by ether, the ethereal extract of present writers. His evidence of its powers as a tænicide is very conclusive, based as it is upon 160 successful cases. In this country its value is established by the trials of Professor Christison (*Edin. Med. Journal*, July, 1853), Dr. J. H. Bennett (*Monthly Journ. of Med. Sci.*, February, 1855), Dr. A. Fleming (*infra*), and others.

GAMBOGIA.

Gamboge.

1614. REUDENIUS, M. Judicium de novo Gummi Purgante. (Impr. in W. Payer, 'Tractatus de Thermis Carolinis,' Lipsiæ, 12mo, p. 209-226.) *Bibl. Med.-Chir. Soc.*

1625. REUDENIUS, M. De novo Gummi Purgante epistola. Lugd. Bat. 12mo, pp. 58. *Bibl. Med.-Chir. Soc.*

Sermo est de gummi gitta aut gutta. Ejus usum adfirmat per experimenta, tutum esse salubremque in arthritide, dari posse ad septem et octo grana.—*Haller, Bibl. Bot.*, i, p. 417.

1626. LOTICHIUS, J. P. De gummi ut vocant Gotta, sive laxativo Indico discursus theorico-practicus. Francof. ad Viad. 8vo.

1628. PUTEO, Z. Historia de Gumma Indica anti-asthmatica, anti-hydropica et anti-podagrica. Venetiis, 4to, pp. 40. *Bibl. Med.-Chir. Soc.*

There can be little doubt, from the description of its physical characters, its medicinal properties, and its synonyms, especially from passages in Reudenius, p. 237, that the "gum" described by this and the preceding writer was gamboge. The point at which they are both in error, and which creates some confusion, is its geographical source, which they both maintain to be Peru. It is, however, worthy of remark that the *Hypericum baceiferum* of Linnæus (*Vismia Guianensis, Pers.*), indigenous in Guiana, yields a purgative gum of a yellow colour, which in some other respects also resembles true gamboge.

1638. CASTELLI, P. Chrysopus ejusque nomina, essentia, usus facili methodo traduntur, &c. Messinæ, 4to.

De gummi guttæ; succum plantæ esse, sibi quidem ignotæ, curare hydro-pem, esse *κακοστομαχον*, corrigi spiritu vitrioli.—*Haller, Bibl. Bot.*, i, p. 428.

1777. JAEGER, C. F. *Diss. de Cambogiæ Guttæ succo, sive Gummi Guttæ officinali. Resp. C. E. Gaupp. Tubingæ, 4to, pp. 32. Idem in *Schlegel, Thes. Mat. Med.*, vol. ii, art. xxvi, p. 401. *Bibl. Coll. Phys. Edin.* (ed. Lipsiæ, 1793); *Med.-Chir. Soc.*

A discussion on the botanical origin, physical characters, and chemistry of gamboge, followed by an account of its medicinal properties and uses; especial notice is taken of its efficacy in dropsy, and of its powers as an anthelmintic in cases of tania.

1858. DAVASZKIEWIEZ, L. Meletemata de Resinarum, præsertim Resinæ Gutti in tractu intestinali rationibus. Dorpati 8vo.

1793. CHIARENTI, F. Osservazioni ed esperienze sull' Sugo Gastrico riguardato come il mezzo destinato dalla Natura, per rendere suscettibile una gran parte delle sostanze ad essere assorbite dai diversi vasi assorbenti della macchina animale. Firenze, 8vo.
1797. BRERA, V. L. Programma del modo d'agire sul corpo umano per mezzo di frizioni fatte con Saliva ed altri umori animalizzati e colle varie sostanze che all'ordinario si somministrano internamente. Pavia, 8vo, pp. 48. Fourth ed. under the title of 'Anatripsologia,' &c., Paviæ, 2 vols. 8vo, 1799-1800. Alt. ed. 1812-1814. German transl. of first ed. Leipzig, 8vo, 1798; of fourth ed. by J. Egerel, Vienna, 2 vols. 1800-1801, and Erlangen, 1806, 2 vols. 8vo.

For some curious and interesting observations on the uses of gastric juice and saliva in medicine, especially as solvents of opium and other active agents to be applied externally with a view to their absorption into the system, see review of this book in *Duncan's Annals of Med.*, iii, 1798, p. 190 *et seq.*

1799. GIULIO, C. Sugli effetti di alcuni remedi disciolti nel Suco Gastrico o Saliva. Torino, 8vo.
1802. DORSEY, J. SYNG. *Essay on the lithontriptic virtues of the Gastric Liqueur. Philadelphia, 8vo. *Bibl. Med.-Chir. Soc.*

The author details several experiments made with the view of determining the solvent power of gastric juice on calculi in the bladder. He came to the conclusion that this power was so feeble that the stone progressed almost as fast as the solution, and that its use would not supersede the necessity of an operation.—*Amer. Journ. Med. Sci.*, January, 1845, p. 189.

1869. LUSSANA, F. Sur le traitement du Cancer à l'aide du Suc Gastricque du chien, et sur la manière d'extraire ce suc et de l'employer. Padova, 4to, pp. 24, tab. i.

Recently Professor Lussana has experimented with gastric juice as a local application in cancer, and although it was found to soften the tumour it was not powerful enough to arrest the progress of the disease. See *Edin. Med. Journ.*, July, 1874, p. 90.

Summary or abridged English translation of Boerhaave's edition by D. Turner, London, 8vo, 1736.

Bibl. Acad. Edin.; *Coll. Surg. Lond.* (ed. 1566); *Coll. Phys. Edin.* (ed. 1599); *Med.-Chir. Soc.* (ed. 1789, with Gruner's supplement and Turner's summary).

This work contains notices or abstracts of the writings of fifty-nine of the earliest writers on syphilis, its history, and various modes of treatment. It presents many points of interest both from an historical and medical point of view. The writers on guaiacum noticed are Hutten (1519), Gallus (1525), Poll (1536), Brassavolus (1555), Ferri (1566), and C. Ferrandus (n. d.). In addition to these there are incidental notices of guaiacum in the writings of several others. Their concurrent testimony is strongly in favour of the antisiphilitic virtues of a decoction of the wood. Ferrandus, indeed, as cited by Turner in his Summary (p. 87), remarks "this divine medicament truly deserves the name we have here given it of 'Lignum Sanctum.' No mention is made by these writers of the resin, which, according to Flückiger and Hanbury (*Pharmacographia*, p. 95), was first admitted into the London Pharmacopœia in 1677.

1592. WITTICH, J. Vom Ligno Guaiaco, Wunderbaum, China, Sarsaparilla, Sassafras, Lignum Nephriticum. Lipsiæ, 4to. *Ibid.* 1603, 4to.

HÆMATOXYLON CAMPECHIANUM, Linn.

Logwood.

1780. WEINRICH, G. A. *Diss. de Hæmatoxylo Campechiano. Erlangæ, 4to, pp. 38. Idem in *Schlegel, Thes. Mat. Med.*, vol. ii, p. 187. *Bibl. Linn. Soc.; Med.-Chir. Soc.* (Schlegel).
Contains a fair account of logwood, its botanical source and pharmacological history. Its value in dysentery and diarrhœa, and the various modes of its administration, &c., occupy the latter half of the treatise.

HELIX POMATIA, the Snail, and HÉLICINE.

1808. TARENNE, M. G. Cochliopérie; Recueil des expériences très curieuses sur les Hélices terrestres ou Escargot, &c. Paris, 8vo.

The author states that having observed that the slimy juice of the snail has long been used with success in diseases of the chest, and noticing its astringency, &c., he was led to conjecture that this juice when applied to the skin would readily penetrate it and act upon subjacent parts; hence he was led to apply it to hernial apertures with the view of causing their contraction or closure. He asserts that in this way he succeeded in obtaining radical cures! "Though there is no rational expectation that a cure can be thus affected, yet the positive manner in which M. Tarenne relates his cases will induce some, perhaps, to give his method a trial." For the method, &c., see *London Med. Phys. Journ.*, xxiv, 1810, p. 18.

1813. WOHNLICH, W. De Helice Pomatia e classe molluscorum gastroteropodon. Wirceburgi, 4to, plate. *Bibl. Med.-Chir. Soc.*
1854. DE LAMARE, E. De la guérison de la Phthisie Pulmonaire par l'Hélicine. Paris, 8vo, pp. 28.

In this brochure the author sets forth the virtues of helicine, a glutinous extract prepared from the snail, which in the form of broth has long been a popular domestic remedy in cases of consumption.

1843. ESCOLAR, D. S. Apuntes para la Historia Natural y Medica de la Sanguijuela. Madrid.

Divided into two parts, considering the leech (1) in its zoological relations, and (2) in its use in practical medicine; on both these the author offers many interesting observations. It concludes with an account of the various instruments which have been proposed to replace the leech in practice, *e.g.* the bdellometer of Sarlandière, the bdellophore of Charpentière, the artificial leech of Johnson, &c. None of these instruments, however, have been found to effectually supply the place of the leech. See analytical review in *Medical Times*, April 5th, 1851, p. 377.

Mr. Freake has the merit of calling attention to a medicine whose virtues have been either overlooked or overrated. The author apparently belongs to the latter class. He is persuaded that it is eminently beneficial as an alterative and tonic, that it is a good diuretic, that it acts gently as an aperient, that it possesses considerable power as a sedative, and that it has great power in "correcting acrimony"! A great objection to the conclusions drawn by Mr. Freake, especially with regard to the value of the hop in gout, is that other remedies of known efficacy were exhibited at the same time with it. Amongst the communications is one from Dr. Maton, which in the opinion of the reviewer (*infra*) "is fairly worth all the rest put together."—*Edin. Med. Surg. Journ.*, iii, 1807, p. 351—4.

HYDRARGYRUM.

Mercury and Mercurials generally.

1527. BETHENCOURT, JACOB, A. Nova Pœnitentia Quadragesima, necnon Purgatorium in Morbum Gallicum seu Venereum, una cum Dialogo Aquæ Argenti vivi, ac Ligni Guaiaci, collectantium super dicti morbi curationis prælatura, opus fructiferum. Paris, 8vo, pp. 120. Traduction Française avec commentaires par Dr. A. Fournier, Paris, 1870.

Morbum venereum novum esse, ann. 1495 primum adnotatum...Inunctionem (mercurialem) jubet sexto die, aut septimo, leni laxante medicamento interrompere, tum aliquot diebus quiescere; seirrhos duros et ulcera esthiomena longiorem inunctionem requirere...Guaiacum humidis et pituitosis ægris convenire: aquam argenti præstare reliquis auxiliis; ita hydrargyrum vocat.—*Haller, Bibl. Med. Pract.*, i, p. 514.

Of Dr. Fournier's translation of this rare volume, published under the title of 'Nouveau Carême de Pénitence et Purgatoire d'Expiation à l'usage des malades affectés du Mal Français ou Mal Vénérien,' &c., there is an interesting account in the *Brit. and For. Med.-Chir. Rev.*, January, 1872, p. 150. It is there spoken of as containing a world of curiosity, of which not the least notable is the dialogue between mercury and guaiacum, a portion of which is cited. Whichever was employed, it was, as the reviewer justly remarks, "a sort of purgatory which the patient had to pass through." The original work is very rare, not a copy existing in any of the British libraries whose catalogues have been examined. It is said to be the earliest work published in France on the venereal disease. It is not included in the 'Aphrodisiaens' of Luisinus, 1566 *q. v.*

1566. LUISINUS, A. Aphrodisiacus, seu de Morbo Gallico, &c., de Ligno Indico...Argento vivo, &c. *Vide* "Guaiacum," 1566. Venetiis, folio.

In this collection of fifty-nine of the earliest treatises on venereal disease there is not one which treats specifically of mercury, but in the majority of them there are incidental notices of its employment as a local or external application. Thus W. H. Brackanan (1514), John de Vigo (1518), and J. Paschal (1534), give directions for mercurial ointments, plasters, and lotions to be used by way of inunction, and Fraecastorius (1555) advocates mercurial fumigation. Fallopius (1565) appears to have been one of the first to administer it internally, mercury constituting the basis of his *Pill. ex Præcipitato*, to which great virtues were assigned. Two years previously, however, P. Bayrus, of Turin, speaks of a pill held in his time in great

repute called *Pill. contra Morbum Gallicum*, of which mercury formed an ingredient. The first who entered a protest against its use, whether externally or internally, appears to have been D. Leoni in 1562; he pronounces it a poison, inducing paralysis, tremors, convulsions, and a "train of the most baneful nervous symptoms."

- M. de Horne undertook by direction of the French Government to make a series of experiments with the view of ascertaining the comparative efficacy of the different preparations of mercury in syphilis. His decision was in favour of corrosive sublimate, which proved in his hands of invariable efficacy, and he expresses himself satisfied that the cures performed by it under his inspection were real and permanent.—Pearson, *Mat. Med.*, p. 122.

Bibl. Coll. Phys. Edin.
1781. CLARE, P. A treatise on the Gonorrhœa, to which is added a CRITICAL Inquiry into the different methods of administering Mercury. Intended as a supplement to a former work intitled 'A new and easy Method of Cure by the introduction of Mercury into the system through the orifices of the absorbent vessels on the inside of the mouth.' London, 8vo, pp. 60.
The greatest part of this pamphlet consists of quotations from Boerhaave, Mead, Woodward, Alston, G. Fordyce, Smith, and Plenck, but chiefly from the three latter. The author's inquiry seems intended to prove that rubbing calomel on the inside of the mouth is the safest and most effectual method of introducing mercury into the system.—*London Medical Journal*, vol. i, 1781, p. 369.
1782. HOWARD, J. A treatise on the medical properties of Mercury. London, 8vo, pp. 120.
Bibl. Med.-Chir. Soc.
The author of this essay is a zealous advocate for salivation in the treatment of venereal disease. He considers that the more violent the salivation the greater *ceteris paribus* will be the anti-venereal power of the remedy. He is of opinion that mercury, in order to cure the disease in question, should be given to a sufficient extent to produce "a melting down, attenuation, or singular species of putrefaction of the animal fluids," or, in other words, through mercurial cachexia. Verily the remedy is as bad as, if not worse than, the disease.—Review in *London Medical Journal*, iii, 1732, p. 170, 176.

Paris, 8vo. 2me éd., Paris, 1832. *Bibl. Med.-Chir. Soc.*
- "Faithful to the traditions of Montpellier," observes M. Bouchardat "M. Legrand enthusiastically extols the preparations of gold in scrofulous, syphilitic, and herpetic affections." His enthusiasm in their favour has apparently influenced his views with respect to Mercury, of the value and safety of which, as indicated by the title, he entertained grave doubts. In practice, in the treatment of syphilis at any rate, the preparations of Mercury have driven their more costly rivals out of the field.

1834. PHILIP, A. P. W. On the influence of minute doses of Mercury, combined with the appropriate treatment, in restoring the functions of health, and the principles on which it depends.
London, 12mo, pp. 112. *Bibl. Med.-Chir. Soc.*

Dr. Wilson Philip divides his work into three chapters—(1) on the *modus operandi* of mercury generally; (2) on the *modus operandi* of minute and frequently repeated doses of that medicine; (3) a consideration of those cases in which these minute and frequently repeated doses are applicable.

The doses here indicated range from $\frac{1}{4}$ to $\frac{1}{3}$ of a grain of blue pill every six or eight hours; by these, long continued, he considers the full stimulant effect of mercury can be obtained without its sedative operation; or its whole benefit without any bad consequences. The book is not without its value: its great faults are a want of precision, a continued turning aside and hunting down every subject that may cross his path, and a want of lucid order.—*Edin. Med. Surg. Journ.*, xlii, p. 177—184.

1864. BECK, J. B. Essays on Infant Therapeutics, with history of the origin and use of Mercury in Inflammatory Complaints. Third ed. New York, 12mo, pp. 167. First ed. New York, 1849.
Bibl. Med.-Chir. Soc.
- The seventh chapter, treating of the origin and use of mercury in inflammatory complaints occupies only eight pages, and these are chiefly devoted to showing that calomel was in use amongst American physicians in the treatment of this class of cases long anterior to the date (1784), when Dr. Hamilton, of Lynn Regis, introduced its employment to the notice of British practitioners. (*Ivide* "Hydrargyri Subchloridum," 1784.) The author seems to overlook the fact that the great credit awarded to Dr. Hamilton is not so much for his proposal to employ calomel in inflammatory diseases, as for his pointing out the superior value of the combination of calomel and opium in this class of cases. A far more valuable and practical chapter in Dr. Beck's book is the third, "On the effects of Mercury on the Young Subject." It may be read with advantage by all.

1869. BENNETT, J. HUGHES. A report on Mercury appended to "Medicine in Modern Times by Dr. Stokes, Acland, &c., or Discourses delivered at a meeting of the British Medical Association."

London, 8vo

A very important paper. It is true that it upsets all our preconceived ideas as to the action of mercury on the liver, and is diametrically opposed to common experience in regard to its practical use when the bile seems to be defective; but it opens up entirely new views as to the action of a most important remedy, and gives a novel explanation of the relief obtained from its use in certain cases.—*Edin. Med. Journ.*, November, 1869, p. 456.

1869. BENNETT, J. HUGHES. Report on the action of Mercury, Podophyllin and Taraxacum on the Biliary Secretion; being the Report of the Edinburgh Committee of the British Medical Association.

Edin. pp. 45. Second ed. with appendix, *ibid.* 1874, pp. 80.

In 1868 the British Medical Association appointed a committee (consisting of Drs. Hughes Bennett, Christison, MacLagan, Fraser, Rutherford, and A. Gamgee) to examine the cholagogue properties of certain articles of the materia medica. The results of their investigations, embodied in the above-named pamphlet, were published by Professor Bennett on his own authority, the other members of the committee having publicly disclaimed their responsibility as regards the report on the ground that they had not the opportunity of seeing it previous to its publication in the *British Medical Journal*, July 25, 1868, p. 78, and May 8, 1869, p. 411, in which it originally appeared. The main conclusions drawn by Professor Bennett are—(1) *As to mercury*, that when administered so as to impair the general nutrition it lessens the biliary secretion; that given to dogs (the animals subjected in each instance to the experiments) in either small, gradually augmented, or in large doses, it does not increase the biliary secretion; and lastly, that it does not influence it at all so long as neither purgation nor impairment of health are concerned. (2) *As to podophyllin*, that in doses of 2 to 8 grains it diminished the solid constituents of the bile, whether purgation followed or not, and that doses which produced purgation lessened both the fluid and solid constituents. (3) *As to taraxacum*, that doses of the solid extract, varying from 60 to 240 grains, affected neither the biliary secretion, the bowels, nor the general health of the animal. These results, especially with regard to mercury, so contrary to a long-cherished belief, gave rise to much discussion. The contradiction, however, between a belief in the cholagogue

powers of mercury on the one hand and the results obtained in this investigation on the other are more apparent than real, for the term "cholagogue" has a far wider signification than a mere stimulant of the biliary secretion; it extends to the removal or expulsion of bile from the system whether accumulated in the intestines or circulating in the blood, and there is clinical warrant for believing that mercury, especially calomel, can and does act in this way; hence it is deserving of being classed as a true cholagogue. The same in a minor degree, perhaps, holds good with regard to podophyllin and taraxacum. See on this point the observations of Dr. Lauder Brunton in an excellent paper on the action of purgative medicines in *Practitioner*, May and June, 1874.

1869. PARKER, LANGSTON. Mercurial Vapour Bath, being an account of its successful mode of employment. London, 8vo.

This pamphlet is written to oppose the statements of some writers that syphilis is better treated without mercurials. The author cleverly and neatly proves his assertion.—*Edin. Med. Surg. Journ.*, August, 1874, p. 161.

1875. MAURIAC, C. Du traitement de la Syphilis par les Fumigations Mercurielles. Paris, 8vo, pp. 19.

Mercurial Salivation, Ptyalism.¹

¹ Of the extent to which salivation was formerly carried we at the present day can form a very faint idea. Thus Grainger, in his 'Essay on West India Diseases' (Edinburgh, 1802), treating of yaws, says that when the disease is on the decline, in order to secure the habit from any latent taint, the best plan is to maintain a gentle (!) salivation for six weeks or two months, and he immediately adds "the quantity of spit in the twenty-four hours should never exceed a quart! (p. 74). If *that* was his idea of a *gentle* salivation, what must have been his views of a full one?"

 cury is the sole cause of what are termed Secondary Symptoms.
 London, 8vo, pp. 107.
Bibl. Coll. Phys. Edin.
- The substance or rather the shadow of Dr. Murphy's book is the follow-
 ing doctrine—"that ulceration of the throat, cutaneous eruptions, iritis,
 nodes, venereal swelled testes, &c., termed secondary symptoms, are pro-
 duced solely by mercury" (p. 130). The title sets forth the same notion, but
 the book itself, somewhat strangely, contains no proofs of its truth, unless
 the author's earnest conviction and some loose reasoning can be deemed such.

1860. HABERSHON, S. O. On the injurious effects of Mercury in the treatment of Disease. London, 8vo, pp. 82.
- Dr. Habershon is a very able exponent of the extravagances with regard to the use of mercury of which practitioners, even so late as 1860, were guilty, and he shows well the fallacies upon which the various theories have been built that have made mercurials the main remedy, or more properly speaking the main agent, in the medical man's hands in the treatment of disease. Dr. Habershon by no means wishes to banish mercurials from practice, believing them to be valuable remedial agents, but to regulate and restrict their use to certain conditions, of which he gives an enumeration.—*Brit. and For. Med.-Chir. Rev.*, July, 1860, p. 163-4.

1785. HAMILTON, R. Letter to Dr. Duncan giving an account of a successful method of treating Inflammatory Diseases by Mercury and Opium. (Ex. in *Duncan's Med. Commentaries*, ix, 1785, p. 191.)

Few contributions to medical periodical literature have ever exercised a wider and more durable influence than this. For fully half a century subsequently the combination of calomel and opium, here advocated, constituted the routine practice in all cases of inflammation amongst British practitioners in all parts of the globe, and considering how indiscriminately it was employed, the only wonder is that it was not productive of such a degree of mischief as to make shipwreck of its own reputation. Calomel as a remedy in inflammation was in use by American physicians some years anterior to Dr. Hamilton's recommendation of it (*vide Beck*, "In Hydrargyrum," 1864), but it was reserved for him to demonstrate its greatly increased value when given in conjunction with opium.

1821. HALLIDAY, A. Memorial to the Honorable the Court of Directors for the Affairs of the East India Company. Calcutta, 8vo, pp. 200.

A rare little work, presenting the history of a modern medical martyr, Dr. A. Halliday, of the Bengal Medical Service, and furnishing a curious episode in the history of mercury which appears worth preserving. In 1818 the Bengal Medical Board issued a circular calling upon the medical officers of that Presidency to furnish information based upon personal observation with regard to the diseases of the country, their treatment, &c., with the view of embodying the reports and publishing them collectively in one volume. Dr. Halliday, who had filled the office of surgeon to the General Hospital at Calcutta from May 1st, 1818, to August 17th, 1819, sent in a paper entitled—"Curious Coincidence betwixt the number of Casualties and the quantity of Calomel used in the General Hospital at Calcutta, extracted from the appendix to remarks on the monthly returns of that hospital for the last three years and nine months," the sum and substance of which is embodied in the following table:

| | Cases treated. | Grains of Calomel to each Patient. | Proportion of Deaths to Cases. |
|---|----------------|------------------------------------|--------------------------------|
| From 1st May, 1816, to 30th April, 1817 | 1063 | 102 $\frac{2}{5}$ | 1 in 8 $\frac{3}{4}$ |
| " " 1817 " " | 875 | 208 | 1 " 7 $\frac{1}{2}$ |
| " " 1818 " " | 2089 | 51 $\frac{1}{10}$ | 1 " 15 |
| " " 1819 " 17th August, 1819 | 635 | 28 $\frac{1}{2}$ | 1 " 20 |
| " 1st Sept, 1819 " 21st January, 1820 | 707 | 123 $\frac{3}{4}$ | 1 " 6 $\frac{1}{5}$ |

The paper, which contained also some strictures on the hospital management, gave great offence to the ruling powers, who apparently were staunch mercurialists, it being considered to reflect injuriously on their favourite practice. Dr. Halliday was therefore called upon to withdraw his paper and recant his opinions, which he refused to do, though great pressure was brought to bear upon him, as he alleged that what he had advanced was strictly correct and based on his own personal observation. The result was, to use Dr. Halliday's own words, "The Governor-General in Council was pleased to remove me from the situation of Presidency Surgeon" (to which appointment he had in the mean time succeeded), "and resolved not to admit of my being again vested with any medical trust until Government shall be fully satisfied by a report from the Medical Board that I have become sensible of my error, and disposed in consequence to exercise a greater sobriety of judgment in the future performance of my duties—to abstain from rash and crude innovation, and be more attentive to the rule and mode of medical practice which higher qualifications and more extensive experience have established." He

was accordingly removed from his office, and for months afterwards, we learn from a subsequent part of the memoir, he did not receive one rupee of pay, but was left to support himself and his family as best he could. The result of his memorial to the Court of Directors was, that he was reinstated in the service, so at least I learn from Dr. Norman Chevers, through whose kindness I have been able to consult Dr. Halliday's highly interesting memorial.

1825. ANNESLEY, J. On the action of Calomel. Being a critical analysis of part iii of "Sketches of the most prevalent Diseases of India," &c., with a treatise on Cholera, &c. London, 8vo, pp. 464.

An essentially practical work, illustrating the safety and efficacy of large doses of calomel. In fevers, whether intermittent, remittent, or continued, in dysentery, acute and chronic, and in diseases of the liver, Mr. Annesley records his opinion derived from large experience that calomel in doses of from ten to twenty grains, either alone or variously combined, is an excellent remedy. In these diseases his general practice was to give grs. xx of calomel with or without gr. j—ij of opium, at bedtime, followed by a smart purgative in the morning, and this practice was repeated daily until the excretions assumed a healthy character. A tonic laxative was then resorted to till the functions of the bowels were completely restored. The least degree of soreness of the gums was regarded as interfering with the salutary effects of the calomel, as its use had then to be discontinued, the object throughout being to act upon the secretions of the intestines and to diminish vascular excitement in the intestinal canal, and not in the most remote degree to act upon the salivary glands. The idea that mercury to be useful must affect the gums is deprecated by the author, who considers that this, as well as other untoward effects resulting from the administration of calomel, are due to its being exhibited in small doses frequently repeated, a practice which is here strongly condemned. See further analytical review in *London Med. Phys. Journ.*, lv, 1826, p. 40—53.

1850. COX, W. J. The Cholera: what has it taught us? Its modes of treatment examined, and the mode by Calomel shown to be the best. With cases. London, 8vo, pp. 26.

The most uncompromising mercurialist who ever existed was perhaps Dr. Stilon, who in a cholera epidemic at Malta in 1837 distributed no less than 87,000 grains amongst 373 patients, being on an average about 230 grains each; one patient took 1160 grains. Under this heroic treatment 52 per cent. of the cases proved fatal, so that its success cannot be said to have been very marked. An English translation of Dr. Stilon's work, 'The Cholera at Malta in 1837,' was published by Dr. S. B. Watson, London, 8vo, 1848.

- The object of this essay is to point out the possible change, either partial or complete, of calomel into corrosive sublimate within the living body of either man or of the inferior animals. The author, who discusses the subject in the only way becoming a philosopher and scholar, traces his subject carefully through the scattered fragmentary notices of his predecessors, adds his own observations and experiments, and so presents the whole matter in an intelligible form within the limits of a brief essay, the materials of which could readily have been expanded into a volume. For an abstract of his observations, and his practically useful directions for the administration of calomel, see *Dublin Journ. Med. Sci.*, October, 1873, p. 300-303.

- Cirillo gave preference to corrosive sublimate over every other form of mercury in the treatment of syphilis. He used it in the form of ointment composed of a drachm of the salt, previously dissolved in an aqueous solution of sal ammoniac and 1 oz. of lard. This was rubbed into the sides of the feet till a cure was effected. He regards this treatment as milder and less uncertain than any other in general use.—*Pearson*, p. 123.

- Lewin's experience, founded on 700 cases, is strongly in favour of the hypodermic use of mercury in syphilis—rapid in its results as well as safe and effectual, though he does not regard it as applicable to all cases. He employed a solution of corrosive sublimate in distilled water. For his views, together with those of other investigators on this mode of treatment, see *Brit. and For. Med.-Chir. Rev.*, October, 1869, p. 510.

CORROSIVE SUELIMATE,

TOXICOLOGY OF.

1777. NAVIER, P. T. Contre-poisons de l'Arsenic, du Sublimé Corrosif, &c. Paris, 2 vols. 12mo. German transl. by C. E. Weigel, Leipzig, 1782, 2 vols. 4to. *Bibl. Acad. Edin.*
1820. BARBÉ, R. J. *Sur l'empoisonnement par le Sublimé Corrosif. Paris, 4to.
1820. TADDEI, G. Sopra un nuovo antidoto (Gluten) del Sublimato Corrosivo e per le altre preparazioni venefiche del mercurio. Firenze, 8vo, pp. 107. French transl. by G. Odier, Paris, 1822, 8vo. *Bibl. Med.-Chir. Soc.*

The experiments of Professor Taddei show that the property of decomposing corrosive sublimate is possessed in an eminent degree by gluten. If the salt in solution is properly mixed with a due proportion of the gluten of wheat, that is about four times its weight, the water will be found no longer to contain any mercury, while the gluten becomes whitish, brittle, hard, and not prone to putrefaction. This change is effected with rapidity. Twelve grains of the sublimate thus decomposed had no effect whatever on a dog. Wheat flour will probably prove an effectual antidote by reason of the gluten it contains.—*Christison on Poisons*, pp. 380, 431.

1824. PRUDHON, E. *Antè* (p. 500), 1824.
1830. MANCEL, N. *De l'empoisonnement par le Deuto-chlorure de Mercure. Paris, 4to.
1842. MIALHE, L. Nouveau antidote du Sublimé Corrosif. (Ex. in *Bulletin de l'Acad. Royale de Méd.*, viii, 1842, p. 10.)
 The antidote here proposed by M. Mialhe is the proto-sulphuret of iron prepared by decomposing sulphate of protoxide of iron by hydrosulphate of ammonia. Orfila found it a perfect antidote provided it was administered to animals immediately after the poison, and that the lapse of ten minutes was sufficient to render it useless.—*Chritison, op. cit.*, p. 442. This constitutes a great objection to its use.
1844. BOUCHARDAT et SANDRAS, MM. Recherches et expériences sur les contre-poisons du Sublimé Corrosif. (Ex. in *Ann. de Thérap.*, 1844, p. 88.)
 The hydrated persulphuret of iron was the antidote advocated by M. Bouchardat, but the same objection applies to it as to the protosulphuret advised by Mialhe (*antè*.)

Red Precipitate.

1808. BERG, J. F. *De Hydrargyri Oxydati Rubri usu interno tum ad alios morbos tum potissimum ad Morbos Syphiliticos.* Francof. ad Viad. 8vo.

Red precipitate as a local application to syphilitic ulcers is a remedy of ancient date. From a passage in the Aphrodisiacus of Luisinus (*vide* "Guaiacum," 1566), it appears that the priority as to its use as an external application in this class of cases was claimed by John de Vigo and Nicholas Massa, both of whom flourished early in the 16th century. Dr. Turner in his "Summary" of this work (p. 13), observes, "Now, whether Vigo or Massa was the first who prepared this noble chirurgick remedy (is uncertain); if the former, as appears, was the first who published it, whilst the latter made a secret of it, 'tis plain that the praise and commendation must be Vigo's for revealing and making the same publick, and which I must number amongst the most useful legacies which were ever left to the practitioners of that art."

HYDRARGYRI SULPHURETUM NIGRUM.

Æthiops Mineral.

1725. SCHROMMIUS, J. F. *De Æthiope Minerali. Altdorfii, 4to. *Bibl. Coll. Surg. Lond.*
 1744. DELIUS, H. F. *Diss. de Æthiope Minerali cum analectis de salibus. Erlangæ, 4to
 1748. HILSCHER, S. P. Progr. de Æthiope Minerali. Jenæ, 4to.
 1872. CADET, S. Nouvelles études sur le Choléra asiatique. Le Sulfure noir de Mercure proposé pour préserver l'Italie de ce terrible fléau : traduction du Comte C. des Dorides. Roma, 8vo, pp. 40.

In this pamphlet Dr. Cadet proposes the black sulphide of mercury as a preventive and cure of cholera. He states that under its use at Nepi in 1854 and at Ravenna in 1855, as well as at Rome in the practice of one physician, 100 per cent. of those attacked by cholera recovered. He recommends four grains to be taken once or twice a week, or, still better, a grain daily in a spoonful of wine as a preventive, and twelve to thirty grains as a remedy. See, further, *London Med. Record*, February 19th, 1873, p. 108.

1875. CADET, S. Ragionamento inteso a comprovare la mirabile efficacia terapeutica del Solfuro nero di Mercurio detto comunemente Etiope Minerale in più nature di morbi, particolarmente dei Pestilenziali e più particolarmente dell' Indo Colerico (Estratto). Roma, 4to, pp. 10.
 1875. CADET, S. Proposta intorno alla cura della Lissa detta comunemente Rabbia canina o Idrofobia. Roma, 8vo, pp. 32.

The object of this pamphlet is to set forth the virtues of the black sulphide of mercury (æthiops mineral) in the treatment of hydrophobia. The author would not omit the usual measures of ligature, suction, and cauterisation, but would supplement them by the internal administration of the mercurial sulphide.—*Dublin Journ. Med. Sci.*, January, 1876, p. 30.

MINOR MERCURIAL PREPARATIONS.

In addition to the foregoing preparations of mercury, others have from time to time been proposed which have enjoyed considerable temporary repute and been made the subject of treatises by their inventors and others, but which nevertheless have fallen into disuse. Amongst the older ones may be named Keyser's "Dragées Anti-vénéériennes" (1756), the base of which was acetate of mercury; Plenck's "Liquor Mercurialis" (1769), an emulsion of mercury and gum arabic; the "Liqueur de Pressvain" (1767), a solution of the oxide of mercury and acid tartrate of potash; "the Soluble Mercury of Hahnemann" (1792), an ammonical proto-nitrate of mercury; "Velnos' Vegetable Syrup" (1787), &c. It has not appeared advisable to reproduce the bibliographies of these obsolete preparations which are given *in extenso* by Mérat and De Lens.—*Dict. Mat. Med.*, vol. iv.

HYDROCHLORIC ACID.

Muriatic Acid, Spirit of Sea Salt, &c.

1787. DEMLER, J. F. *De circulatione Acidi Muriatici usibus quibusdam chirurgicis opportuna, &c. Tubingæ, 4to, pp. 22.

HYDROCOTARNIN.

1872. FALCK, F. A. *Toxikologische Studien über die Hydrocotarnin. Marburg, 4to, pp. 22.

The action of this opium alkaloid, discovered by Otto Hesse, is made the subject of investigation by Dr. Falck. Compared with thebia, codeia and morphia, it appears that thebia is a more active poison than codeia, codeia more active than hydrocotarnin, and this again more active than morphia. Falck's researches, so far as they go, have been apparently carefully con-

ducted, but a more thorough inquiry into the physiological history of the drug is desirable.—*Dr. D. Ferrier in London Med. Record*, April 9th, 1873, p. 218, where a short abstract of Falck's observations will be found.

HYDROCOTYLE ASIATICA, Linn.

1853. LÉPINE, J. J. De l'Hydrocotyle Asiatica, *Linn.*
Pondichéry, Imprim. du Gouvernement, 8vo, pp. 86.

In this brochure M. Lépine first brought prominently to notice the use of this plant in the treatment of leprosy; he does not appear, however, to have been the discoverer of its virtues, such as they are; this rightfully belongs to the late Dr. Boileau, of the Mauritius, who was himself a sufferer from leprosy, and used it with great benefit in his own case. See *Bouton's Med. Plants of Mauritius*, p. 74. Further observations on its use were published by M. Lépine in *Moniteur des Établissements Français dans l'Inde*, August 5th and August 26th, 1853, and *Revue Coloniale*, 1854, t. xii, p. 329.

1855. HUNTER, A. Report upon the Hydrocotyle Asiatica. (Ex. in *Madras Med. Reports*, 1855, p. 356-376.)

A very able report on the botanical, chemical, and medical history of hydrocotyle. It embraces an account of Dr. Hunter's trials with it in the Leper Hospital and Native Infirmary at Madras, from which it is evident that though it has no claims to the consideration as a specific in leprosy, yet that as an alterative tonic it often proves most useful in ameliorating the symptoms and improving the general health. It was, however, found peculiarly efficacious in the treatment of syphilitic and scrofulous ulcerations. The report concludes with some interesting tabular statements.

1856. SÉNARD, C. A. V. Note sur l'Hydrocotyle Asiatique : observation d'un cas mortel de lèpre tuberculeuse. (Ex. in *L'Union Médicale*, 1856, p. 173.)

1857. AUDOIT, E. Études pathogénétiques et thérapeutiques sur l'Hydrocotyle Asiatica. (Ex. *Journ. de la Soc. Gallic. de Méd. Homœopathique.*) Paris, 8vo, pp. 116.

Considering the periodical in which this essay originally appeared and the general tone of the author's writings, the presumption is that it is homœopathic in its character and teaching.

1859. LECOQ, J. Coup d'œil sur la valeur thérapeutique de l'Hydrocotyle Asiatica dans le traitement de la Lèpre et de quelques Affections graves de la Peau. (Ex. in *Bull. Gén. de Thérap.*, 1859, t. lv, p. 529.)

1819. COULLON, J. J. A. Recherches et Considérations médicales sur l'Acide Hydro-cyanique, son radical, ses composés et ses antidotes, &c. Paris, 8vo, pp. 283.
1819. MAGENDIE, F. Recherches physiologiques et cliniques sur l'emploi de l'Acide Prussique ou Hydrocyanique dans le traitement des Maladies de Poitrine et particulièrement dans celui de la Phthisie pulmonaire, &c. Paris, 8vo, pp. 80. Dutch transl. by H. J. Schouten, Amst. 1820, 8vo. *Bibl. Med.-Chir. Soc.*
 This memoir relates chiefly to the employment of prussic acid in pulmonary complaints, and some cases are detailed illustrative of its beneficial effects in spasmodic and distressing coughs. The author likewise mentions two cases of phthisis apparently arrested by this remedy, but the true nature of these cases was very doubtful.—*Quart. Journ. Foreign Med.*, ii, 1819-20, p. 188.
1819. GRANVILLE, A. B. Observations on the internal use of Hydrocyanic Acid in Pulmonary Complaints, chronic catarrhs, spasmodic coughs, asthma, hooping cough, and some other diseases. Second ed., 1820. German transl. by L. Cerutti, Leipzig, 1820. London, 8vo, pp. 82. *Bibl. Med.-Chir. Soc.*
 Contains a highly coloured picture of the virtues of hydrocyanic acid, which is recommended indiscriminately in a large number of cases of the most opposite nature and character. No less than 100 pages are devoted to phthisis, which the author seems to think curable even in the advanced stages by the use of hydrocyanic acid! The language employed is so highly figurative as to be wholly inapplicable to the purposes of a scientific paper. See *Lonsdale infra*, and *Edinb. Med. Surg. Journ.*, July, 1824, p. 204.
1820. LIGNAC, —. *Sur l'usage de l'Acide Prussique ou Hydrocyanique. Paris, 4to.

Bibl. Med.-Chir. Soc.; *Coll. Phys. Edin.*
- M. Preyer had, previous to issuing this important treatise, published two very valuable papers—one on the effects of hydrocyanic acid and cyanide of potassium on the colouring matter of the blood, and another on the poisonous action of these drugs—which are appended to the present treatise. In the second of these papers (published originally in *Virchow's Archiv*) he brought forward a large mass of evidence to show that prussic acid poisons by removing oxygen from the blood, and, further, that artificial respiration immediately applied, is the best remedy for prussic acid poisoning. In the present treatise the subject is worked out in much greater extent and completeness. It contains a bibliography arranged in chronological order. See, further, *Practitioner*, August, 1868, p. 105. An experimental criticism on this work by Drs. Boehm and Knie is published in *Archiv f. Experimentelle Pathol. und Pharmakol.*, April 17th, 1874. A translation of this, described as "a paper of great practical interest and importance," is given in *Practitioner*, September, 1874, p. 168 *et seq.*

1831. ROUSSEAU, L. F. E. De l'efficacité des feuilles du Houx

(*Ilex aquifolium*) et de l'Ilicine dans le traitement des Fièvres Intermittentes. Paris, 8vo, pp. 115, tab. i. (Ex. in *Mém. de l'Acad. Royale de Méd.*, iii, p. 334.) *Bibl. Coll. Surg. Lond.*

An abridged English translation by G. Clendinning of this interesting essay is published in the *Trans. of the Med.-Bot. Soc. of London*, 1832-3, p. 1-16. To it was awarded by that society the silver medal of the session 1832. After passing in review the botanical, physical and chemical history of the holly, the author supplies an analysis of seventy-eight cases of intermittent fever in which it was employed, and the general conclusion arrived at is—"that the powder of holly leaves is, in the cure of disease, a valuable medicine, and that nature seems to have designed it especially for that unhappy class of patients which fortune often permits not to consult a physician and still more frequently prevents from purchasing the medicines he prescribes."

1833. CHOMEL, A. F. Observations relatives à l'emploi de la poudre des feuilles de Houx dans le traitement de Fièvres Intermittentes. (Ex. in *Mém. de l'Acad. Royale de Méd.*, iii, p. 334.)

IODIUM et POTASSII IODIDUM.

Iodine and Iodide of Potassium.

1815. GAULTIER DE CLAUDRY, H. F. Recherches sur l'existence de l'Iode dans l'eau de la mer, &c. Paris, 4to.
1820. COINDET, C. W. Découverte d'un nouveau remède (Iode) contre le Goitre. (*Soc. Helvét. des Sci. Nat. de Genève*, Séance July 25, 1820.) Genève, 8vo.

This and two other memoirs on the same subject by this author published in *Bibl. Univ. de Genève*, vol. xvi, are reprinted in *Bayle's Bibl. Thérap.*, i, p. 1 *et seq.* To Coindet is due the credit of introducing the medicinal uses of iodine to the notice of the profession. See next article.

1821. COINDET, C. W. Observations on the remarkable effects of Iodine in Bronchocele and Scrophula. Being a translation from the French of three Memoirs of Dr. Coindet, by Dr. J. R. Johnson.

"Dr. Coindet's short treatise, as translated by Dr. Johnson, of Bristol, consists of three memoirs, in which the history of the introduction of iodine, its several pharmaceutical preparations, its effects in the cure of goitre, and its influence on the economy in general, are clearly and correctly related. It is the most original and perhaps the fairest and most perspicuous statement of the virtues of the remedy."—*Edin. Med. Surg. Journ.*, xxii, July, 1824, p. 212.

1822. BRERA, V. L. Saggio Clinico sull' Iodio e sulle differenti sue combinazioni farmaceutiche, giusta i risultamenti che se ne sono ottenuti nell' Istituto Clinico-Medico dell' Università di Padova. Padova, 8vo, pp. 106. *Bibl. Coll. Phys. Edin.*

The work of Prof. Brera is part of the report of his practice in the Clinical Institute of Padua for 1820-21. The author not only gives an account of the different cases in which iodine was tried but has added a good history of its nature and properties, its various preparations, and formulæ for its administration. It is at once a comprehensive, elaborate and scientific account of iodine.—*Edinburgh Med. Surg. Journ.*, xxii, July, 1824, p. 212. See also an abstract of its contents in *Med.-Chir. Rev.*, March, 1823, p. 761 *et seq.*

1823. STARCK, J. B. *De Iodio. Lugd. Bat. 8vo, pp. 64. *Bibl. Roy.*

Cöln, 12mo, pp. 82.
1824. GAIRDNER, W. Essay on the effects of Iodine on the human constitution, with practical observations on its use in the cure of Bronchocele, Scrofula and tuberculous diseases of the chest and abdomen. London, 8vo, pp. 64. *Bibl. Med.-Chir. Soc.*
- Gairdner conceives that, while the virtues of iodine have been panegyricized by all, its evils have been studiously concealed, and under this impression he has undertaken the task of delineating the horrors of *iodization*, and of execrating with becoming severity the rashness and ignorance of those men who will administer a powerful and dangerous remedy without watching its effects. To this there can be no rational objection, but when Dr. Gairdner monopolises, as he appears to do, the prescription of iodine we should fear that many would be disposed to regard the publication of this small treatise as little else than a civil hint to the public that as iodine must be given to cure some diseases it is unsafe to trust its administration to the common mass of physicians, and that no other but Dr. Gairdner is qualified to superintend its action on the living body. Perhaps we must admit that it contains one or two little things which some people would do well to know about the administration of iodine.—*Edinburgh Med. Surg. Journ.*, xxii, July 1824, p. 212.

Bibl. Coll. Surg. Lond.
1831. LUGOL, J. G. A. Essays on the effects of Iodine in Scrofulous Diseases, including an inquiry into the mode of preparing Ioduretted Baths. Translated from the French by Sir W. Brooke O'Shaughnessy. With an appendix by the translator containing a Summary of cases treated with Iodine, either simple or combined with opium, mercury or lead, and directions for preparing the Iodurets of these metals, and for detecting the adulterations of Iodine and the Hydriodate of Potash. London, 8vo, pp. 218.
Bibl. Med.-Chir. Soc.
- This important work is divided into three parts—1. On the treatment of scrofulous diseases by iodine.—2. An inquiry into the effects and mode of employment of ioduretted baths, minute directions being given for their preparation, &c.—3. A continuation of Part I, on the use of iodine in scrofulous diseases, illustrated by cases of scrofulous tumours and tubercles, abscesses, fistulous openings, ulcers, and cicatrices, skin diseases, glandular swellings, scrofulous ophthalmia, white swelling and other scrofulous affections of the joints and bones, &c., all more or less benefited by iodine. The value of the original work is greatly enhanced by the information introduced into the appendix by the translator.
- "A most valuable monograph, being entirely practical and founded on accurate as well as authentic clinical observations and experiments. The translation is singularly faithful."—*Med.-Chir. Rev.*, Oct., 1832, p. 109-130.
1832. MÜLLER, J. F. *Über die arzeneiliche Wirkung und Anwendung der Iodine. Würzburg, 8vo, pp. 56.
1832. ALDIS, C. J. B. An inquiry into the medical properties of Iodine, more particularly in Dropsy, &c. Partly translated from the Latin of T. L. C. Schroeder van der Kolk. London, 8vo, pp. 32.

Bibl. Coll. Surg. Lond.; Coll. Phys. Edin.
1833. ULDALL, F. A. *De effectibus Iodii in organismum humanum usuque ejus medico. Havniæ, 8vo, pp. 78.

A tolerably full exposition of the properties and virtues of iodine, drawn from all sources; it is without any claims to originality, the author seldom, if ever, referring to his own experience either to confirm or correct the statement of others.—*American Journ. Med. Sci.*, xvi, 1835, p. 173.

1834. SCUDAMORE, Sir C. Cases illustrating the remedial power of the inhalation of Iodine and Conium in Tubercular Phthisis and various disordered states of the lungs and air-passages. Second ed. London, 8vo, pp. 227.
Bibl. Med.-Chir. Soc.

This, although professing to be a second edition of the treatise published by the same author in 1830 (see "Inhalation," Part i), is in reality a distinct work, containing a series of eleven new cases, in addition to the fifteen given in the earlier volume. They all tend, however, to the same conclusion—that many morbid states of the lungs and air-passages may be cured or at least alleviated by medicated inhalations. His cases of tubercular phthisis "cured" by this means should be received with reserve.—*Edin. Med. Surg. Journal*, xli, p. 460-464.

1835. SARPHATI, S. E. Commentatio de Iodio. Lugd. Bat. 8vo.

A prize essay, regarding which Pereira (*Mat. Med.*, vol. 1, p. 396), states that it contains the most extensive list of natural bodies containing iodine, of any work with which he is acquainted.

1837. ZAHOROWSKI, D. *De Iodio, ejusque præparatis, vi, et administratione variis in morbis. Vilmæ, 8vo, pp. 93.

1837. COGSWELL, C. An Experimental Essay on the relative physiological and medicinal properties of Iodine and its compounds; being the Harveian Prize Dissertation for 1837. Edin. 8vo, pp. 179.
Bibl. Coll. Phys. Edin.

This is a work of considerable labour and research, and well merits the honour of being crowned with the Harveian prize. It comprehends an excellent digest of the physiological and therapeutic effects of iodine and its compounds, derived from the most authentic sources.—*Brit. and For. Med. Rev.*, January, 1838, p. 162.

1838. CABISSOL, L. J. D. Sur l'emploi de l'Iode dans le traitement de l'Hygroma ou hydropisie des bourses muqueuses articulaires. (Ex. in *Bull. de Thérap.*, 1838, t. xiv, p. 94.)

1838. INGLIS, J. On English Bronchocele, with a few remarks on the use of Iodine and its compounds. London, 8vo, pp. 95.

A valuable summary of facts and opinions.—*Dublin Journ. Med. Sci.*, vol. xiv, 1839, p. 144.

1839. SHOENJANN, G. D. *Diss. de Iodi vi medicâ. Dorpati, 8vo.
 1839. DAVIES, J. Practical remarks on the use of Iodine locally applied in various surgical diseases and external injuries.

London, 8vo, pp. 62.

The utility of iodine as an external remedy is prefaced by some judicious remarks on its therapeutic properties and on the best mode of applying it in the following morbid states—erysipelas, phlegmon or abscess, sloughing, acute inflammation of the joints, inflammation of the breast, gout, enlargement of the joints, carbuncles, lupus or noli me tangere, malignant ulcers of the tongue and tonsils, scrofulous glandular enlargements, whitlow, chilblains; lacerated, contused, and punctured wounds; burns and scalds, and ulcers. The statements respecting the remedy are put forth in a plain, lucid, and straightforward manner, without any desire to exaggerate its effects.—*Brit. and For. Med.-Chir. Rev.*, October, 1839, p. 512.

Bibl. Coll. Surg. Lond.

1845. HASSING, M. De Syphilide Kali Hydriodico tractata. Havniæ, 8vo, pp. 92.

After an historical account of the iodide of potassium Dr. Hassing gives a long statement of the authors of each country in succession and of the various circumstances in which they found the remedy useful, and he then examines the value of the medicine statistically, basing his observations upon 250 cases observed in the medical section at Copenhagen in 1838—9. The author is evidently a careful inquirer, and has recorded his observations with much modesty and judgment.—*Brit. and For. Med.-Chir. Rev.*, Oct., 1845, p. 482.

1845. GAUTHIER, L. P. A. Observations sur le traitement des Maladies Syphilitiques par l'Iodide de Potassium. Paris et Lyon, 8vo, pp. 100.

This work is far less valuable and philosophical than Dr. Hassing's (*antè*), although it contains a great number of very interesting cases illustrating the efficacy of the iodide treatment of syphilis.—*Brit. and For. Med.-Chir. Rev.*, October, 1845, p. 485.

1845. CLARKE, Sir A. On the exhibition of Iodine in Tubercular Consumption and other diseases of the chest, and in the treatment of scrofulous, cancerous, and cutaneous diseases, &c. Tenth ed. Dublin, 8vo, pp. 180. *Bibl. Coll. Surg. Lond.*

A superficial work, designed more for the public than the profession.

1845. MOJ'SISOVICS, G. Darstellung einer sichern und schnellen Heilmethode der Syphilis durch Iodpräparate. Wien, 8vo.

Contains a full description of the various preparations of iodine as well as the writer's views respecting the nature and pathology of syphilis....The chapter entitled "Pharmacology of the Preparations of Iodine" contains a

description of thirteen varieties, viz. pure iodine, the tincture, amyllum iodatum, the iodides of barium, lead, sodium and potassium, the iodide and biniodide of mercury, the ioduretted syrup of iron, iod-ammonium and the various mineral waters of which this body is an ingredient. Vide *Brit. and For. Med. Rev.*, April, 1845, p. 516, for good analysis of this work.

- To this essay two prizes were awarded, one by the Medical Society of Lyons, the other by the Society of Sciences of Hainault. M. Dorvault, being only a pharmacien, though an able one, feels that an apology is due for meddling with the medical portion of the subject; but in respect to this he contents himself with collating the facts which have hitherto been published, and with additional testimony imparted to him by Lugol, Velpeau, Ricord, Cullerier, &c. This portion of the work has rather too much of the character of a mere eulogium, and would probably have been better executed by a medical practitioner. The other departments of the work, however, leave nothing to be wished for, and constitute a valuable manual of reference on all that relates to the chemical and pharmaceutical history of iodine.—Analytical review in *Brit. and For. Med.-Chir. Rev.*, January, 1851, p. 91-95.

- The statements made and the cases related by Dr. Rilliet in illustration of the occurrence of that condition described by him under the names of *iodism* and *iodic intoxication* are certainly very curious; they are not such as we are accustomed to witness in this country, and it is rather difficult to accept the explanation he gives of this admitted difference, his theory being that the air of Switzerland is particularly free from iodine, and hence the preternatural sensibility of his patients to the influence of it.—Analytical review in *Brit. and For. Med.-Chir. Rev.*, July, 1862, p. 24-33.

IODOFORM.

1856. MAITRE, A. *Étude sur l'Iodoforme. Paris, 4to, pp. 26.
The author treats successively of—1st, the history of iodoform; 2nd, its physical properties; 3rd, its preparation; 4th, its physiological action; 5th, its anæsthetic action; 6th, its antiseptic property, and 7th, its therapeutic uses, concluding with several formulæ for its administration.
1863. RIGHINI, G. Iodoformognosie, ou Monographie chimique, physiologique, pharmaceutique et thérapeutique de l'Iodoforme; traduit de l'Italien et annoté par le Dr. E. Janssens. Ouvrage couronné. Bruxelles, 8vo.
1868. FÉRÉOL, —. De l'Iodoforme employé comme topique pour cicatrizer les Plaies et Ulcères non cancéreux. Paris, 8vo, pp. 23.
1868. MAILLARD, C. P. *De l'Iodoforme. Paris, 4to.
1869. NIESZKOWSKI, L. E. *Essai sur l'emploi thérapeutique de l'Iodoforme, considéré comme cicatrisant et anesthésique local. Paris, 4to, pp. 42.
The author recommends iodoform in powder as a local agent in the treatment of fetid ulcerations, onychia, fistula in ano, &c. He believes it to act beneficially as a local anæsthetic and also as a cicatrizing agent. The experience of Dr. Matthews Duncan, however, does not confirm these views.—*Edin. Med. Journ.*, July, 1874.
1871. PETITEAU, S. *De l'Iodoforme, son emploi comme topique cicatrisant et anesthésique local. Paris, 4to.

Dr. Izard appears to be an intelligent and candid observer; he claims no more for his favourite remedy than he seems able to justify by his clinical records, and by wisely not attempting to prove too much predisposes his

readers to accept his conclusions, which, indeed, appear to be perfectly well founded.—*Amer. Journ. Med. Sci.*, January, 1873, p. 227.

For a sketch of Dr. Izard's experience with iodoform in venereal affections, see *Brit. and For. Med.-Chir. Rev.*, April, 1873, p. 494—5.

IPECACUANHÆ RADIX.

Ipecacuanha.

1682. PECHÉY, JOHN. Observations on the Brazilian root called Ipepocoanha. London, 4to.

Bibl. Med.-Chir. Soc.

1688. HELVETIUS, J. C. A. Remède contre les cours de Ventre.

Paris, 12mo.

The remedy here treated of is ipecacuanha: although its antidysenteric virtues had previously been made known in 1649 by the writings of Piso and Maregraf, it was left to Helvetius, about forty years subsequently, to bring the remedy into public notice in France. This he did in a truly empirical style, keeping his remedy a secret, placarding its virtues on the street walls, &c. So great was his success, the Dauphin of France having been cured by its means, that the French king purchased from Helvetius his secret for 1000 louis-d'or and made it public. See further *Flückiger and Hanbury, Pharmacographia*, p. 332.

1806. DAUBENTON, L. J. M. Observations on Indigestion, in which is satisfactorily shown the efficacy of Ipecacuan in relieving this, as well as its connected train of complaints peculiar to the decline of life. Translated from the French by Dr. Buchan.

London, 1807, 8vo, pp. 24.

Bibl. Med.-Chir. Soc. ; Manch. Med. Soc. (ed. 1809).

The object of this *brochure* is to point out the utility of small doses of

ipecacuanha in the debility of the stomach and indigestion of old age. The author deduces clear and decisive proofs of the efficacy of the proposed remedy.—*London Med. Phys. Journ.*, xviii, 1806, p. 18.

- Contains a series of very interesting researches for the purpose of dis-
covering the mode of action of ipecacuanha and of emetia; they serve to
confirm the results arrived at by M. Chouppe. For a summary of his obser-
vations see *London Med. Record*, January 27th, 1875, p. 59.
1875. CHOUPPE, H. Recherches thérapeutiques et physiologiques
sur l'Ipéca. Paris, 8vo, pp. 44.
1875. WOODHULL, A. A. Clinical Studies with large non-emetic
doses of Ipecacuanha. Atlanta, U.S., 8vo, pp. 63.
1875. WOODHULL, A. A. Clinical Studies with non-nauseating use
of Ipecacuanha, chiefly in Intermittent Fever.
Atlanta, U.S., 8vo, pp. 23.

In the former of these pamphlets the author relates twenty-four cases of
dysentery and in the latter twenty-three cases of intermittent fever bene-
ficially treated by ipecacuanha in large non-emetic doses. The substance of
both these pamphlets with much additional matter has been published by
the author in a separate form, 'Studies chiefly Clinical, in the non-emetic
use of Ipecacuanha,' Philadelphia, 1876, 8vo, pp. 155. This work is a valu-
able contribution to our therapeutic knowledge of ipecacuanha.

JALAPÆ RADIX.

Jalap.

1569. DONATI, M. De radice purgaute quam Mechioacam (*i. e.* Jalapa) vocant. Mantuæ, 4to, pp. 24.
 Much confusion existed, even to a late period, between mechoacan root and jalap. The former is now known to consist (at least in part) of the large thick tuber of *Ipomœa Jalapa*, *Pursh.*, a plant of the southern United States and Mexico. As a drug it has been long obsolete in Europe, having given place to jalap (the root of *Exogonium Purga*, *Bentham*), which is a more active and efficient purgative. (*Flückiger and Hanbury, Pharmacographia*, p. 398.) For a list of works on Mechoacan root, see that article.

The use of walnut leaves in the form of infusion or extract in the treatment of scrofulous affections was introduced by M. Negrier, who expresses a high opinion of its value. It was found to act most slowly in scrofulous swellings of the glands, but very rapidly on diseased bones or ulcerated surfaces, or in strumous ophthalmia in which a decoction of the leaves employed as a collyrium proved extremely valuable. See *Brit. and For. Med. Rev.*, October, 1841, p. 539, and October, 1845, p. 564.

KALMIA LATIFOLIA, Linn.

Mountain Laurel.

1802. THOMAS, G. G. *Diss. on the Kalmia latifolia and angustifolia. Philadelphia, 8vo.

These American shrubs are said to possess decidedly narcotic properties. The author relates an obstinate case of diarrhœa cured by a decoction of the leaves of *K. latifolia*, but in small doses even it was found to produce vertigo and other unpleasant symptoms. See also *Bigelow's American Med. Bot.*, i, p. 133 *et seq.*

KAMALA.

Rottlera tinctoria, Roxb.

1875. LEMAITRE, M. *Du Kamala (*Rottlera tinctoria*). Action ténifuge du Kamala. Paris, 4to.

This tæniæfuge was introduced to the profession in 1853 by Dr. C. Mackinnon (*Indian Ann. of Med. Sci.*, 1853, vol. i, p. 286), and its value has been established by the researches of Dr. T. Anderson (*Ibid.*, 1856, vol. iii, p. 82), Dr. C. A. Gordon (*Medical Times and Gaz.*, November, 1856, p. 538, and May, 1857, p. 429), Dr. Peacock (*ibid.*, November 6th, 1858), Dr. Ramskill (*Lancet*, 1858, vol. i, p. 476), Dr. Leared (*ibid.*, p. 541) and others. Dr. Anderson (*op. cit.*) enters fully into the history of the drug generally. For much interesting matter on this drug see an excellent paper by the late Daniel Hanbury in *Pharm. Journ.*, xvii, 1858, p. 405.

KINO.

Inspissated Juice of *Pterocarpus Marsupium*, DC.

1757. FOTHERGILL, J. Letter concerning an astringent Gum brought from Africa. (Ex. in *Med. Observations and Enquiries*, i, 1757, p. 358.)

Fothergill's new gum he describes under the name of "Gummi rubrum astringens Gambiense," and it retained this name till 1774, when it was introduced into the *Edinburgh Pharmacopœia* as Gummi Kino, a name derived probably from Kano, the Mandingo name of the tree yielding it.

KRAMERIE, vel RHATANIE RADIX.

Rhatany Root.

1799. RUIZ, H. Disertacion sobre la raiz de la Ratánhia específico singular contra los fluxos de sangre, &c. Madrid, 4to, pp. 47.
1807. PAGEZ, —. Mémoire sur les vertus de la plante connue au Pérou et en Espagne sous le nom de Ratanhia (Krameria trian-

dria, *Linn.*) (Ex. in *Sédillot, Journ. Gén. de Méd.*, xxx, September, 1807, p. 3-33.)

1808. REECE, R. Practical Observations on the Radix Rhataniæ or Rhatany, a production of Peru. London, 12mo, pp. 50.
Bibl. Manchester Med. Soc.

From this short history the inference follows that rhatany possesses great powers as a tonic and stomachic, and evidence is adduced to show that it is superior in efficacy to the preparations of cinchona, and never fails of curing all sorts of disorders!—*Edin. Med. Surg. Journal*, iv, 1808, p. 504. From subsequent remarks in the same journal (vol. vii, p. 213), it appears that the author belonged to a confraternity of quacks, and that this pamphlet is little else than an advertising puff. The same character pervades more or less all the productions of this author.

1817. HURTADO DE MENDOZA, DON M. Die Ratanhiawurzel, und ihre vortrefflichen Wirkungen, gegen passive Blutflüsse. Mainz, 8vo, pp. 45. *Vide Klein, infrà.* *Bibl. Roy.*

1670. GREISELIUS, J. G. *Tractatus medicus, de cura Lactis in Arthritide in quo indagatâ naturâ lactis et arthritidis tandem rationibus et experiētiis allatis diæta lactea optima arthritidem curandi methodus proponitur?* Viennæ, 12mo. 2nd ed., Budisingæ, 1681, 12mo. *Bibl. Med.-Chir. Soc.; Coll. Phys. Edin.*
Haller (*Bibl. Med. Pract.*, iii, p. 284) assigns 1620 as the date of this work, and observes with reference to this proposed treatment of gout "Res in eo tempore nova." Van der Linden, however, assigns 1670 as the date, and this is probably correct, judging from the dates of the author's other works. The libraries above mentioned have copies only of the second edition, that of 1681.

1871. DONKIN, A. SCOTT. The Skim-Milk Treatment of Diabetes and Bright's Disease, with clinical observations, &c. London, 8vo, pp. 317.

By the employment of skim milk the author argues that "we can administer to a diabetic both an albuminous and saccharine proximate principle of food. The lactin appears to undergo conversion in the presence of the casein into lactic acid, and thus skim milk becomes a food containing a quality (quantity?) of albumen in the highest degree capable of assimilation, with the addition of a saccharine principle which is also assimilated." There is no doubt that Dr. Donkin has done good service by his advocacy of

this treatment, and by the careful rules he has laid down for its application; it could be wished, however, that his proofs of its success were more satisfactory. The author shows that skim milk is preferable to new milk.—*Brit. and For. Med-Chir. Rev.*, April, 1872, p. 428.

1874. WANKLYN, J. A. Milk Analysis: a practical treatise. London, 8vo, pp. 70.

A most disappointing book. In spite of the promises of the author in his preface, we cannot find that he has described a single improved method of examining milk. One would almost imagine that he had never read any analytical work dealing with the analysis of foods and farm products. Indeed, a student might infer that milk had never been properly analysed till Mr. Wanklyn accomplished the feat in 1871.—*Brit. and For. Med-Chir. Rev.*, July, 1874, p. 154.

1874. VIVANTE, C. D. Della Cura Lattea. Venezia, 8vo, pp. 80.

This pamphlet treats of milk and of the uses to which it may be put in medicine. There are few authors from Hippocrates down to the latest medical periodicals who have assigned to milk any curative properties that are not quoted. It contains a good account of the milk treatment of diabetes (chiefly from English sources), and also of koumis in the treatment of phthisis... There are very few physicians, however experienced, who will not learn something new of the uses of milk by reading this little treatise.—*Edin. Med. Journ.*, June, 1875, p. 1129.

LACERTA.

The Lizard and other Reptiles as Medicinal agents.

1782. FLOREZ, J. Especifico nnevamente discubierto en el regno do Guatimala, para la curacion del Cancro. Madrid, 4to. French transl. by Grasset, 1784, Lausanne, 8vo. Italian transl. by C. M. Toscanelli, 1784, Turin, 8vo.
1784. DAUBENTON, CARRÈRE, et MAUDUYT, MM. Rapports sur les vertus médicales des Lézards du royaume de Guatimala. (Ex. in *Hist. de la Soc. Royale de Méd., Paris*, vol. iv.)

This is a report upon a Spanish memoir on a specific discovered in Guatemala for the cure of cancer and other diseases, written by Dr. Joseph Florez, member of the University of Guatemala, and published at Madrid in 1782 (*ante*). This specific is a species of lizard called in Spanish *Lagartija*, and its mode of administration by the Indians is at once simple and disgusting! They cut off the head and tail, remove the intestines and skin, and swallow it directly whilst still bloody and warm, and, if possible, before life is quite extinct! If this is objected to, the lizard, prepared as above, is made into two boluses, the size of a musket bullet and enclosed in a wafer! One is sometimes sufficient to effect a cure, but when this is not the case the number is increased to three. For further details see *Duncan's Med. Commentaries*, xv, 1790, p. 121—133. This remedy fell into merited disuse till 1811, when attention was again called to it by Dr. Gourlay, who, in his work 'On the Natural History, Diseases, &c., of Madeira,' states that in that island the common lizard (*Lacerta agilis*, *Linn.*) is used with success in cancer, and speaks of instances of its successful employment within his own knowledge.

LACTUCA et LACTUCARIUM.

The Lettuce and its concrete Juice.

1780. COLLIN, H. J. Lactucæ sylvestris contra Hydropem vires. Vienna, 8vo, pp. 66, tab. i. *Bibl. Med.-Chir. Soc.*

From the figures of the plant prefixed to this essay, and from the statements contained in it, we are led to the conclusion, notwithstanding the title-page, that the plant employed by the author was not *Lactuca sylvestris* but *L. virosa*. Out of 24 cases of dropsy treated with the extract of this plant related in this work only one is said to have proved fatal. See reviews in *Duncan's Med. Commentaries*, xi, 1787, p. 36, and *London Med. Journal*, i, 1781, p. 263—6.

1799. COXE, J. R. Inquiry into the comparative effects of Opium Officinarum extracted from *Papaver somniferum*, *Linn.*, and that procured from *Lactuca sativa*, *Linn.*, the common cultivated Lettuce. (Ex. in *Trans. of American Phil. Soc.*, iv, 1799, p. 387.)

Although the soporific properties of the lettuce were known to the ancients, it was left to Dr. Coxe of Philadelphia, in the above communication, to introduce its concrete juice into modern practice. To this he gives it the name of *Lettuce Opium*, for which, however, Dr. Duncan subsequently substituted that of *Lactucarium*. *Thridace*, another name sometimes applied to it, belongs properly to Extract of Lettuce.

1816. DUNCAN, A. On Pulmonary Consumption. Second ed. To

which is added an appendix on the preparation and use of Lactucarium or Lettuce Opium. Edin. 8vo, pp. 169.

The author speaks very favorably of the medicinal virtues of lactucarium, maintaining that from it we may obtain all the anodyne effects of opium without the disagreeable consequences which not unfrequently follow the employment of opium.—*Eberle*.

LYCOPERDON, Sp. of.

Puff-ball, &c.

1782. BRYANT, C. An historical account of two species of Lycoperdon, in which the plants are accurately described, and their several curious properties are set forth. London, 8vo, pp. 32, tab. i. *Bibl. Banks.*
1853. RICHARDSON, W. B. On the anæsthetic properties of Lycoperdon proteus or common Puff-ball. (Reprint from *Association Med. Journal*, 1852.) London, 12mo, pp. 12. *Bibl. Med.-Chir. Soc.*

A highly interesting and suggestive brochure. From the fact that the fumes of burning puff-ball are in common use for the purpose of stupifying bees before the process of extracting the contents of the hive, the author was induced to extend some trials with it to animals, cats and dogs, in order to ascertain its anæsthetic powers. From these it is evident that the fumes of the puff-ball contain a principle capable of causing anæsthesia in animals. In liberal doses it narcotises rapidly and effectually without unpleasant symptoms; and the narcotic effect soon passes off, leaving the animal in perfect health. Details are given of an operation (removal of a tumour) on a dog during anæsthesia induced by its means. The subject seems well worthy of further investigation.

LYCOPODIUM CLAVATUM, Linn.

Club Moss.

1702. WEDEL, G. W. De Musco terrestri clavato seu Lycopodio. Resp. M. N. Hanneken. Jenæ, 4to, pp. 44. *Bibl. Banks.*
- Multiplies vires medicæ: laudat etiam ad urinæ dolores, ad vulnera, adque plicam.—*Haller, Bibl. Bot.*, i, p. 559.

A literary piracy! The circumstances under which it was produced are given in detail by Daniel Hanbury in his 'Historical Notes on Manna,' *infra*. From this it appears that in 1562 the Neapolitan government issued an edict prohibiting druggists under a severe penalty from using any other manna than that of the leaf (leaf manna), under the impression that that obtained by incision of the bark was of very inferior quality. This law proved very injurious to the Calabrians, and a physician, Annibal Briganti, took up the question in a philosophical spirit, made many visits to the manna districts, and after much investigation came to the conclusion that manna, whether spontaneously yielded by the leaves or stem or obtained by incision of the bark, is essentially the same substance and possesses like virtues. Briganti, distrusting his own judgment in the matter, transmitted his manuscript observations from Chieti, where he lived, to another learned man, Donatus Antoninus ab Altomari, of Naples, who so entirely approved of it that he immediately published the whole of it under his own name!! An account of this shameless piracy is related with much moderation by Briganti himself in his Italian edition of Garcia D'Orto, published at Venice in 1582.—*Hanbury*.

It was through the medium of this brochure that the styptic powers of matico were first brought prominently to the notice of the profession in Great

Britain, but attention to it was called at a meeting of the Med.-Botanical Society of London, May 11th, 1827, when Mr. E. Handfield read a paper on a specimen of a plant called Mattica, presented by Mr. Hartshorne, of Chelsea Hospital. Several experiments on animals illustrating its styptic operation are mentioned in this communication.

METHYLENE, Bichloride of.

1867. RICHARDSON, B. W. On Bichloride of Methylene as a general anæsthetic. (Ex. in *Med. Times and Gaz.*, vol. i, 1867, pp. 423, 479, 559, 693.)

A full and able exposition by its discoverer, of the bichloride of methylene, its properties and uses.

1869. FOURDES et HEPPE. Essai d'une nouvelle anesthésique, le Bichlorure de Méthylène. Strasbourg, 8vo, pp. 16.
1871. ROSSI, P. Risultamenti ottenuti nella Scuola di Chirurgia della regia Università di Padova collo Biclورو di Metilene quale anestetico generale. Padova, 8vo, pp. 15.

The author gives an accurate account of the discovery of the bichloride of methylene by Richardson in 1867, and its first employment in a surgical operation by Mr. Spencer Wells, in November of the same year. Since July, 1868, we are informed it has entirely replaced chloroform and ether as a general anæsthetic in the University of Pavia. In minor operations, however, local anæsthesia by ether spray is preferred. Due praise is awarded in this pamphlet to Mr. Spencer Wells.—*Medical Times and Gaz.*, Aug. 19th, 1871, p. 234.

MONESIA.

Bark of Chrysophyllum Buranheim, Riedel.

1839. DEROSNE, B., et HENRY, O. Tableau synoptique présentant
l'essai analytique, l'indication de quelques préparations pharma-
ceutiques et les propriétés médicinales d'une substance végétale
nouvellement importée de l'Amérique du Sud et connue sous le
nom de Monesia. Paris. Un grand tableau in folio.

Wonderful virtues are ascribed by the author to this substance. Scrofulous
affections generally, hæmoptysis, phthisis (!), debility of the stomach, diar-
rhœa, leucorrhœa, menorrhagia, gonorrhœa, purulent ophthalmia, hæmor-
rhoids and ulcers, are amongst the affections in which it is chiefly lauded.
See *Med.-Chir. Rev.*, July, 1840, p. 174. For a short abstract of this work
see *Dublin Med. Journ. Sci.*, xviii, 1841, p. 127 *et seq.* Beyond being an
astringent it has no special virtues; it has fallen into disuse.

1872. LAWSON, H. Sciatica, Lumbago, and Brachialgia; their nature and treatment, and their immediate relief and rapid cure by hypodermic injection of Morphia. London, 8vo, pp. 200.

The book is divided into ten parts; the first seven are devoted to sciatica and its treatment, the eighth and ninth to lumbago and brachialgia, and the tenth to a sketch of the literature of these subjects. The work commends itself not only by its great practical value and pleasant style but also by the wholesome absence of wild hypothesis. Although all plans of treatment are discussed, the true and almost the only remedy for sciatica—the hypodermic injection of minute quantities of morphia—is especially dwelt upon. To this mode of treatment the author owes his own cure, and he dwells on it with a natural gratitude. All he writes on this part of the subject is expressed with a care and earnestness which carry authority, and the sixteen cases (including his own) which are appended bear the strongest testimony in favour of morphia thus administered.—*Brit. and For. Med.-Chir. Rev.*, July, 1872, p. 152—155.

1872. CROMBIE, J. M. A new and easy method for the Subcutaneous application of Morphia, without the pain, risk, and expense of the hypodermic syringe. London, 8vo, pp. 16.

"This new and easy method" consists in "the use of small threads coated with the requisite quantity of morphia, which are inserted by means of fine

needles into a fold of skin pinched up between the finger and thumb. Theoretically, the plan is ingenious and excellent. The practical difficulty that we would fear is the risk of the morphia either not getting to the wound by being rubbed off the thread or being so well incorporated with the thread as not to be dissolved out of it during the time it is retained, which is to be from three to five minutes."—*Edin. Med. Journ.*, December, 1873, p. 551.

1841. BENNETT, J. HUGHES. Treatise on the Oleum Jecoris Aselli or Cod-Liver Oil as a therapeutic agent in Gout, Rheumatism, and Scrofula. London, 8vo, pp. 180. *Bibl. Med.-Chir. Soc.*
- The first notice of cod-liver oil as a remedy in chronic rheumatism is in a communication from Dr. T. Percival, read to the Medical Society, Oct. 7th, 1782, to which is appended a letter from Dr. Robert Darbey, of Manchester, dated Feb. 12th, 1782, giving an account of its accidental introduction into the Manchester Infirmary about ten years previously. Both letters are in the *London Medical Journal*, iii, 1783, pp. 392—401. It never, however, seems to have come into general use, and little attention was paid to it until after the publication of the above work by Professor J. Hughes Bennett, to whom is due the credit of procuring for it a high place amongst the articles of the *Materia Medica*. "In this work the author has brought together a great mass of evidence from German and other Continental sources as to its value as a therapeutic agent, and to this he has added a large number of illustrative cases. It is a very meritorious brochure, evincing great assiduity and research."—*Med.-Chir. Rev.*, April, 1843, p. 470.

1849. First Medical Report of the Hospital for Consumption and Diseases of the Chest, Brompton.

London, 8vo.

Bibl. Med.-Chir. Soc.

An interesting document, containing the clearest evidence of the value of cod-liver oil in consumption. The medical officers of the institution, Drs. Hamilton Roe, Theophilus Thompson, G. Cursham, R. P. Cotton, R. Quain, and J. Bowie, thus express themselves in reference to the medicinal properties of cod-liver oil:—"From these facts, and a more extended experience since the period at which this report terminates, no other conclusion can be drawn than that cod-liver oil possesses the property of controlling the symptoms of pulmonary consumption, if not of arresting the disease to a greater extent than any other agent hitherto tried" (p. 41).

1849. RAYNER, J. Cod-Liver Oil; its uses, mode of administration, &c.

London, 12mo, pp. 16.

This pamphlet is simply a notice of the therapeutic value of cod-liver oil, the diseases in which it has been employed, and the authorities by whom it has been recommended.—*London Med. Gazette*, July 19th, 1850, p. 160.

1850. TURNBULL, J. An inquiry how far Consumption is curable, with observations...on the use of Cod-Liver Oil and other remedies. Second ed. ? London, 8vo, pp. 106.

Bibl. Med.-Chir. Soc.

A useful treatise, containing clinical information on the comparative value of several remedies, and, above all, of cod-liver oil; the histories of thirteen cases of phthisis, treated with it, are subjoined.—*Edin. Med. Surg. Journ.*, lxxiv, p. 201.

A modest unpretending volume, which is conceived and executed in a right philosophical spirit and constitutes a really valuable addition to the literature of consumption.—*Brit. and For. Med.-Chir. Rev.*, January, 1851, p. 175.

1853. DE JONGH, L. J. L'Huile de Foie de Morue, envisagée sous tous les rapports comme moyen thérapeutique, &c.

Paris, 8vo, pp. 257.

"Our opinion of Dr. de Jongh's work may be thus briefly summed up. We consider it a very complete monograph on the subject, and also that the views of the various authors are fairly stated. We regard his analyses of the different varieties of oil as valuable, inasmuch as they put us in possession of many important data in reference to its chemical constitution; but at the same time we unhesitatingly affirm that some of the conclusions which he has drawn are not warranted by the analyses themselves; and the same applies with greater force to the deductions from the therapeutic data." These remarks apply solely to the above work, and not to a small pamphlet on the same subject professedly by Dr. de Jongh; in it gross errors and misstatements are put forth.—*Brit. and For. Med.-Chir. Rev.*, January, 1856, p. 26.

In the latter portion of the work the author enters into the consideration of cod-liver oil, its history, manufacture, and medicinal uses. He states at length the opinions as to its *modus operandi* entertained by numerous writers, and wisely abstains from propounding any theory of his own.—*Medical Times and Gaz.*, October, 1860, p. 361.

1861. DUBOIS, F. De l'Huile de foie de Morue et de ses succédanés. Tournai et Paris, 8vo, pp. 296.

In 1853 the Academy of Medicine of Paris offered a prize for the best essay on the therapeutic uses of cod-liver oil. This was awarded to Dr. Taufflieb (*antè*), but high encomiums were passed on the essay of Dr. Dubois, which ranked next on the list; this, enlarged, constitutes the present work. The first part consists of an historical account of the advantages derived from the use of fatty substances, and their physiological effects upon the system. The second part treats of the preparation, uses, &c., of cod-liver oil; and the third of a study of its substitutes. The author considers it established by numerous experiments that in rickets and caries of the bones vegetable oils, especially poppy oil, sometimes prove as efficacious as cod-liver oil itself. With regard to the varieties of cod-liver oil, he thinks that one should be selected which is the least disagreeable to the palate of the patient, as being most likely to be easily assimilated, and hence prove most beneficial.—*Journ. Pract. Med.*, English ed., 1861, p. 283.

MYTILUS EDULIS, Linn.

Common Mussel.

1857. FOUCHER, L. Recherches sur le Mytilus edulis, sa composition chimique, ses propriétés thérapeutiques et son emploi dans certaines affections subaiguës et chroniques des voies respiratoires, dans les maladies lymphatiques et scrofuleuses, &c.
Paris, 8vo, pp. 16, 4me éd., Orléans, 8vo, 1870.

For an interesting memoir on the poisonous effects of the mussel (*Mytilus edulis*) by Dr. J. S. Combe, see *Edinburgh Med. Surg. Journ.*, xxix, 1828, p. 86—96.

NAPHTHA.

1800. HELLER, A. F. *De Naphtha aceri ejusque in medicina usu. Jenæ, 4to, pp. 23.
1843. HASTINGS, J. Pulmonary Consumption successfully treated with Naphtha. London, 8vo, pp. 120. Second ed. 1845, pp. 260.
The "naphtha" employed in these cases was "pyro-acetic spirit," obtained by the destructive distillation of the acetate of lead or lime. It was used both internally and by inhalation.
The author considers successively the causes of consumption, its stethoscopic and rational symptoms, its complications, pathology, and diagnosis; he then states shortly the various remedies proposed from time to time as a cure, and lastly, he gives the history, medical and therapeutic, of naphtha, concluding with cases to illustrate his treatment.—*Edin. Med. Surg. Journ.*, lxiv, p. 466.
1844. HOCKEN, E. O. A practical enquiry into the value of medicinal Naphtha in Tubercular Phthisis. London, 8vo, pp. 72.
Dr. Hocken confines himself almost solely to the exposition of the medical history and therapeutic effects of naphtha, illustrated by cases.—*Edin. Med. Surg. Journ.*, lxiv, p. 466. There is a very condemnatory notice of this work in *Brit. and For. Med. Rev.*, January, 1846, p. 146, to which Dr. Hocken published a reply, London, 1845, 12mo, pp. 11.
1846. SALES-GIRONS, —. La Phthisie traitée par les fumigations de Goudron et le Médicinal Naphtha. Paris, 8vo.

NARCEIN or NARCEINE.

1870. BLATIN, A. *Recherches physiologiques et cliniques sur la Nicotine et le Tabac.* Paris, 8vo, pp. 207.
The evil effects of excessive tobacco-smoking are elaborately treated of in this memoir, which likewise contains an able investigation into the physiological action of nicotia.—*Amer. Journ. Med. Sci.*, October, 1870, p. 534.

ACIDUM NITRICUM et NITROSUM.

Nitric and Nitrous Acid.

1795. SMYTH, J. CARMICHAEL, —. *Dissertation on the Jail Dis-temper as it appeared among the Spanish prisoners at Winches-*

ter in 1780, with an account of the means (Nitrous Acid) employed for curing that fever and for destroying the contagion which gave rise to it. London, 8vo. *Bibl. Med.-Chir. Soc.*

1796. SMYTH, J. C. An account of the experiments made on board the Union Hospital Ship to determine the effects of Nitrous Acid in destroying contagion and the safety with which it may be employed. London, 8vo. *Bibl. Coll. Phys. Edin.*

1796. BEDDOES, T. Reports, principally concerning the effects of Nitrous Acid in the Venereal Disease by the Surgeons at the Royal Hospital at Plymouth and other practitioners. Bristol, 8vo. German transl. by F. G. Friese. Breslau, 8vo, 1799. *Bibl. Coll. Phys. Edin.*

From the large mass of evidence here brought together from various quarters, Dr. Beddoes considers it clearly proved that when the constitution is impaired or otherwise feeble or scrofulous, the cure of syphilis should always be attempted by nitrous acid in preference to any other medicine. See *Duncan's Ann. of Med.*, ii, 1798, p. 214.

1798. PRIOLEAU, P. G. *On the use of the Nitric and Oxygenated Muriatic Acids in some diseases. Philadelphia, 8vo. (Ex. in *Caldwell's Philad. Theses.*, vol. i, p. 81.) *Bibl. Med.-Chir. Soc.* (Caldwell).

Consists mainly of a record of cases, chiefly syphilitic, in fourteen of which nitric acid and in four nitro-hydrochloric acid was employed with more or less benefit. Cases of chronic rheumatism and one of hydrothorax treated with the latter acid are also mentioned. The author ascribes the efficacy of both acids to the oxygen they contain.

1798. BLAIR, W. Essays on the Venereal Disease and its concomitant affections. Essay 1, Part i, on the anti-venereal effects of Nitrous Acid, and other analogous remedies. London, 8vo. Second ed. of Part i, *ibid.*, 1799, 8vo, pp. 252. Part ii, 1800, 8vo. German transl. by C. A. Struve Altenburg, 1799-1801, 2 vols. 8vo. *Bibl. Med.-Chir. Soc.*

The experience of the author is adverse to the claims of nitrous acid as a substitute for mercury in the treatment of syphilis, and he expresses his belief that its advocates (which were numerous at the time) were greatly deceiving themselves as to its powers in this respect. He supports this view by some statistical data.—*London Med. Review and Mag.*, vol. i, 1799, p. 257. It is on the whole a most complete publication, since it presents an epitome of what all other writers have advanced on the subject, and contains much interesting and original matter.—*Ibid.*, vol. iii, p. 165.

1799. SMYTH, J. C. The effects of Nitrous Vapour in preventing and destroying contagion, ascertained from a variety of trials made chiefly by Surgeons in H.M. Navy, Hospitals, &c. London, 8vo. *Bibl. Coll. Surg. Lond.*

1800. BEDDOES, T. Communications respecting the external and internal use of Nitrous Acid, demonstrating its efficacy in every form of Venereal Disease, and extending its use to other complaints. London, 8vo, pp. 188. *Bibl. Med.-Chir. Soc.*

Contains a large mass of evidence in support of the author's views as set forth in his former work, 1796. See review in *London Med. Rev.*, 1801, p. 89 *et seq.*

1802. NEALE, A. *De Acido Nitrico ejusque in medicina usibus. Edin. 8vo. *Bibl. Coll. Phys. Edin.; Acad. Edin.*
1802. SCHMIDT, J. A. Beiträge zu den Resultaten der Versuche mit Salpetersäure bei primitiven und secundären syphilitischen Krankheitsformen. Wien, 8vo.

1802. TARTRA, A. E. Traité de l'empoisonnement par l'Acide Nitrique. Paris, 8vo, pp. 302. *Bibl. Med.-Chir. Soc.*
Commendable in every point of view...the subject is fully and ably discussed. The work is divided into three parts:—1. Introductory matter. 2. A detail of cases of poisoning by nitric acid collected from various sources, and of others which fell under the author's notice, concluding with an account of some experiments with this acid on the living and the dead body, &c. 3. The medical history, including the pathology or symptoms, progress, terminations, prognosis, and post-mortem appearances of the disease produced by swallowing nitric acid; the treatment of the case, and an examination of the legal questions to which it may give rise. See review in *Edinburgh Med. Surg. Journ.*, ix, 1813, 369.
1803. SCHWARZ, G. E. G. Nitric Acid in Asthenic Fevers. *Vide* "Acids," 1803.
1816. HOLST, F. Diss. de Acidi Nitrici usu medico. Christianiæ, 8vo, pp. 136.
1817. PELLETIER, —, et CAVENTOU, —. Recherches sur l'action qu'exerce l'Acide Nitrique sur la matière naécée des calculs biliaires humains, et sur le nouvel acide qui en résulte. (*Journ. de Pharm.*, 1817.) Paris, 8vo, pp. 16.

NITROGEN, PEROXIDE OF.

Nitrous Oxide Gas, Laughing Gas, &c.

1795. MITCHILL, S. L. Remarks on the gaseous Oxyde of Azote and on the effects it produces when generated in the stomach, inhaled into the lungs, and applied to the skin. New York, 12mo, pp. 43.
1796. SALTONSTALL, W. *Dissertation on the chemical and medical history of Nitrogene and its combinations with the matter of Heat, &c. New York, 8vo.
1800. DAVY, Sir HUMPHRY. Researches, Chemical and Philosophical, chiefly concerning Nitrous Oxide or Dephlogisticated Nitrous Air and its respiration. London, 8vo, pp. 580, tab. (Reprinted in vol. iii of his 'Collected Works,' 1839).
Bibl. Med.-Chir. Soc.

This truly philosophical work consists of four divisions or researches:—
1st. Relates to the production of nitrous oxide, and the analysis of nitrous gas and nitrous acid. In the 2nd the combinations and composition of nitrous oxide are investigated. The 3rd contains observations on the action of nitrous oxide upon animals, and the changes effected in it by respiration. In the 4th the history of the respirability and extraordinary effects of nitrous oxide is given, with details of experiments on its powers in different individuals. This last research is by far the most important to the practitioner.—*Med. Phys. Journ.*, iv, 1800, p. 265-9.

It is worthy of remark that Sir Humphry Davy in this work foreshadowed the use of anaesthetics in surgery; thus, he remarks (p. 556)—"*As nitrous oxyde, in its extensive operation, appears capable of destroying physical pain, it may probably be used with advantage during surgical operations in which no great effusion of blood takes place.*" How this has been realised by this identical gas as well as other agents is now too well known to need further comment.

- Mr. Baldwin's specific consisted of frictions of the body with warm olive oil. The practice was common in the East from the earliest times, and the oil was also taken internally with the belief of its possessing both prophylactic and curative properties... Mr. Jackson, in his account of the plague in Morocco in 1790, recommended it to many both as a preventive and as a cure; and he states that in both characters it was eminently successful. Bibl. Med.-Chir. Soc.; Coll. Surg. Lond.
The "facts" contained in this work serve to prove that opium externally applied becomes absorbed into the system and produces its full anodyne and narcotic effect. It was used in two forms:—1. Ointment, a drachm of finely powdered opium to a pound of lard. 2. Laudanum diluted with a little alcohol. One ounce of the ointment, containing six grains of opium, procured sleep in several instances. Amongst the cases treated beneficially were maniacal delirium, nervous headache, chronic rheumatism, hooping-cough, typhus fever, &c. In some cases, perhaps, sufficient stress is not laid on the influence which may have been exercised by the *friction*.

- Although the value of opium in diabetes had been noticed by Darwin, Ferriar, and other preceding writers, it is to Dr. Elliotson that we are indebted for anything like a statistical and satisfactory account of its effects in this disorder. He shows that it is capable of diminishing the quantity of the secretion and of divesting it of its saccharine principle, but that to effect this, large and repeated doses are necessary. In one of his cases the patient took forty grains of solid opium twice daily for upwards of a fortnight. See *Med.-Chir. Rev.*, March, 1821, p. 622.

1860. MEYER, L. Ueber Opium in Geisteskrankheiten. Berlin, 8vo.
Whether opium is beneficial or not in certain forms of insanity is here treated in a very lucid manner. The author's opinion is, that opium is useful in puerperal mania, hysterical alienation; in all forms of insanity which are connected with the sexual organs, and in those which occur in the course of certain acute diseases, as variola and acute rheumatism. He gives it internally in large doses, three grains every two hours, or employs morphia hypodermically.—*Med. Times and Gaz.*, November 24th, 1860, p. 511.

Bruxelles, 4to, pp. 232.

To this essay was awarded a gold medal by the Royal Belgian Academy Medicine. The author considers consecutively the use of opium in preg-

nancy, abortion, labour, and the puerperal state, and the fact of the observations being based on clinical experience imparts to the work the highest value. Throughout the work the author has carefully abstained from dogmatizing and from making unsupported assertions.—*Dublin Quart. Journ. Med. Sci.*, February, 1865, p. 154.

1869. HARLEY, J. The Old Vegetable Neurotics, Hemlock, Opium, &c., their physiological action and therapeutical use, alone and in combination. London, 8vo, pp. 355. See "Neurotics," Part I.

Of all portions of this valuable work, the most extensive as well as the most interesting is that devoted to opium and its alkaloids, based on no less than sixty-two carefully conducted experiments on man, as well as on the horse, the dog, and the mouse. The alkaloids experimented with comprise morphia, narceine, meconine, or opianyle, cryptopia, codeia, and thebaia or paramorphia, and these were administered usually by subcutaneous injection, occasionally by mouth. The effects of these alone or in combination are given in a lucid manner, and contribute very materially to our knowledge of the physiological effects and therapeutie uses of this "old vegetable neurotic" opium. See also "Atropa Belladonna." 1869.

A thoroughly unsatisfactory performance. The style is stilted and very bad; the facts are clumsily put together, and scarcely any of them new; the deductions are inconsequent and inane. The following "deduction" is given to illustrate the author's style. "Longevity is more liable to curtailment under the operation of adversative causes and conditions the rather be they physical or mental either" (!).—*Practitioner*, vol. viii, p. 42.

Bibl. Med.-Chir. Soc.
- Upon the whole, we can only say of this work (the second edition) that it contains the chemical errors as before—it is written in the same style of dogmatism and self-conceit—it promises as before to furnish us with incontrovertible facts, but is replete with trifling and inconclusive observations. It again charges British practitioners with enthusiastic exaggerations, whilst almost every page seems to fix the accusation on the author.—*London Med. Rev. and Mag.*, vol. v, 1801, p. 38.

1800. HILL, D. Practical observations on the use of Oxygen or Vital Air in the cure of diseases. Contains cases of palsy, nervous debility, epilepsy, hydrocephalus, scrofula, white swellings and distortions of the spine, &c. London, 4to, pp. 58. German

transl. Göttingen, 8vo, 1801. 2nd. with appendix, London, 8vo, 1820, pp. 102. *Bibl. Coll. Phys. Edin.; Coll. Surg. Lond.* (2nd ed.).

The object of the author is to call the public attention to the practical value of oxygen in the treatment of disease, and he details nineteen cases, principally of scrofula and nervous affections, all of them cured by its agency. Five engravings accompany the work illustrative of some of the most remarkable effects of oxygen both on the human subject and on plants. — *London Med. Rev. and Mag.*, vol. v, 1801, p. 245.

1868. BIRCH, S. B. On the therapeutic action, use, and value of Oxygen in the treatment of various diseases otherwise incurable or very intractable. London, 2nd. ed. 8vo, pp. 149.

Dr. Birch has erred in setting forth oxygen as a panacea. With one's experience of panaceal literature, what can one hope from a work in which we are told that cancer, scrofula, neuralgia, asthma, bronchitis, phthisis, cardiac and hepatic disease, epilepsy, apoplexy, diabetes, paralysis, indigestion, &c., may be all or have been all successfully treated by the administration of oxygen? What other conclusion can we arrive at than that the author's zeal exceeds his reason? There are many points of the highest interest dealt with in Dr. Birch's book, and the reader will find many facts worthy of being considered and discussed most seriously, but we cannot think that the author has been well advised in urging definitive views on the therapeutical

application of oxygen. Nevertheless, those who would learn the virtues of oxygenated bread and water, ozonified oil, nitrous-oxide water, and peroxide of hydrogen, will find all they can wish for in this work.—*Practitioner*, August, 1868, p. 108.

Helmstadii, 8vo, pp. 31.

1790. WOLFF, A. F. *Analecta quædam med. de Phosphori virtute medica.* Göttingæ, 12mo.

This thesis contains the history of twelve cases, ten of them low or typhus fever, in which phosphorus was employed with great advantage. For a good abstract of these, see *London Med. Review and Mag.*, vol. i, 1799, p. 76, *seq.*

1798. WEIGEL, C. E. *Diss. de Phosphori usu medico. Jenæ, 4to.

1798. BRERA, V. L. *Riflessioni medico-pratiche sull' uso interno del Fosforo, particolarmente nell' Emiplegia.* Pavia, 8vo, pp. 46.

In this treatise, Brera, after relating his own observations as well as those of other physicians on the use of phosphorus, gives a short history of a case of hemiplegia in which death followed its administration. He expresses his surprise at any physician recommending the use of so dreadful a remedy! The work on the whole contains much information and is well deserving of attention.—*Med. Phys. Journ.*, i, 1799, p. 412.

1800. BOUTTATZ, F. *Ueber den Phosphor als Arznei-Mittel.*

Göttingen, 8vo, pp. 116.

Bibl. Med. Soc. Lond.

Divided into five chapters. 1st. Historical notice of phosphorus. 2nd. Its medical history, containing a list of preceding writers, arranged in chronological order, with the views of each respective writer. 3rd. Results of the foregoing chapter, with directions how to use phosphorus in the most advantageous manner. 4th. The author's own experiments on birds and quadrupeds, made with the view of determining its effects and *modus operandi*. 5th. On its nature and medical use. The author arrives at the conclusion that phosphorus is an efficacious and powerful remedial agent, that is by no means to be considered as a specific remedy against any particular disease, but may be successfully used in most diseases attended with extreme debility, after all

other means have been tried in vain to rouse the depressed vital powers. He was the first to discover that the addition of camphor greatly lessens the inflammability of phosphorus and thereby qualifies it to be used as an external application.—*London Med. Review and Mag.*, vol. iv, 1800, p. 1—5.

 1875. KIRBY, —. On the uses and administration of Phosphorus. (Pamphlet.) London.

Dr. Kirby regards phosphorus as a medicine especially calculated to supply or restore that principle to the system, and he specifies the cases in which its use is indicated. He maintains that its successful employment depends entirely on its administration in the free state, that is, before its conversion into phosphoric acid or other phosphorous compound. He therefore recommends its use in the form of pills, which he calls *Pilula Phosphori Mollis*, to distinguish it from the *Pilula Phosphori B. Ph.*, which is hard and insoluble.—*Brit. and For. Med.-Chir. Rev.*, October, 1875, p. 453.

PHYSOSTIGMA VENENOSUM, Balfour.

Calabar Bean plant.

1855. CHRISTISON, R. On the properties of the Ordeal Bean of
Old Calabar, Western Africa. (Ex. in *Edin. Monthly Journ. of
Med.*, March, 1855, p. 193.)

A highly interesting narrative, containing the earliest scientific account of the physiological effects of Calabar bean on the human organism as experienced by the author in some trials which he made with it on his own person.

1863. FRASER, T. R. *On the characters, actions, and therapeutic
uses of the Ordeal Bean of Calabar. Edin. 8vo, pp. 44.
Bibl. Coll. Phys. Edin.

Next to Professor Christison, we are mainly indebted to Dr. Fraser for the introduction of physostigma into practice. He has extended and fertilised the first researches of Christison, and this thesis is a complete repertory of information on the subject. As a therapeutic agent he attributes to it a capacity of allaying morbid excitation of the spinal system, which indicates its use in tetanus and all hyperæsthetic conditions of the cord; a sedative

action on the heart which is of value in erysipelas, delirium tremens, febricula, acute bronchitis, and rheumatic fever; local anodyne properties in neuralgia; and the power of destroying the parasites of the skin.—*Lancet*, November 21st, 1863, p. 598.

1863. WARLOMONT, E. La Fève de Calabar, ses propriétés physiologiques et ses applications à la thérapeutique oculaire. (Ex. *Ann. d'Oculistique*.) Bruxelles, 8vo, pp. 32.

1863. HARLEY, G. An account of the literary history, botanical characters, and therapeutical properties of the Ordeal Bean of Old Calabar. London, 12mo, pp. 16.

An interesting *résumé* of known facts, of which the author has proved the accuracy by personal experiment. He concludes that the action of the Calabar bean on the heart is not that of a cardiac poison as circulation continues after apparent death from its action, and that it paralyses the motor and not the sensory nerves.—*Lancet*, November 21st, 1863, p. 598.

1863. ROBERTSON, D. ARGYLL. The Calabar Bean as a new agent in ophthalmic medicine. Edin. 8vo.

1864. NUNNELEY, T. On the Calabar Bean, its action, preparations and uses. London, 8vo, pp. 38. *Bibl. Linn. Soc.*

Treats of, 1st, the internal effects of the bean given alone or in combination with strychnia. 2nd. The best solvent of its active principle. 3rd. Its local effect on the eye and the most convenient form for its use in practice. The whole subject is well summed up in this memoir.—*Medical Times and Gaz.*, January 9th, 1864, p. 50.

1864. TACHAU, J. Ueber die Wirkung des Calabarbohnen-Extractes. Zurich, 8vo. *Bibl. Manchester Med. Soc.*

1867. TEICH, —. *Chemische Untersuchung der Calabarbohne. St. Petersburg.

Some of the results obtained by Teich are detailed by Flückiger and Hanbury in *Pharmacographia*, p. 169.

1867. FRASER, T. R. On the physiological action of the Calabar Bean. (Reprint from *Trans. of Royal Society of Edinburgh*.) Edin. 4to, pp. 74.

A remarkable paper. Dr. Fraser has here collected all that has been said as to the effects of the physostigma, and has added largely to our information by an extensive series of well-directed inquiries tending to elucidate the action of the substance on every part of the system whether administered by the stomach, hypodermically, or directly applied. The paper may stand as a model for such inquiries.—*Medical Times and Gaz.* April 25th, 1868.

1867. WATSON, EBEN. On the physiological action of the Ordeal Bean of Calabar, and its antagonism to Tetanus and Strychnia-poisoning. (Ex in *Edin. Med. Journ.*, May, 1867, p. 999.)

Contains much that is interesting alike to the physiologist and therapist.

1868. ROEBER, H. *Ueber die Wirkungen des Calabar-extractes auf Herz und Rückenmark. Berlin, 8vo.

Presents in a concentrated form every fact and opinion of the slightest importance with regard to the action of Calabar bean which has been put forward by other observers. It contains also a record of a long series of the most painstaking and careful researches by the author in which he tests the correctness of previous theories upon every point concerning the action of the drug, especially on the heart and spinal cord. For an abstract of his conclusions, which confirm the statements of Professor Fraser, see *Practitioner*, August, 1869, pp. 117, 118.

1868. BOURNEVILLE, —. De l'emploi de la Fève de Calabar dans le traitement du Tétanos. Paris, 8vo, pp. 16.

1870. LEVEN et LABORDE. *Vide* "Eserine," 1870.

1871. FRANZOLINI, F. Tetano traumatico curato senza successo colla Fava del Calabar e col Cloralio. Padova, 8vo, pp. 24.

1872. FRASER, T. R. Experimental research on the antagonism between the actions of Physostigma and Atropia. (*Ex. Trans. Royal Soc. of Edinburgh*, vol. xxvi.) Edin. 4to.

A valuable addition to pharmacological literature. The author commenced his researches between the lethal actions of physostigma and atropia in 1868, and the experimental data and views embodied in this work harmonise with what Kleinwachter and Bourneville had previously written. The experiments were chiefly performed on rabbits by subcutaneous injection. The general conclusions arrived at from the results of 161 experiments are that atropia prevents the fatal effects of a dose of physostigma by influencing the functions of certain structures, and producing a physiological antagonism. The work is illustrated by careful diagrams, and altogether it exhibits patient honest toil, with considerable literary skill.—*Lancet*, June 1st, 1872, p. 760.

Tar.

1679. AXTIUS, J. C. De Arboribus Coniferis et Pice comficienda.
Vide "Pinus," 1679. Jenæ, 12mo.
1714. ROBERG, L. *De Piceæ Pinique sylvestris resina. *Vide*
Pinus, 1714. Upsaliæ, 4to.
1744. BERKELEY, G. (*Bishop of Cloyne*). Siris: a chain of philosophical Reflections and Inquiries respecting the virtues of Tar Water, &c. London, 8vo. French transl. Amsterdam, 1745, 12mo. Dutch transl. Amsterdam, 1747, 8vo. German transl. Leipzig, 1747, 8vo, and Frankfort, 1749, 8vo. Swedish transl. Stockholm, 1744, 8vo.
Bibl. Med.-Chir. Soc. ; Acad. Edin. ; Coll. Surg. Lond.
- Without detracting from the merits of this good man, to whom the poet ascribed "every virtue under heaven," it is certainly open to question how far he displayed his wisdom in publishing this work on tar water, which he lauds as a *panacea*, curative of almost all the ills which flesh is heir to, and preventive of infection, and the inroads of old age! Few works of the kind, perhaps, ever excited greater attention, both in and out of the profession, at the time of its publication, and it gave rise to a large number of pamphlets (besides those enumerated below), many of which are preserved in the libraries of the Royal Medical and Chirurgical Society and the College of Surgeons, London.
1744. JACKSON, H. Reflexions concerning the virtues of Tar Water. London, 8vo. *Bibl. Med.-Chir. Soc.*
1744. R[EEVE], T. Cure for the epidemical madness of drinking Tar Water. London, 8vo. *Bibl. Med.-Chir. Soc.*
1745. HALES, S. Account of some experiments and observations on Tar Water. London, 8vo. Second ed. with a letter from A. Reid on Tar. London, 1747, 8vo. *Bibl. Med.-Chir. Soc.*
1745. QUELMALZ, S. T. Programma quo infusum Picis liquidæ aquosum declaratur. Lipsiæ, 4to.

1757. FLEHEL, G. De infuso Picis liquidæ. Viennæ, 4to.

1817. CRICHTON, Sir A. Account of some experiments made with the vapour of Boiling Tar in the cure of Pulmonary Consumption. Edin. 8vo.
1818. LAZZARETTO, E. Practical hints on the nature and cure of Consumption, with cases in proof of the beneficial effects of inhaling the Fumes of Pitch as a powerful auxiliary to other treatment. Loc?
1823. CRICHTON, Sir A. Observations on the treatment and cure of several varieties of Pulmonary Consumption, and on the effects of the vapour of Boiling Tar in that disease. London, 8vo, pp. 261. *Bibl. Coll. Phys. Edin.*

This is an extension of the pamphlet published by the same author in 1817 (*antè*). In this work he does not confine himself strictly to an examination of the sanative powers of tar vapour and its application in the cure of consumption, but enters into details on many points connected with the pathology of the disease...The work is not entitled to much praise either for novelty of information or excellence in matter or performance.—*Edin. Med. Surg. Journ.*, January, 1824, p. 205.

PLOCARIA CANDIDA, Nus.

Ceylon Moss.

1840. SIGMOND, G., et FARRE, F. Essay on the Ceylon Moss
(*Sphaerococcus lichenoides*, Kütz.) London, 12mo, pp. 85.
Under the name of *Fucus amylaceus* Sir W. Brooke (O'Shaughnessy), in
1834, first called attention in recent times, to the dietetic and medicinal uses
of Ceylon moss. *Vide Indian Journ. of Med. Science*, March, 1834. A summary
of his observations he reproduced in his *Bengal Dispensary*, p. 668 *et seq.*
For a coup d'œil of the observations of Sigmond and Farre, of Mr. Previtè
(who introduced it into England about the year 1837), and of others, see
Pereira's Mat. Med., vol. ii, pt. i, p. 13, where will be found a very full
account of the article.

PLOCARIA HELMINTHOCORTON, Endl.

Corsican Moss.

1778. STEFENOPOLI, D. Mémoire sur le Lemithochorton, reconnu
comme Vermifuge spécifique dans les hôpitaux militaires, et
par les observations des médecins de France. Loc? 4to, pp. 24.
1780. SCHWENDIMANN, P. J. Helminthochorti historia, natura,
atque vires. Argentorati, 4to, pp. 40. Idem in *Schlegel's Thes.*
Mat. Med., iii, art. 33, p. 181.
Bibl. Banks; Med.-Chir. Soc. (Schlegel).
Contains a full description of apparently all that was known up to that
time of the botanical, chemical, and medical history of this article. Several
cases are given to illustrate its powers and virtues as an anthelmintic, in
which character it is pronounced to act "citissime, jucundissime et tutissime."
1782. LATOURRETTE, M. A. L. C. DE, Diss. botanique sur le Fucus
helminthochorton ou Vermifuge de Corse. (Ex. in *Journ. de*
Physique, t. xx, pp. 168-184. *Bibl. Banks.*
1792. HAEMMERLEN, D. A. *De Fuco helminthochorto. Erlangæ,
8vo, pp. 53, tab. i. (Idem in *Schlegel, Thes. Mat. Med.*, iii, art. 34,
pp. 208.) *Bibl. Banks; Med.-Chir. Soc.* (Schlegel).
Contains later and further information on the botany and chemistry of
this article than is to be found in Schwendimann's essay, together with
additional evidence of its vermifuge powers.

1822. FARR, W. On the effects of *Fucus helminthochorton* upon
Cancer, more especially in the stage denominated Occult.

Mr. O'Meara having mentioned to Mr. Farr that Napoleon (!) had in-
formed him that he had seen the efficacy of "Mosse de Corse" in dispersing
tumours in Corsica, acted on the hint, obtained a supply, and found that

it "more than answered the expectations he had first formed of it"! A very doubtful form of testimony! Farr limits its use to "occult cancer." Even in these doubtful cases it is now justly discarded. See notice in *Med. Chir. Review*, March, 1822, p. 732.

1852. **ALDERSON, Sir J.** On the effects of Lead upon the system, and on the mode in which water is rendered impure by the presence of Lead (Lumleian Lectures). London, 4to.
Bibl. Med.-Chir. Soc.
 These lectures, three in number, are devoted to a general description of the chronic effects of lead, and to an account of the best means of remedying them.... The author furnishes an admirable summary of all that is known on the subject.—*Brit. and For. Med.-Chir. Rev.*, April, 1853, p. 315.
1855. **GUÉRAUD, D.** *Du Sous-acétate de Plomb en injections intestinales, dans la Diarrhée et la Dysenterie. Paris, 4to, pp. 25.
1856. **CORSON, J. W.** On the effects of Lead on the Heart. New York, 8vo, pp. 24.
 This pamphlet constitutes a carefully written though not altogether novel addition to our knowledge of the effects of lead on the system. Attention is particularly directed to the enfeebling action of this mineral on the heart and muscular system.—*Dublin Quart. Journ. Med. Sci.*, xxi, 1856, p. 410.
1861. **PLAGNOL, C.** *Étude des effets du Plomb et de ses composés dans l'économie animale. Montpellier, 4to, pp. 92.
1866. **IMFIELD, C.** *Über die Anwendung des Plumbum aceticum in Rheumatismus acutus. Stans, 8vo.

PLUMBUM.

Injurious and Poisonous effects of.

1656. STOCKHAUSEN, S. De Lithargyri fumo noxio morbifico ejusque metallico frequentiori morbo vulgo dicto die Huttenkaze oder Huttenrauch. Gozlar, 8vo. French transl. Paris? 1776, 12mo.
- One of the earliest writers who described colica pictonum, and pointed out its connection with lead poisoning. Haller (*Bibl. Med. Pract.*, iii, p. 52) thus summarises his observations:—"Novum morbum describit; primum quidem a plumbo natum, cum immenso alvi dolore, eaque pertinacissime obstructa, cum cardialgia, syncope, inflammatione intestinorum, urinæ suppressione, deinde cum membrorum paralysi et convulsione et universi corporis atrophia...Malum non ab arsenico esse, neque ab antimonio, a sulfure, a cadmia, a vitriolo, sed ab ipso lithargyrio...Ad curationem *Benedictum* laxativam sæpe non posse alvi stricturam superare. Clysterum necessitas. Emetica in morbi principio, deinde scammonium, jalappa, anodyna, emollientia."
1712. STOCKHAUSEN, P. W. *De Colica Saturnina. Jenæ, 4to.
Bibl. Med. Soc. Lond.
1721. WEDEL, G. W. *Æger Colica Saturnina laborans. Jenæ, 4to.
- Opium valde noxium esse.—*Haller, op. cit.*, vol. iii, p. 210.
1752. GRASHUIS, J. Tentamen de Colica Pictonum. Amst. 8vo.
Bibl. Acad. Edin.; *Manchester Med. Soc.*
- Grashuis was the first to point out the value of alum as a remedy in lead colic.
1757. TRONCHIN, T. De Colica Pictonum. Geneva, 8vo.
Bibl. Med.-Chir. Soc.
- In this work Tronchin proved that the occurrence of lead colic at Amsterdam was due to the employment of lead instead of tiles for the roofing of houses, in consequence of which the water became impregnated with the metal, and acquired poisonous properties.—*Brit. and For. Med.-Chir. Rev.*, April, 1853, p. 314. An "Examen" of this work was published by M. P. Bouvaert, Paris, 8vo, 1758.
1774. PERCIVAL, T. Observations and Experiments on the poison of Lead. London, 12mo. *Bibl. Med.-Chir. Soc.*; *Acad. Edin.*
1777. NAVIER, P. T. Contre-poisons de l'Arсениc...et du Plomb. Paris, 2 vols. 8vo. *Bibl. Acad. Edin.*
- Navier proposed hepar sulphuris as an antidote in lead poisoning.

1835. GRISOLLE, A. Essai sur la Colique de Plomb. Paris, 4to, pp. 84.

This work does not contain a number of brilliant speculations, but what

is infinitely more valuable, old opinions disproved are substituted by the analysis of numerous and accurate facts, and some original propositions established in the same manner.—*Brit. and For. Med. Rev.*, January, 1838, p. 55.

1836. GRISOLLE, A. Recherches sur quelquesuns des accidents cérébraux produits par les préparations Saturnines. (Ex *Journ. Hebd. du Progrès*, &c., December, 1836). Paris, 8vo.

Contains much interesting matter relating to the action of lead on the nervous system. For a summary of his views see *Amer. Journ. Med. Sci.* xxi, 1837, p. 182-6.

1836. PAULY, Z. *De Morbo Saturnino. Berol. 8vo, pp. 45.

1839. TANQUEREL DES PLANCHES, L. Traité des Maladies de Plomb, ou Saturnines. Paris, 2 vols., 8vo, pp. 550, 334. English transl. by Dr. Dana, Lowell, U.S., 1848, 8vo. *Bibl. Med.-Chir. Soc.*

This treatise comprises separate dissertations upon the following subjects:—
1. Lead Colic ("Colique de Plomb ou Saturnine"). 2. Rheumatism or Neuralgia from Lead ("Arthralgie Saturnine"). 3. Paralysis from Lead ("Paralysie Saturnine"). 4. Loss of Sensation from Lead ("Anesthésie Saturnine"). 5. Delirium, Coma, &c., from Lead ("Encéphalopathie Saturnine"). These are preceded by a few remarks upon the effects produced on the system (e.g. the peculiar bluish tinge of the gums) by lead previous to the development of the more decided form of disease or saturnine diathesis, which the author terms "Intoxication Saturnine primitive." Vide *Brit. and For. Med. Rev.*, Oct., 1840, p. 427, where a full analysis of this valuable monograph will be found. See also *Edin. Med. Surg. Journ.*, vols. lxxvii, p. 153-199, and lxxix, p. 155-206.

1840. BURTON, H. On a remarkable effect upon the human gums produced by the absorption of Lead. (Ex. in *Med.-Chir. Trans.*, vol. xxiii, p. 63.) London, 8vo, pp. 63.

Dr. Burton was the first writer in Great Britain who pointed out and examined carefully the blue discoloration of the gums from the absorption of lead. The paper is a very instructive one.

1842. ORFILA, M. J. B. Mémoire sur l'absorption des sels de Plomb, &c. Paris, 8vo, pp. 20.

1844. MIALHE, H. Mémoire sur les émanations du Plomb et l'absorption des médicaments. Paris, 12mo.

1850. HARRISON, J. B. Remarks on the contamination of Water by the poison of Lead, and its effects on the Human Body. London, 12mo, pp. 32. Second ed. 1852, London, 8vo, pp. 196.

Contains an able and excellent, though concise description of the deleterious effects arising from the continued use of water holding the compounds of lead in solution or suspension.... It contains much information, useful not only to the physiologist and practitioner but to the medical jurist.—*Dublin Quart. Journ. Med. Sci.*, xv, 1853, p. 132.

1850. WESSEL, G. Diss. de Colica Saturnina. Berolini, 8vo, pp. 27.

1850. BRACHET, J. L. Traité pratique de la Colique de Plomb. Paris, 8vo, pp. 250. *Bibl. Med.-Chir. Soc.*

To this essay the Academy of Sciences of Toulouse awarded a prize

medal. It may be regarded as an amplification of a *brochure* on the same subject published by M. Brachet in 1824. He does not seem, in this essay, to have contributed anything which may be called *new* concerning it. Nearly half the book is devoted to the subject of treatment...the author, though employing a combination of remedies, looks to *alum* as his sheet-anelior; more than 150 patients have been successfully treated in this manner.—Analyt. review in *Brit. and For. Med.-Chir. Rev.*, January, 1851. p. 41.

Soude et de Potasse. Paris, 4to.

POTASSA FUSA.

Caustic Potash.

1822. BIRAGO, C. Compendio di Osservazioni Cliniche... sulla
Potassa Caustica applicata in diverse malattie di carattere linfatico.
Milano, 8vo, pp. 143.
1841. WADE, R. On the pathology and treatment of Stricture of
the Urethra, with cases. London, 8vo, pp. 149. Second ed. 1849,
8vo, pp. 247. Fourth ed. *ibid.* 1860, pp. 254.
- The principal object of this treatise is to set forth the superiority of
potassa fusa above all other articles of the same class in the treatment of
stricture. The work contains "much that is true, yet very far from new."
The "second edition, greatly enlarged," consists of the unsold copies of the
first edition, with a new title page, a newly printed preface, and ninety-eight
pages of new printing, if not altogether of new matter, tacked on at the
end.—*Brit. and For. Med.-Chir. Rev.*, April, 1850, p. 328.

et cliniques sur les Caustiques, Potasse et Chlorure de Zinc.
Paris, 8vo, pp. 52.

POTASSÆ LIQUOR.

1811. BRANDISH, J. Observations on the use of Caustic Alkali in
Scrophula and other chronic disorders. London, 8vo.
Bibl. Manchester Med. Soc.
1834. DODD, H. W. On the use of Liquor Potassæ and Liquor

Alkalinus in the treatment of Malignant Cholera. Durham, 8vo, pp. 32. Third ed. 1848.

Mr. Dodd, after the failure of other means, was led to the use of Liquor Potassæ, twenty drops with white of egg, with the view of neutralizing some supposed acidity of the primæ viæ. The Liquor Alkalinus is a mixture of 8 parts of Liquor Potassæ, 12 of Liquor Sodæ, and 4 of Spt. Lavand. Co. By the use of these, he states, "he never yet failed in checking the riev dejections and ejections of cholera"!—*Med.-Chir. Rev.*, April, 1835, 594.

1841. CAMPBELL, J. S. On Tuberculous Consumption...with an attempt to found its treatment on rational principles.

London, 8vo, pp. 404.

The rational treatment of consumption advocated in this work consists in the systematic employment of Liquor Potassæ.

POTASSÆ ACETAS.

Acetate of Potash.

1730. TEICHMEYER, G. F. *De Arcano Tartari vel Sale Essentiali Vini. Jenæ, 4to.

1733. JUNCKER, J. *De Arcano Tartari. Halæ, 4to.

- 1873 (?). MORTON, J. Clinical Surgical Report of Glasgow Infirmary, ending October 31st, 1872; with a Paper on Bromide of Potassium. Loc^o pp. 16.
The author calls attention to certain risks attending the use of bromide, and the cautions given respecting it are not without their value in these days, when the bromide may be ranked among the fashionable drugs, and when it is given frequently in large doses and very empirically.—*Brit. and For. Med.-Chir. Rev.*, April, 1874, p. 423.
1873. VALLIN, E. De l'emploi du Bromure de Potassium comme adjuvant dans le traitement des Fièvres Intermittentes. (Ex *Bull. de Thérap.*, November 30th, 1873). Paris, 8vo, pp. 19.
The author does not propose the bromide as a substitute for quinine in intermittent fevers generally, but he observes that in some cases where the latter fails the bromide appears to be beneficial as a subordinate agent, probably by its power of allaying spinal irritation. See, further, *Brit. and For. Med.-Chir. Rev.*, April, 1874, p. 521.

Bibl. Coll. Phys. Edin.; Med.-Chir. Soc. (Schlegel).
- Enters fully into the medical properties and uses of quassia Its virtues as a tonic, antiperiodic, and anthelmintic, are set forth, preceded by a short botanical history and some comparative experiments as to its powers as an antiseptic. The virtues of lichen islandicus, excepting as an antiseptic, are mentioned very cursorily. See also review in *Duncan's Med. Commentaries*, vi, 1779, p. 371.

1859. HONIGBERGER, J. M. Heilung der Indischen Brechruhr durch Einimpfung des Quassins. Wien, 8vo, pp. 96, tab. i.

Honigberger's theory is that cholera is of parasitic origin, and that by means of the inoculation of a strong tincture of quassia, the *fons et origo mali* might be destroyed, quassia exercising, as is well known, a very deleterious action on many of the lower forms of animal life. These views the author has further developed in his work entitled, *Cholera its Cause, and infallible Cure*, Calcutta, 1861, 8vo, pp. 26. Whilst serving in India, a bottle of his concentrated tincture was furnished me, with directions for use, but having no faith in it I never gave it a trial.

QUININE et CINCHONINE.

1812. GOMES, B. A. Ensaio sobre o Cinchonino, e sobre sua in-
fluencia em a virtude da Quina, e de outras Cascas. (Ex. *Collecção
das Mem. d'Acad. das Sciencias de Lisboa*, iii, p. 202). Lisboa, 4to.

In this memoir Gomes announced the discovery of the active principle of cinchona. The substance, however, which he named cinchonino was subsequently found by Pelletier and Caventou (1821) to consist of two distinct alkaloids, one of which they named quinine and the other cinchonine.

1873. KERNER, G. Ueber den Einfluss des kristallischen und des amorphen Chinins auf die weissen Blutzellen und den Eiterbildungsprocess. Frankfurt am Main, 8vo.

In this pamphlet Dr. Kerner supports, by many new and interesting facts, the important discovery of Dr. Binz (1868) that quinine is above all things a "Protoplasmagift," and that it is capable of restraining or annihilating the vital movements of white-blood cells and other amœboid bodies, a position which was attacked in a very able paper by Dr. Geltowsky in the pages of the *Practitioner*, June 1872, p. 321-335, and replied to by Dr. Binz in the September number of the same Journal, p. 141-147. For a comprehensive sketch of this controversy, and of Dr. Kerner's interesting pamphlet, see *Practitioner*, March, 1873, p. 169-171.

1875. BINZ, C. Das Chinin, nach den neuern pharmacologischen Arbeiten dargestellt. Berlin, 8vo, pp. 78.

A very interesting and exhaustive treatise on the therapeutics of quinine. The book contains also a record of some original and important experiments on the action of quinine in blood-poisoning and typhoid fever.—*Edin. Med. Journ.*, December, 1875, p. 541.

In this pamphlet Professor Binz furnishes a critical summary of the work done with reference to the action of quinine since 1867, when his previous work on the subject appeared (*vide* 1867). Eighty-two papers are enume-

rated, of which no fewer than twenty-seven are from the pen of the professor himself. Most of the evidence is in favour of the views he originally put forth; these are ably summarised by Dr. E. Buchanan Baxter in *London Med. Record*, February 10th, 1875, p. 82-3.

London, 8vo, pp. 171. American ed. Philadelphia, 1838, 8vo.
 We believe in the efficacy of the drugs in question, and we are not unthankful to the author, who has taken much pains to make them known, but we condemn most unreservedly the careless, hasty, and unphilosophical manner in which the investigation has been conducted, and the blind and headlong zeal which has done its utmost to ruin the cause it would recom-mend in the minds of all sober thinkers.—*British and For. Med. Rev.*, October, 1858, p. 500.

Bibl Banks; Linn. Soc.
 A good little thesis divided into thirteen sections, each dealing with rhubarb in a different point of view. Sect. iii contains a brief bibliography. Amongst its uses mention is made of the efficacy of rhubarb (especially when roasted) in the treatment of diarrhœa and dysentery. Although this thesis has been left in the place usually assigned to it, under the name of Linnæus, the respondent, S. Ziervogel, appears to have been the real author.

1764. CANVANE, P. Dissertation on the Oleum Palmæ Christi seu Oleum Ricini, or, as it is commonly called, Castor Oil, in which its history is illustrated, its virtues and properties explained, and its uses in bilious, calculous, and other disorders recommended.

Bath. 8vo, pp. 88, tab. i. Second ed. London, 8vo, 1769. Third ed. *ibid.* 1775. French transl. by M. Homart de la Chapelle. Paris, 8vo, 1779. *Bibl. Med. Chir.-Soc. ; Coll. Phys. Edin.*

To Dr. Canvane is due the credit of introducing castor oil into practice. Although he was inclined to over-estimate the powers of "this surprising medicine," endowing it with peculiar virtues in special cases, there can be no doubt that he rendered good service to the profession and the public by bringing to notice so safe and generally useful a purgative as castor oil. Amongst the maladies in which he lauds it, is colica pictonum, in which subsequent experience has fully confirmed its utility.

1862. MANTEGAZZA, P. *Sulla azione dello Zucchero e di alcune sostanze acide sui Denti. Pavia, 8vo.

This pamphlet contains the experiments of Professor Mantegazza (which always recommend themselves no less for the ingenuity and exactness they exhibit than for the interest which attaches to their subject-matter), under-

taken with the view of ascertaining the action of sugar upon the teeth. The main conclusion arrived at is, that weak, easily fermentable solutions of sugar act upon the dental structures in a destructive sense more rapidly than its stronger solutions, which being more concentrated are not equally liable to fermentative change. See *Brit. and For. Med.-Chir. Rev.*, October, 1863, p. 466.

1863. CAMERON, C. A. Sugar: its composition, properties, preparations, and adulteration, &c. Dublin, 8vo.

Contains a description of all varieties of sugar, its history from the earliest ages, its manufacture, adulterations, &c. It contains likewise portraits of the *Acarus sacchari*, which at one time attracted much attention in Dublin in connection with the sugar supplied to the South Dublin Union.—*Dublin Quart. Journ. Med. Sci.*, February, 1865, p. 196.

SENNE FOLIA.

Senna.

1534. CAMPEGIUS, S. *Vide* "Terebinthina," 1534.
1573. MIZAUD *latine* MIZALDUS, A. Opusculum de Sena, planta inter omnes quotquot sunt hominibus beneficentissima et saluberrima. Lutetiæ, 8vo. *Ibid.* 1574, et 1607.
Bibl. Coll. Surg. Lond.
- Exiguus libellus et compilativus. Coluteam a Senna separat.—*Haller, Bibl. Bot.*, i, p. 327.
1733. SENNER, J. C. *Diss. de Senna. Præs. J. J. Baier.
Altdorfii, 4to, pp. 24. *Bibl. Linn. Soc.; Banks.*
1774. SOLIVA, S. Diss. sobre el Sen de España.
Madrid, 8vo, pp. 44, tab. 1. *Bibl. Linn. Soc.; Banks.*
1808. NECTOUX, H. Voyage dans la haute Égypte, avec des observations sur les diverses espèces de Séné. Paris, folio, tab. col. 4.
Bibl. Coll. Surg. Lond.

1816. COLLADON, L. T. F. Histoire naturelle et médicale des Casses, et particulièrement de la Casse et des Sénécs employés en médecine.

Montpellier, 4to, pp. 140, tab. 20.

Bibl. Med.-Chir. Soc.; Linn. Soc.

The portion of this excellent work devoted to the consideration of Senna extends from p. 34 to p. 61. It bears evidence of much careful research, and the observations on the medical uses of this drug, and its comparative action in relation to other purgatives, contain much that is interesting.

1828. FÉE, A. L. A. Note sur les Sénécs, et notamment sur le Séné Moka.

Paris, 8vo, pp. 8, tab. 1.

1830. LOISELEUR-DESLONGCHAMPS. On indigenous substitutes for Senna. *Vide* "Ipecacuanha," 1830.

1856. TUNDERMANN, K. Meletemata de Sennæ foliis.

Dorpati, 8vo, pp. 30.

1857. MARTIUS, C. Versuch einer Monographie der Sennesblätter.

Leipzig, 8vo, pp. 159.

According to the elaborate researches of Carl Martius, a knowledge of senna cannot be traced earlier back than the time of the younger Serapion, who flourished in the 9th or 10th century, and it is in fact to the Arabian physicians that the introduction of the drug to Western Europe is due.—*Flückiger and Hanbury, Pharmacographia*, p. 191.

1858. BAUMBACH, N. Quædam de efficaci foliorum Sennæ substantia disquisitiones.

Dorpati, 8vo, pp. 24.

Paris, 8vo, pp. 11.

SERPENS.

The Serpent regarded medicinally.

1861. NEIDHARD, C. Sobre la eficacia del *Crotalus horridus* en Fiebre Amarilla. Traducida del Ingles al Castellano, por D. Antonio Bergnes de las Casas.

Barcelona, 4to, pp. 100.

1862. HASTINGS, J. An inquiry into the medicinal value of the Excreta of Reptiles in Phthisis and some other diseases.

London, 8vo, pp. 103.

The following passage (p. 6) will serve to show the character of the work and its author. "Although not wholly unprepared for some useful results, I must confess to a feeling of profound astonishment that these secrets of nature should have remained so long hidden from man, although they were at all times before his eyes, and always within his reach. My earliest trials were made with the excreta of the boa-constrictor, which I employed in the first instance dissolved simply in water. A gallon of water will not dissolve two grains, and yet, strange as the statement may appear, half a teaspoonful of this solution rubbed over the chest of a consumptive patient will give instantaneous relief to his breathing."!!! Should the reader require more therapeutic information of the same character, it may be obtained by consulting the pages of Dr. Hastings' book.

1872. FAYRER, Sir JOSEPH. *Thanatophidia of India.*

London, folio, pp. 156, tab. col. 31.

A splendidly illustrated work, valuable alike to the naturalist and the medical man in India, and reflecting the highest credit on the zeal, industry, and ability of the author. The portion of the work devoted to the effects and treatment of snake poison, the results of original experiment and observation, is peculiarly worthy of attention.

SERPENTARIÆ RADIX.

Serpentary Root, Virginian Snake Root.

1710. WEDEL, G. W. **De Serpentina Virginiana.* Resp. C. L. Goeckelius.

Jenæ, 4to, pp. 39.

Bibl. Banks.; Linn. Soc.; Coll. Phys. Edin. (sub nom. Goeckelius.)

Historia ex variis scriptoribus collecta, et vires medicæ.—Haller, Bibl. Bot., i, p. 559.

SIAMBRA CEDRON.

Cedron.

1854. PURPLE, S. S. *Observations on some of the remedial properties of Siambra Cedron, and on its employment in Intermitting Fevers.* (Ex. in *New York Journ. of Med.*, September, 1854).

New York, 8vo.

For a concise account of Dr. Purple's observations on Cedron and his conclusions, which are strongly in favour of its antiperiodic virtue, together with a summary of the observations of Lewy, Rayer, Bertin, Lélut, and others, on its properties and uses, see *Dunghison's New Remedies*, 7th ed., p. 742.

SIBURA.

Native Oil of Laurel.

1830. HANCOCK, J. *Remarks on the Sibura, or Native Oil of Laurel, its production, uses, &c.*

London, 8vo.

Bibl. Med.-Chir. Soc.

Dr. Hancock's first paper "On the native Oil of Laurel," a product of Spanish Guiana, was read at a meeting of the Medico-botanical Society of London, July 14th, 1826, and was printed in its 'Transactions' (p. 18). The author states that he had found it a valuable remedy in cases of nervous and rheumatic headaches, sprains, and bruises.

SIMARUBÆ CORTEX.

Simaruba, Mountain Damson.

1730. JUSSIEU, A. DE. **Ergo inveteratis Alvi fluxibus Simaruba?*

Paris, 4to.

There seems to be considerable confusion respecting the date of the publication. I have followed Haller, and Mérat and De Lens, in giving 1730, but Pritzel gives 1772, and others 1758. See also Fuméc, 1758, *infra*.

1738. DEGNER, J. H. *Historia medica de Dysenteria biliosa-contagiosa in qua simul Corticis Simarubæ et radicis Salab effectus exploratur.* Traject. ad Rhen. 8vo.

Bibl. Med.-Chir. Soc.

1746. CRELL, J. F. **De Cortice Simaruba.* Resp. auct. J. S. Leinker. Helmstadii, 4to, pp. 36.

Bibl. Linn. Soc.; Banks.

Nullus in aqua odor, neque oleum æthereum, et saporem esse mere amarificantem, &c. Vis medicata contra Soterium defenditur.—*Haller, Bibl. Bot.*, ii, p. 364.

1749. YSASI Y JASMUNDI, J. DE. De natura et proprietatibus Corticis Simarubæ. Madriti.
1758. FUMÉE, GUILL. *Ergo inveteratis Alvi fluxibus Simaruba? Paris, 4to.
Eadem dissertatio quam anno 1730 A. de Jussieu proposuerat. Nimis magna dosis vomitum movet, non ita semidrachma pulveris, qui tamen unica die et alvi fluxum sedat et dolores. Optimus cortex ad diuturnas diarrhœas.—*Haller, Bibl. Bot.*, ii, p. 476.

1826. COOKE, C. T. On the efficacy of White Mustard Seed in affections of the liver, internal organs, and nervous system. Second ed. Gloucester, 8vo, pp. 120. French transl. Paris, 8vo, 1830, 1860, &c. German transl. München, 8vo, 1828. Danish transl. by E. L. Thaarup, Copenhagen, 8vo, 1830. Italian transl. Parigi, 8vo, 1829. Swedish transl. Stockholm, 8vo, 1830.
Bibl. Manchester Med. Soc.
1826. COOKE, C. T. On the efficacy of White Mustard Seed, with a particular view to its recommendation as a means of augmenting the beneficial effects of the Cheltenham waters. Cheltenham, 8vo, pp. 87.

About this period (1826) there was a fashionable mania for mustard seed

as a panacea in dyspepsia, liver complaints, nervous affections, &c. See an interesting article on it in the *Medico-Chirurgical Review*, April, 1827, p. 512, commenting on a pamphlet published on the subject "by a member of the College of Surgeons" (London, 1826, 8vo, pp. 31). Even then, however, the mania was beginning to subside in Great Britain, though it appears to have survived to a comparatively recent date in France.

The author's observations on the effects of salt given to a dog kept on a uniform meat diet led to the following results:—If the tissues are not already saturated with this substance, a certain quantity of it is retained in the organism; but if they are saturated, a greater quantity than that administered is discharged by the kidneys, which, in the dog, are the only excreting channels. 2. Salt increases the oxydation of the systemic albumen and the excretion of urea. 3. Even if drink be withheld, the urine becomes more abundant.—*Year Book of New Sydenham Society*, 1862, p. 48.

SOLANUM.

Species of, generally.

1757. BROMFIELD, W. Account of the English Nightshades and their effects, with observations on Corrosive Sublimate and Sarsaparilla. London, 12mo, pp. 94, tab. i. French transl. by his son, Paris, 1761, 12mo. *Bibl. Med.-Chir. Soc.*
1757. GATAKER, T. Observations on the internal use of the Solanum or Nightshade. London, 8vo, pp. 34. Reprinted in the author's *Medical Essays*, 1764. *Bibl. Med.-Chir. Soc.*
- Although cursory notice is given in this work to dulcamara (*Solanum Dulcamara*, *Linn.*) and deadly nightshade (*Atropa Belladonna*, *Linn.*), the remarks in the main apply to the common or garden nightshade (*Solanum nigrum*, *Linn.*) The author does not claim for it any specific virtues, but considers that it acts chiefly by promoting the secretions, especially those of the skin and kidneys. He details some cases of dropsy, &c., benefited by its use, but it is not always easy to distinguish to which species of solanum his remarks apply.
1813. DUNAL, M. F. Histoire naturelle, médicale et économique des Solanum. Paris et Montpellier, 4to, pp. 248, tab. 26.
- A very comprehensive monograph, containing a large amount of information, collected and original, on the properties and uses of various species of solanum, especially *S. tuberosum* (the potato), and *S. Dulcamara*. It concludes with a full botanical description of 235 plants belonging to this family.

1830. BARDSLEY, J. L. *Hospital Facts and Observations, illustrative of the efficacy of the new remedies—Strychnia, Brucia, Acetate of Morphia, Veratria, Iodine, &c., in several morbid conditions of the system; with a comparative view of the treatment of Chorea and some cases of Diabetes. A Report on the efficacy of Sulphureous Fumigations in Diseases of the Skin, Chronic Rheumatism, &c.* London, 8vo, pp. 223. *Bibl. Med.-Chir. Soc.*

The principal part of the volume is occupied by observations and cases illustrative of the medicinal properties of strychnia in paralysis, chronic diarrhoea, and amenorrhœa, of brucia in paralysis, and of acetate of morphia in some painful affections of the stomach, uterine disease, and neuralgia. The remainder contains experiments and observations on veratria and colchicum, and on the virtue of iodine in bronchocele. Every section of this work contains a great deal of information of a most purely practical nature.—*Edin. Med. Surg. Journal*, xxxiii, 1830, p. 417.

Glasgow, 12mo ?

Although this work contains analyses of recorded cases of poisoning and theories of the action of strychnia, it is chiefly made up of a narrative of what the author's own hands have done, and his own eyes have seen, consequently it is in the main pleasantly readable, and conveys its information with a *vraisemblance* which gives us confidence in its accuracy. It contains, however, many typographical errors, especially in foreign names.—*Glasgow Med. Journ.*, August, 1872, p. 543.

A tolerably complete exposition of some of the most recent views of the properties and action of strychnia, and although perhaps some physiologists might demur to the manner in which certain theories are advanced and deductions wrought out, there can be no doubt that Dr. Gray has written a careful essay, well deserving perusal.—*Lancet*, July 27th, 1872, p. 122.

1849. GROVE, J. On Sulphur as a remedy in Epidemic Cholera. London, 8vo, pp. 50. Second ed. 1854. *Bibl. Med.-Chir. Soc.*

The author looks upon cholera as the result of a specific poison, and he believes that sulphur is the specific remedy by which the poison may with certainty be eliminated from the blood. To this end he prescribed, with great alleged success, a mixture of sulphur and carbonate of soda, but as

ether and opium were employed at the same time, the question naturally presents itself how far they contributed to the favorable results.—*London Med. Gazette*, October 26th, 1849, p. 723.

1866. DEWAR, J. *On the application of Sulphurous Acid Gas to the prevention, limitation, and cure of Contagious Diseases.*
Edinburgh, 8vo, pp. 45. *Bibl. Med.-Chir. Soc.*

This pamphlet attracted at the time of its issue a great sensation, and rapidly went through several editions. "The statements of fact are of great and increasing interest."—*Lancet*, January 18th, 1868, p. 92.

The author has the highest opinion and hopes of the power of sulphurous acid gas to destroy the "fungi," to which it is the fashion of the day to attribute almost everything from cattle plague and consumption to chilblains and chapped hands! Passing over the author's remarks on the power of this gas in preventing the extension of the cattle plague, he states that it may be inhaled with great advantage by phthisical patients, and that it tends to cure or prevent diphtheria, ringworm, &c. There is a vagueness in Dr. Dewar's mode of writing which takes from its force.—*Lancet*, July 14th, 1866, p. 40.

1867. AGNOLESI, P. *Sul valore reale da concedersi al gaz Acido Sulfuroso come desinfettante.*
Firenze, 16mo, pp. 14.
1867. BLANC, L. **De l'action du Soufre et des sulfureux dans le traitement de la Syphilis.*
Paris, 4to, pp. 47.
1867. PAIRMAN, R. *The Great Sulphur Cure brought to the test, &c.*
Edin. 8vo, pp. 45.

A remarkable pamphlet were it only from the fact that in less than eight weeks it ran through eight editions—a fact almost unparalleled in the annals of medical literature! Its professed "mission" is to support and develop the statements of Dr. Dewar, of whom the author is an enthusiastic follower.—*Med. Times and Gaz.*, January 18th, 1868, p. 78.

ENSIS.

TABACUM. Tobacco.

NICOTIANA TABACUM. Linn.

1570. MONARDES, N. De Tabaco. (In Spanish.)
Pritzel states that he was unable to find the title of this work. A French
translation by J. Gohori was published in Paris in 1572, under the title of
"Instruction sur l'herbe Petum ditte en France l'herbe de la Royne ou
Medicée et sur la racine Mechiocan." 12mo, pp. 16, tab. i. English transl.
London, 1577, 4to. Alt. ed. cum versione Gallica Emilii Maeri. Rouen,
8vo, 1588. There are also two Italian translations: Genova, 1578, 8vo, and
Venezia, 12mo, *sine ann.* *Bibl. Bodleian* (Eng. transl.).
1583. EVERARTUS, ÆGIDIUS (*Anglice*, Giles Everard). De Herba
Panacea quam alii Tabacum alii Petum aut Nicotianam vocant,
brevis commentariolus. Quo admirandæ, ac prorsus divinæ
Peruanæ stirpis facultates et usus explicantur. Antwerpiaë,
12mo. Second ed. *ibid.* 1587. Third ed. Utrecht, 1644, 12mo,
pp. 58. English transl. under the title of "Panacea, or the Uni-
versal Medicine" (with portrait of author smoking a pipe).
London, 1659, 12mo. To the third edition are appended the Miso-
capnus of King James (1619), the Hymnus Tabaci of Thorius
(1622), and the Tabacologia of Neander (1622).
Bibl. Med.-Chir. Soc.; *Coll. Surg. Lond.* (Ed. 1587); *Radeliffe*
(Ed. 1644).
1595. (Anon.) A treatise describing the nature of Tabacco.
8vo. Printed by W. Barley. London, 1595.
1599. BUTTES, HENRY. Dyet's Dry Dinner, consisting of eight
several courses: 1, Fruites; 2, Hearbes; 3, Flesh; 4, Fish; 5,
Whitemeats; 6, Spice; 7, Sauce; 8, Tobacco. All served in after
the order of time universall. London, 8vo.
A curious work.—*Lowndes.*
1602. (Anon.) The Metamorphosis of Tabacco.
London, for John Flasket, 4to.
A poetical tract, A to Fi in fours, 21 leaves. See *Collier's Poetical De-
cameron*, i, p. 188-92.—*Lowndes.*
1602. J. H. Worke for Chimney Sweepers, or a Warning for
Tabacconists, describing the pernicious use of Tabacco.
London, 4to.
1602. (Anon.) A Defence of Tabacco, with a friendly Answer to
Worke for Chimney Sweepers. London, 4to.
1610. GARDINER, ED. Trial of Tobacco, expressing its vertues in
physic. London, 4to.
Bibl. Med. Soc. Lond.; *Manchester Med. Soc.*
The author asserts (fol. 25) that "the suffumigation of tobacco being
taken is a good medicine for the starknesse or stiffnesse of neck called

tetanus, and for any paines or aches of the bodie proceeding of the cause that tetanus doth." This is probably the first notice of the use of tobacco in tetanus. He likewise mentions the benefits derived from smoking in asthmatic and other affections of the lungs.

1611. (ANON.) *Perfuming of Tobacco, and the great abuse committed in it.* London, 4to.

1614. BARCLAY, W. *Nepentes, or the Vertues of Tobacco.* Edinburgh, 8vo, pp. 8. (Reprinted in the Spalding Club "Miscellany.")

The author praises tobacco as "this happie and holie herb," and strongly advocates its use, King James and the Pope to the contrary notwithstanding.—*Allibone.*

1614 (circa 1620? *Lowndes*). SYLVESTER, J. *Tobacco battered and Pipes shattered about their ears that idly idolize so base and barbarous a Weed, or at leastwise overlove so loathsome a vanitie, by a Volley of Holy Shot thundered from Mount Helicon.* London, 12mo, n. d. Reprinted with Sylvester's translation of Du Bartas. London, 1641, folio.

Some interesting particulars regarding Sylvester, together with specimens of his "holy shot," are given in *Lond. Med. Phys. Journ.*, xxiv (1810), pp. 354 and 458. "This quibbling doggrell," allowing for poetical exaggeration, shows the extent of the influence this plant had attained at that early period, and how devoted the majority of mankind was to its soothing properties."

1616. DEACON, J. *Tobacco tortured, or the filthie Fume of Tobacco refined.* London, 4to.

1616. MARRANDAN, B. *Del Tobago, los damnos que cause, y del Chocolate.* Sevilla, 8vo. French transl. by R. Moreau. Paris, 1643, 4to.

1616. ZIEGLER, J. *Tabak: von dem gar heilsamen Wundkraute Nicotiana.* Zurich, 4to.

Icon speciei majoris satis bona, tum usus varius, etiam adtracti ex fervente aqua vaporis, in qua Nicotiana et aliæ herbæ infusæ essent.—*Haller, Bibl. Bot.*, i, p. 420.

1617. BRATHWAITE, R. *Solemne Joviall Disputation... The Smoaking Age, or the Man in the Mist, with the Life and Death of Tobacco, &c.* Oenozythopolis, at the sign of Teare-Nose. 8vo.

Prefixed are two curious engraved titles by Marshall, with leaves explanatory. The late Mr. Bindley considered this work as one of the scarcest books in England, and the plates by Marshall are the earliest productions of that engraver.—*Lowndes.*

1619. JACOBUS I. (MAGNÆ BRITANNIÆ REX.). *Misocapnus, sive de abusu Tabacci lusus regius.* London, folio. Reprinted with third ed. of Everartus. Utrecht, 1644, p. 199-223. The English version under the title of "Counterblaste of Tobacco," was published in 1672, q. v.

1620. CASTRO, J. DE. *Historia de las virtudes y propiedades del Tabaco, &c.* Cordova, 8vo.

Treats of its external and internal use.—*Haller, Bibl. Med. Pract.*, ii, p. 492.

1621. VENNER, T. A Treatise concerning the taking of the Fume of Tobacco. London, 4to. Reprinted in the Appendix to his work, "Via recta ad Vitam longam." London, 1628, and subsequent editions; the earlier editions want the appendix concerning Tobacco. *Bibl. Med.-Chir. Soc.*

According to Venner, the immoderate use of tobacco "drieth the brain, dimneth the sight, vitiateth the smell, hurteth the stomach, destroyeth the concoction, disturbeth the humours and spirits, induceth a trembling of the limbs...scotcheth the heart, and causeth the blood to be adusted, &c...Wherefore the use of it is only tolerable by way of physic, not for pleasure or idle custom. "To conclude, therefore, I wish them that desire to have *mentem sanam in corpore sano* altogether to abandon *insanum præposterumque Tabaci usum.*"—*Via Recta ad Vitam Longam*, ed. 1638, p. 363.

1622. NEANDER, J. Tabacologia, hoc est Tabaci seu Nicotianæ descriptio medico-chirurgico-pharmaceutica et ejus preparatio et usus in omnibus corporis humani incommodis. Lugd. Bat. (typ. Elzevir), 4to, pp. 256, and tab. i. Ed. alt. *ibid.* 1624-28. An abridged account in the third ed. of Everartus, *q. v.* French transl. by J. V. Lyon, 1625, 8vo, pp. 342, tab. 8.

Bibl. Med.-Chir. Soc.; Linn. Soc. (French transl.); *Coll. Phys. Edin.; Acad. Edin.*

Infinitam vim medicamentorum recenset, quæ ex Nicotiana ad omnes pene morbos parantur.—*Haller, Bibl. Med. Pract.*, ii, p. 507.

1622. THORIUS, R. Hymnus Tabaci. Lugd. Bat. 4to (probably editio princeps). *Ibid.* 1623, 4to. *Ibid.* 1628, 12mo (typ. Elzevir). Reprinted with the third edition of Everartus, *q. v.* Ultrajecti, 1644. English transl. by Peter Hausted. London, 1651, 8vo. *Bibl. Med.-Chir. Soc.*

With the classical elegance of style which he cultivated *con amore*, Thorius joined a devotion to wine and tobacco, the virtues of the latter of which he here celebrates in Virgilian numbers. Some curious information regarding him, together with extracts from his "Hymn," will be found in *Lond. Med. Phys. Journ.*, xxiv (1810), p. 453-5.

Pulvis sternutatorius ejusque bonus usus. Masticatio, quæ vi polleat apophlegmatizante. Composita ex tabaco medicamenta. In hydrope decoctum aquam copiose traxisse, ut usum noster interrumpere cogeretur. Arthritidem levare. Multa iterum Neandri censura.—*Haller, Bibl. Med. Pract.*, iii, p. 2.

Magnenus, in his section "Morbi particulares externi quibus Tabacum subvenit," enumerates ulcers, gangrene, hæmorrhoids, hernias, scrofulous and other tumours, poisoned bites and wounds, pediculi, skin diseases, and wounds, as benefited by its use. He speaks also of the value of the oil of tobacco rubbed into the neck and spine in tetanus, and furnishes a curious formula for a tobacco enema.—*London Med. Phys. Journ.*, xxv, 1811, p. 224.

1669. STELLA, B. Il Tabacco, &c. Roma, 8vo, pp. 480.

From a short abstract of contents given by Haller, *Bibl. Bot.*, i, p. 545, this work appears to be very comprehensive, discussing the origin, history, culture, preparation, nature, and virtues of tobacco, whether used for smoking, snuffing, &c., or for medicinal purposes. With regard to the last, Haller observes, "Electuarium Nicotianæ ad varia prodesse. Succum ad scrophulas. Calculum se de urethra expulisse fomento, in quo Tabacum cum aqua et vino coctum erat. Multa contra Magnenum."

1672. JAMES THE FIRST (KING of ENGLAND). Counterblaste of Tobacco, to which is added a Discourse by Dr. Everard Maynwaring, proving that Tobacco is a procuring cause of Scurvy. London, 4to. Translated from his *Misocapnus*, published first in 1619, q. v.

The sum and substance of this well-known "Counter-blaste" is set forth in the following passage:—"Have you not reason, then, to be ashamed," exclaims the royal author, addressing his subjects, "and to forbear this filthy novelty, so basely grounded, so foolishly received, and so greatly mistaken in the right use thereof? In the abuse thereof sinning against God, harming yourselves both in persons and goods, and taking also thereby the marks and notes of vanity upon you; by custom thereof making yourselves to be wondered at by all foreign civil nations, and by all strangers that come among you, to be scorned and contemned: a custom loathsome to the eye, hateful to the nose, harmful to the brain, dangerous to the lungs, and in the black stinking fume thereof, nearest resembling the horrible Stygian pit that is bottomless!"

1785. FOWLER, T. Medical Reports on the effects of Tobacco, principally with regard to its diuretic quality in cases of Dropsies and Dysenteries, with some observations on the use of glysters of Tobacco in the treatment of Colic. London, 8vo. Alt. ed. 1788.
Bibl. Med.-Chir. Soc.; Coll. Phys. Edin. (ed. 1788).
Dr. Fowler mentions thirty-one cases of dropsy, eighteen of dysuria, and

several of colic, treated by infusion of tobacco, with, in the majority of cases, considerable success. From extensive observations he concludes that tobacco is very generally diuretic, thus proving an efficacious remedy in dropsy, that it is anodyne and frequently laxative, and thus proves useful in many painful cases where costiveness may render opiates objectionable, that it is of great service in cases of dysuria by relieving pain and promoting diuresis, and that it is a most powerful remedy, in the form of enema, in obstinate cases of colic (*Duncan's Med. Commentaries*, x, 1786, p. 131). The dangers attending its use were not appreciated by Dr. Fowler; it is these, and the uncertainty attending its operation, which have caused it to fall into disrepute.

London, 8vo.

A scientific work, treating not so much of the physiological effects of tobacco as its physical characters, signs of purity, &c. In chap. vii, which treats of "Tobacco and some other Leaves," the ordinary and microscopic characters of the tobacco leaf, and of such leaves as are constantly used in its adulteration, as those of burdock, dock, chicory, comfrey, and Jerusalem artichoke, are clearly described and beautifully illustrated, the ten plates with which the volume terminates being by no means the least valuable portion of it. On the whole, the work contains much valuable matter put together in a very pleasant, readable form.—*Medical Times and Gaz.*, Sept. 17th, 1870, p. 349.

TARAXACUM DENS LEONIS, Desf.

Taraxacum, Dandelion.

1754. DELIUS, H. F. *De Taraxaco, præsertim aquæ ejusdem per fermentationem paratæ eximio usu. Resp. F. J. W. Schroeder. Erlangæ, 4to, pp. 28. (*Ibid. in Baldinger Syllog.*, v, p. 219.)
Bibl. Banks; Med.-Chir. Soc. (Baldinger.)

To a full botanical description of the plant various experiments are added, with the view of determining the most effectual mode of obtaining its medicinal virtues, and the verdict is in favour of a vinous distilled water obtained by submitting first to fermentation and then to distillation equal parts of the fresh bruised plant and the best Frankfort wine. The author reports highly of its efficacy in asthmatic and dropsical affections. See *Duncan's Med. Commentaries*, viii, 1783, p. 35.

1833. MENKE, C. T. De nova morbos chronicos ope pastus Taraxacini curandi ratione. Pyrmonti, 4to, pp. 13.
 Callisen gives this author's name as Menke in one place and Henke in another; the former is probably correct.
1869. BENNETT, J. H. Researches into the action of Mercury, Podophylline, and Taraxacum, on the Biliary secretion. Edin. 8vo.
 Adverse to the claim of taraxacum as a cholagogue. See "Hydrargyrum," 1869.

- Mérat and De Lens, from whose work this title is extracted, give by mistake the year 1740, instead of 1640, as the date of Ranchin's "Opuscules."
1679. YONGE, J. *Currus Triumphalis e Terebintho*, or Account of the many admirable vertues of *Oleum Terebinthinæ*, &c. London, 8vo, pp. 120.

Bibl. Med.-Chir. Soc. ; Coll. Surg. Lond. ; Coll. Phys. Edin.

In this work the author, after taking an extensive and minute view of the means in use in his day for suppressing hæmorrhage from wounds, narrates seven experiments made with oil of turpentine, by which he thinks that he proves that the powers of this agent in stopping bleeding from wounds are greater and more certain than those by any other method. These experiments would not, in the present day, be regarded as very conclusive. The first three show that oil of turpentine, if heated, is liable to be converted into firm, tough, adherent varnish, which he infers must therefore, close shut up, and contract the mouths of the vessels. It is manifest that, as he used this agent hot, evaporation of the volatile portion took place, and then the resinous part formed the varnish. For the circumstances which led to the publication of this work, and extended notice of it, together with an interesting biographical sketch of the author, who was evidently an original genius and an intelligent surgeon, see *Edin. Med. Surg. Journal.*, April, 1849, vol. lxxi. p. 414 and p. 943.

Traject. ad Rhen. 8vo, pp. 52. *Bibl. Roy.*
Contains a chronological list of authors who have written on tea.
1826. SASSENUS, J. B. *De l'excellence du Thé, et de ses vertus
étonnantes dans la médecine.* Anvers, 8vo.
1827. NEWNHAM, W. *Observations on the medicinal and dietetic
properties of Green Tea, and particularly on the controuling in-
fluence it exerts over Irritation of the Brain.*
London, 8vo, pp. 32.
The author concludes that green tea acts as a direct sedative in headaches

arising from sthenic excitement of the brain, *e. g.* those produced by over-stimulation by the use of alcoholic drinks, or from intense mental exertion or literary research. Under such circumstances, he states that it "calms the nervous system, invigorates the animal frame, refreshes jaded spirits, clears the ideas, brightens the faculties," and recruits the flagging energies of the brain! Such is the author's picture; for the reverse, see *Med.-Chir. Rev.*, July, 1827, p. 143, 4.

1827. MILLESLEY, S. Sur l'usage du Thé, d'après les auteurs les plus anciens et les plus renommés. Paris, 8vo, pp. 36. 2me éd. *ibid.* 1830.

1830. KIHLMANN, J. H. Chinesika Théet. Stockholm, 8vo, pp. 30.

1839. SIGMOND, G. G. Tea; its effects, medicinal and moral. London, 8vo, pp. 144.

Dr. Sigmond's book has entirely disappointed us. Its title is attractive, its contents the reverse. We eagerly sought for information, and, except in its extracts from other works, we found scarcely any. We were prepared for good Souchong or Pekoe, and all that was offered us was exceedingly weak Bohea. As in duty bound we drank the Bohea, but really cannot recommend to our readers a similar draught. There was scarcely a lump of sugar in the cup!—*Brit. and For. Med. Rev.*, Jan., 1839, p. 242.

1843. HOUSSAYE, J. G. Monographie du Thé, description botanique, torréfaction, composition chimique, propriétés hygiéniques, &c. Paris, 8vo, pp. 160, fig. 18. German transl. Leipzig and Quedlinburg, 1844, 8vo, pp. 111, tab. 5.

1874. WANKLYN, J. A. A Practical Treatise on the analysis of Tea, Coffee, and Cocoa. London, 8vo, pp. 59.

The author acknowledges in his preface that he has done little more than collect the materials which had been accumulated by the numerous chemists who have examined tea, coffee, and cocoa. His own additions to our knowledge are very small, and from imperfect acquaintance with the chemical literature of food analysis, he too often claims as original, methods and facts long previously known.—*Brit. and For. Med.-Chir. Rev.*, Oct., 1875, p. 408.

Ultraject. 1835, 8vo. *Bibl. Med.-Chir. Soc.*

This treatise consists of an introduction detailing the properties and mode of applying veratria, followed by six chapters, each devoted to a consideration of its effects in a distinct disease or class of diseases, thus—1. Affections of the Heart. 2. Neuralgic Affections. 3. Rheumatism. 4. Paralysis. 5.

Dropsy. 6. Gout, Amaurosis, and Syphilitic Nodes. After a full consideration of all he has stated in these chapters, our impression is that the beneficial effects of veratria have been considerably exaggerated; he gives only a partial view of the subject. Has the author ever met with cases in which veratria failed to perform the miracles attributed to it? If so, why are the unsuccessful cases not detailed? He appears also to have overlooked the effects which the previous or concomitant treatment, as well as simple friction, and the action of veratria as a rubefacient, may have had upon the system.—*Edin. Med. Surg. Journ.*, xlii, 1834, p. 155—167.

1835. SCUDAMORE, Sir C. On Gout...with observations on the use of Veratria in that disease. London, 8vo. *Bibl. Med.-Chir. Soc.*

VERATRUM VIRIDE, Linn.

American Hellebore.

1856. NORWOOD, W. C. The therapeutical powers and properties of *Veratrum viride*. New York, 8vo. Second ed.
1862. CUTTER, E. *Veratrum viride* as a therapeutic agent. Cambridge, U.S., 12mo. French transl. Paris, 8vo, pp. 16, tab. i.
Bibl. Med.-Chir. Soc.

Dr. Ephraim Cutter was one of the first, if not the first, to introduce *Veratrum viride* into practice. The present monograph is complete in its references to the literature which in the course of the preceding five years has accumulated round this drug.—*Lancet*, July 22nd, 1862, p. 93.

1864. PERCY, S. R. An Inquiry into the physiological and medicinal properties of *Veratrum viride*; together with some physiological and chemical observations upon the alkaloid *Veratria*. Philadelphia, 8vo, pp. 87.

An interesting monograph, to which the New York Academy of Medicine awarded a gold medal. After considering the botanical and chemical history of *Veratrum viride*, the author proceeds to describe his experiments upon animals, which are extremely interesting, and appear to have been very carefully performed. See analytical review in *Glasgow Med. Journ.*, Jan., 1865, p. 461-8.

1866. KOCHER, T. Behandlung der croupösen Pneumonie mit *Veratrum-Präparaten*. Würzburg, 8vo, pp. 96.

In this work the treatment of anaplastic pneumonia by *Veratrum* is very ably defended and its superiority strongly urged, the observations being based on sixty cases treated by it at the hospital at Berne. It is not set forth as a specific, but as an important and valuable remedy in the rational treatment of the disease.—*Amer. Journ. Med. Sci.*, July, 1867, p. 236.

1868. NORWOOD, W. C. The authorship and therapeutical powers of *Veratrum viride* more fully examined. Albany, 8vo.
1869. DULMONT, —. Du *Veratrum viride* et de son action physiologique et thérapeutique. Part i. Paris, 8vo, pp. 21.
1869. AMORY, R., et WEBBER, S. G. A contribution to the physiological study of *Veratrum viride* and *Veratria*. Reprint from *Boston Med. Surg. Journal*. Boston, U.S. 8vo.

Contains a record of some interesting researches, a short abstract of which, with comments, is given in *Practitioner*, Feb., 1870, p. 110.

1875. WOOD, H. C., et BERENS, J. An Investigation into the action of *Veratrum viride* upon the circulation. Reprint from *Philadelphia Med. Times*.

An elaborate and valuable paper, containing an accurate account of many experiments upon animals with the two alkaloids of *Veratrum viride*, viz. *veratroidia* and *viridia*, the former being the *sabadilla* and the latter the *jervia* of preceding writers, the two in combination constituting the complex

principle formerly known under the name of veratria. With each of these alkaloids Dr. Wood investigated their action on the circulation, on the heart and its nerves, and on the vaso-motor system. See further, *Edin. Med. Journ.*, March, 1875, p. 832.

An invaluable work, still the classical authority with all who know it. The easy taste of its style, the beauty and number of its illustrations, the accuracy and good selection of its quotations, not to mention its convenient type and division, must render it an universal favourite. Its chemistry, though rarely wrong, is, of course, not that of the present day.—*Brit. and For. Med.-Chir. Rev.*, April, 1858, p. 298.

English transl. by Dr. H. Bence Jones. London, 1857, 8vo, pp.
390.

"We found it impossible to use Dr. Bence Jones's translation of Mulder, on account of the numerous blunders, not only in proper names but in numbers;" e.g. Professor Mulder calls the French writer Batilliat (*antè*) Batillat, and having thus lost an *i* in the hands of the Dutch, he has his *t* turned into a *c* by Dr. Bence Jones, reappearing as Batillac. But his fate is nothing to that of Mr. Hitchcock, whom Dr. Jones calls "Hitschok," and then, when the indignant reader tries to set matters right by verifying the quotation, he is told to look into a periodical of the yet distant date of 1884! —*Brit. and For. Med.-Chir. Rev.*, April, 1858.

de l'hygiène et de la médecine légale. Lyon, 8vo, pp. 15.
1858. LABAT-ABBADIE, H. Remarques sur les avantages du Vin de
Malaga pour la préparation du Vin de Quinquina.
Paris, 8vo, pp. 7.
1865. DRUITT, R. Report on the Cheap Wines of France, Italy,
Austria, Greece, and Hungary. London, 8vo, pp. 179. Second
ed. re-written, and enlarged. London, 1872, pp. 180.

Contains information of great interest, and written in a very pleasing manner, but on too limited a scale, considering the importance of the subject. The author dwells too much on the price, and not enough on the dietetic value of the various wines as dependent on their constituent qualities.—*Brit. and For. Med.-Chir. Rev.*, January, 1866, p. 128.

The second edition contains so large an amount of additional matter as almost to make it a new book.—*Medical Times and Gaz.*, January 4th, 1873.

1871. THUDICHUM, J. L. W., and DUPRÉ, A. Treatise on the origin,
nature, and varieties of Wine.

London and New York, 8vo, pp. 760.

This book, which professes to be a "Complete Manual of Viticulture and Enology," thoroughly fulfils that purpose, and is probably one of the most solidly useful works that have appeared on any subject of the kind for many

years. Although it does not contain a complete discussion of the action of wine upon the body in health and in disease, it may be read with profit and pleasure alike by the profession and the public.—*Practitioner*, December, 1871, p. 360.

1806. FRASER, H. On Epilepsy, and the use of the Misletoe of the Oak in its cure. London, 8vo. *Bibl. Med.-Chir. Soc.*

The account of the cases (eleven in number) in which Dr. Fraser experienced the powers of misletoe is very brief and uncircumstantial, and is preceded by a systematic view of the symptoms, causes, &c., of epilepsy, somewhat after the model of an inaugural dissertation, and abounding with references to authors. To most readers this detail is unnecessary, and it would appear that the object of the author would have been more effectually accomplished by an ample and circumstantial relation of the instances in which the remedy proved serviceable... He has enumerated the names of eighteen authors who have mentioned the efficacy of misletoe in this disease, from the age of Pliny to the present time, but the majority of them, we fear, will not be deemed more satisfactory than that of the credulous Roman himself.—*Edin. Med. Surg. Journal*, ii, 1806, p. 353.

ZINCUM, INCLUDING THE CARBONATE, OXIDE AND SULPHATE OF ZINC.

1741. POTT, J. H. Observationes chymicæ circa Zincum, Boracem, &c. Berolini, 4to. *Bibl. Med.-Chir. Soc.*

1771. WIEL, J. P. *Observationes de usu interno Nucis Vomicae et Vitrioli albi in pertinacibus morbis curandis conspicuo.* Wittembergæ, 4to. *Bibl. Acad. Edin.*
1772. HART, J. *De Zinco, ejusque florum usu medico, observationibus confirmato. Lugd. Bat. 4to. (Idem in *Schlegel, Thes. Mat. Med.*, vol. iii, art. 35, p. 235.)
Bibl. Med.-Chir. Soc. (Schlegel).
The work is divided into three chapters: i, on the nature and origin of zinc in general; ii, on the preparation and properties of its flowers (sulphate of zinc); and iii, on their use in medicine, principally when taken internally. In the latter, the author observes that "the flowers of zinc" had long been used externally in certain eye affections, but that it had never been advised internally by any one except Glauber, till Dr. Gaubius (*Adversaria varii Argumenti*, Lugd. Bat. 1771), discovered it to be the remedy employed by the famous empiric Luddemannus, under the title of *Luna fixata*. After this, he exhibited it with success in the cure of convulsive and spasmodic diseases, notably in epilepsy. Seven cases are adduced by Dr. Hart with the view of confirming the antispasmodic virtues ascribed to this remedy by Dr. Gaubius in his *Adversaria*.—*Duncan's Med. Commentaries*, 1774, vol. i, p. 76.
1776. HURLEBUSCH, G. L. *De Zinco medico. Helmst. 4to, pp. 44. (Idem in *Schlegel, Thes. Mat. Med.*, vol. iii, art. 36, p. 269.)
Bibl. Banks; Med.-Chir. Soc. (Schlegel).
1778. HARTMANN, P. I. *De Zinci florum usu interno. Traject. ad Viad. 4to. (Idem in *Schlegel, Thes. Mat. Med.*, iii, art. 37, p. 301.)
Bibl. Med.-Chir. Soc. (Schlegel).

Bibl. Coll. Surg. Lond.; Coll. Phys. Edin.; Med.-Chir. Soc. (Schlegel).
The author has bestowed much labour on this thesis, and has brought together from a variety of sources all that had been written on the medical and surgical uses of the sulphate of zinc. From the enumeration of the diseases in which it had been successfully employed it would appear to be almost a "catholicon"!

Has been through several editions; 5th, 1814. German transl. by C. F. Michaëlis and F. H. Hegewisch, 2 vols. 8vo, Leipzig, 1801-1807. *Bibl. Med.-Chir. Soc.*

A standard work of considerable merit in every point of view. To Dr. Currie is due the credit of having been the first, in Great Britain at least, to introduce the practice of employing cold affusion in fevers, and although his views and practice met at the time with considerable opposition, subsequent recent experience has shown conclusively that they were based on solid and scientific basis.

- This pamphlet contains in fact but one case upon the authority of Mr. Edlin's personal experience; for the second, which is mentioned in a note, is merely given from the recollection of two old women, and occurred thirty years previously! In the former, the cold application was speedily and effectually beneficial, for it entirely removed the pain in less than three hours, but palpitation, &c., is said to have supervened in a few hours, and having recurred once in the interval of a week, a third attack then proved fatal! A reply was published by Dr. R. Kinglake. Taunton, 8vo, 1804. See notices of both pamphlets in *Edin. Med. Surg. Journ.*, vol. i, 1801. p. 209.

Dr. Jackson differs from Dr. Currie on two points:—1. He considers "susceptibility of impression," whatever that may mean, as a better indication of the propriety of cold affusion in fever than an increased temperature of the surface, advocated by Dr. Currie; and—2. He regards "aspersion," *i. e.* sprinkling the surface with cold water as preferable, under certain circumstances, to general affusion as practised by Currie. For consideration of

these views see *Edinb. Med. Surg. Journ.*, v, 1809, p. 112, and *London Med. Phys. Journ.*, xx, 1808, pp. 81 and 164.

The object of this treatise is to show that *cold water* is the first, greatest, and most powerful, nay, the only remedy, for preventing the worst consequences in cases of burns if applied timely and with perseverance. The author's conviction of its efficacy is founded partly on experiments made on animals and on himself, and partly on the success which attended the cold water treatment in practice; he also attempts to prove it *a priori*.—See Review in *London Med. Phys. Journ.*, xxxvi, 1816, p. 239-246.

- A practical work, embracing the results of very considerable experience. Cold water is the almost universal means proposed by the author as combating inflammation and its consequences. He devotes a chapter to each of the following affections in which he employed cold water with success. Erysipelas, phlegmon, burus, contused wounds, and gangrene. He has other chapters on dressing wounds (with water) and on the opening of abscesses. Analytical review in *Brit. and For. Med.-Chir. Rev.*, January, 1837, p. 114 *et seq.*

1844. WEEKES, H. The Warm Water remedy. A treatise on the Warm, Vapour, and Medicated Baths, with directions for their use, &c. London, 12mo.

This is a mere *brochure*, containing very little either of novelty or interest; the portion which is most interesting is that which relates to the "medicated bath."—*London Med. Gazette*, January 5th, 1844, p. 455. Notwithstanding the above condemnation, the same journal gives a long

extract from the work on the subject of medicated baths, which appears to me to be very interesting and to afford some useful hints on the subject of fumigation.

1845. MAYO, H. *The Water Cure, its use and misuse examined.* London, 8vo.

From the ignorant promulgator of such a system (as Hydropathy) we cannot expect to learn its real value, but when an enlightened and duly qualified person comes to devote himself to its examination, we then get possession of facts, well observed, showing what is true and what false about it...From Dr. Mayo's observations it is evident that he has stripped the water cure of its preposterous extravagances, both in pretension and practice, and that it becomes in his hands nothing more than "a more extended and scientific use of cold bathing."—*Dublin Journ. Med. Sci.*, xxviii, 1845, p. 123.

1847. ZIPPERLEN, J. B. *Wirkung und Anwendung des kalten Wassers im Allgemeinen, &c.* Hanau, 8vo, pp. 212.

1847. HARTSHORNE, H. *Water versus Hydropathy; or, an Essay on Water and its true relations to medicine.* Philadelphia, U.S., 12mo, pp. 131.

The object of this book is to inquire into the positive and proper use of water in medicine. The author's views and illustrations, though thrown together carelessly, and often loosely expressed, are in the main correct, and it is evident that had he not confined his exposition of the leading topics within too narrow limits, he would have done himself greater justice, while his general conclusion, namely, that hydropathy is a delusion of the most dangerous character, would have been even more fully sustained.—*Amer. Journ. Med. Sci.*, October, 1847, p. 444.

1847. JÄBNNEL, J. *Petit traité pratique des Eaux potables au point de vue de l'hygiène civile et militaire, &c.*

Bordeaux, 8vo, pp. 43, pl. 2.

1854. BULLEY, F. A. Account of some cases of Epidemic Cholera successfully treated by Hot Water applications. London, 8vo, pp. 34.
The treatment advocated in this pamphlet is based on the principle laid down by Brown-Séquard, that diminution of temperature is the proximate cause of death in cases of poisoning. The object of treatment in cholera, therefore, the author contends, should be to maintain the temperature, and for this purpose he advocates hot-water packing, and he relates six cases successfully treated by this method, the only adjunct being some aromatic medicines internally.—*Med. Circular*, December, 1852, p. 432.

A very full and complete memoir, especially the historical portion.
1861. CUSON, H. *Des indications et contre-indications de l'emploi de l'Eau froide dans les Maladies de l'Utérus. Montpellier, 4to, pp. 72.

1861. BRAND, E. *Die Hydrotherapie des Typhus*. Stettin, 8vo, pp. 309. *Ibid.*? 1863.

The man who restored to honour the treatment of the pyrexias, and especially of typhoid fever by cold water, was Ernest Brand, of Stettin. His treatment as set forth in the above work constituted a true method in the vigorous and dogmatic acceptance of the word, consisting of the regular and systematic administration of cool baths (20° C. or 68° F.) at least eight times in the 24 hours (a bath every three hours, night as well as day), with or without cold affusion on the head, each bath 15 minutes in duration. Liebermeister, in speaking of Brand's book, whilst acknowledging the decisive impulse which it has given to the therapeutics of febrile affections, regrets to find in it a too ardent and enthusiastic proselytism.—Prof. Béchier in *Practitioner*, Feb., 1874, p. 84.

- 1862? NETTER, A. *Du traitement du Choléra par l'administration coup sur coup d'énormes quantités de boissons aqueuses*.

Paris, 8vo.

1862. LAIR, J. M. **De l'emploi de l'Eau en chirurgie*.

Montpellier, 4to, pp. 66.

1863. MARSH, J. C. LORY. *Special Therapeutics: an Investigation into the treatment of Acute and Chronic Diseases by the application of Water, the Hot-Air Bath, and Inhalation*.

London, 8vo, pp. 130.

A considerable portion of this book consists of a review of the work of Dr. Currie (1797), which, according to Dr. Marsh, "has unfortunately been too little read and appreciated by the profession, though thoroughly scientific and practical." In this, as in many other works of the same class, too much stress is laid upon the salutary effects of the water, and too little on concomitant treatment. The latter, however, in many instances under Dr. Marsh's care, was by no means insignificant; *e.g.* in a case of "acute laryngitis, in which the wet blankets were used with great benefit," the constitutional treatment consisted of tartar emetic and salines, "repeated every hour," with an "occasional dose" of calomel and colocynth, leeches to the throat, and subsequently blisters!—*Glasgow Med. Journ.*, April, 1864, p. 99-103.

1864. RATJEN, E. **De Hydrotherapia Typhi abdominalis*.

Kiel, 4to.

1866. BANG, O. L. *Kaltes Wasser*.

Leipzig, 8vo.

1866. JÜRGENSEN, T. *Klinische Studien über die Behandlung des Abdominaltyphus mittelst des kalten Wassers*.

Kiel, 8vo, pp. 123, with woodcuts.

In this work, and in that of Liebermeister and Hagenbach, the old treatment of typhus by cold affusion, as introduced by Dr. Currie in 1797, is advocated. After three years' experience of its use in typhoid fever, Dr. Jürgensen both approves of and recommends it. For a statement of his views, see review of his work in *Edin. Med. Journ.*, March, 1869, p. 842-846.

1867. PETRI, W. *Hydrotherapie bei Typhus abdominalis*.

1873. DUBOUÉ, —. *Vide* "Ergot," 1873.

1873. CORTE, P. Lezioni teorico-pratiche sulla Idroterapia scientifica dette nella Università di Torino. Biella, 8vo.

1873. GROSSE, L. *De l'emploi des affusions froides comme anti-pyrétique. Montpellier, 4to, pp. 48.

1874. GLÉNARD, F. Traitement de la Fièvre Typhoïde par les bains froids. Lyon, 8vo, pp. 79, pl. i. *Ibid.* 1875.

In this publication Dr. Glénard has expounded Brand's system with talent, and relates observations on thirteen patients treated vigorously and in the spirit of this method. (*Vide* Brand, 1861.) His practice appears to have been very successful. For a condensed translation of this interesting paper, by Dr. W. Macewen, see *Glasgow Med. Journ.*, July, 1874, p. 370-396.

1874. BÉHIER, J. Du traitement de la Fièvre Typhoïde par les bains froids. (*Ex. Bull. de Thérapeutique.*) Paris, 8vo, pp. 15.

For an abstract of Prof. Béhier's views on the use of cold baths in typhoid

fever (which are in favour of the practice), see *Brit. and For. Med.-Chir. Rev.*, April, 1874, p. 522.

An English translation of this excellent paper or clinical lecture is given *in extenso* in *Practitioner*, Feb., 1874, p. 81-94. It contains a fair and impartial review of the writings of others, illustrated by his own clinical experience on the use of cold water in typhoid fever.

1874. RAYNAUD, M. Application de la méthode des Bains froids au traitement du Rhumatisme Cérébral. (Ex *Journ. de Thérap.*, Nov. 25, 1874.) Paris, 8vo, pp. 23.

Abstract of Dr. Raynaud's experience in *Brit. and For. Med.-Chir. Rev.*, April, 1875, p. 502. His plan of treatment differs somewhat from that of English practitioners, as he plunges the patient at once into water cooled with ice, instead of gradually cooling it while the patient is immersed.—*Ibid.*

1874. ZIEMSEN, H., und IMMERMANN, H. Die Kaltwasserbehandlung des Typhus abdominalis nach Beobachtungen aus der medicinischen Klinik zu Erlangen. Erlangen, 8vo.

The object of this book is to show the effects of cold water upon typhoid fever; to furnish statistics; to lay down exact methods of using cold water in this disease; to present statements of careful study of temperature under its use; and to afford proofs of the success which the authors claim for this mode of treatment. See analytical review in *Amer. Journ. Med. Sci.*, Jan., 1874, p. 188.

N.B.—The number of works on the system called Hydropathy is very great, most of them by unprofessional men or by "Water doctors." To have included these would have been beyond our limits, but in drawing the line, it is feared that some works, especially by German writers, have been omitted which ought to have been inserted, whilst some few, purely hydropathic, have found, undesignedly, a place in the above list. From mere titles it is often extremely difficult to distinguish one class of books from another.

SEA - WATER.

As a Therapeutic Agent.

1671. BARTHOLIN, T. Remedium *ευποριστον* ad Gangrænam. (Ex. in *Miscell. Acad. Nat. Cur.*, Dec. i, Ann. 2.)
Sea-water is the remedy extolled by this writer in the treatment of gangrene.
1699. LANZONI, J. Herpes sanatus balneo Aquæ Marinæ. (Ex. in *Miscell. Acad. Nat. Cur.*, Dec. iii, Ann. 7 et 8.)
1755. SPEED, T. De Aqua Marina commentarius. Oxon. 4to.
English transl. appended to "Russel on Sea Water," 1769.
Printed separately in English, Southampton, 1786, 18mo.
Bibl. Med.-Chir. Soc.
1756. RUSSEL, R. Diss. de Tabæ Glandulari, sive de usu Aquæ Marinæ in morbis glandularum. Cantab. 8vo.
Bibl. Acad. Edin.
1763. CARTHEUSER, J. F. Diss. de viribus Aquæ Marinæ medicis. Francof.-sur-l'Oder, 4to.
1769. MARET, H. Sur l'usage des bains d'Eau douce et d'Eau de Mer. Mémoire couronné en 1767, par l'Acad. de Bordeaux. Paris, 8vo.

1769. RUSSEL, R. Dissertation on the use of Sea Water in Diseases of the Glands, translated from the Latin; to which is appended an English transl. of "Speed on Sea Water," and "Account of the Mineral Waters of Great Britain," by W. Owen.
Fifth ed. London, 8vo. *Bibl. Med.-Chir. Soc.*

This work of Dr. Russel's was long held in high esteem, and deservedly so, as it contains much that is practically useful. The author, however, somewhat over-rates the curative powers of sea-water, and does not attach sufficient weight to the influence of season, change of air, &c., in scrofulous cases. Mr. Owen's appendix, in the fifth edition, is noticed further in art. "Mineral Waters of Great Britain."

1770. MARTEAU, P. A. *Traité théorique et pratique des bains d'Eau simple et d'Eau de Mer.* Amiens, 12mo. *Bibl. Roy.*
1775. WHITE, R. *The use and abuse of Sea Water.* London, 8vo. Second ed. Ibid. 1779.
Bibl. Med.-Chir. Soc.; Manchester Med. Soc.
1787. KENTISH, R. *Essay on Sea Bathing and the internal use of Sea Water.* London, 8vo. *Bibl. Med.-Chir. Soc.*
1795. REID, T. *Directions for warm and cold Sea Bathing.* London, 8vo. *Bibl. Med.-Chir. Soc.*
1795. ANDERSON, J. *Practical Essay on Sea Water and Sea Bathing.* London, 8vo. *Bibl. Med.-Chir. Soc.*
1796. SCHMIDT, G. R. **De vera Aquæ Marinæ efficacia.* Francof. ad Moen. 8vo.
1799. VOGEL, S. G. *Ueber die Seebadekuren in Dobberan, &c.* Rostock, 8vo.
1804. BUCHAN, A. P. *Observations concerning Sea Bathing, &c.* London, 12mo. French transl. by —. Rouxel, Paris, 1812 et 1835, 8vo. *Bibl. Med.-Chir. Soc.*
1812. LE FRANÇOIS, L. A. **Coup-d'œil médical sur l'emploi externe et interne de l'Eau de Mer.* Paris, 4to.
1813. GIBNEY, J. *Observations on cold and warm Sea Bathing, particularly in Scrofulous and Gouty cases.* London, 8vo, pp. 144. *Bibl. Med.-Chir. Soc.*
- An interesting treatise; in it the author has brought together numerous authorities relating to his subject, and supplemented them with some original remarks derived from his own experience. See *London Med. Phys. Journ.*, xxix, 1813, p. 224.
1823. MOURGUE, C. L. *Journal des Bains de Mer de Dieppe, &c.* Paris, 8vo.
1830. MOURGUE, C. L. *Recherches sur les effets et le mode d'action des Bains de Mer.* Paris, 8vo.
1834. HAMEAU, —. *Quelques avis sur les Bains de Mer.* Bordeaux, 8vo.
1835. ASSEGOND, A. *Manuel hygiénique et thérapeutique des Bains de Mer.* Bruxelles, 8vo. First ed. Paris, 1824?

The introduction contains an excellent historical account of baths, with

their literature. The physico-medical information contained in the work is correct, and the style in which it is imparted light, airy, and attractive.—*London Med. Gazette*, September 12th, 1835, p. 824.

1837. D'AUMERIC, J. F. Das Seebad zu Scheveningen in Holland, &c. Cleve, 8vo.

Mérat and De Lens mention another work in Dutch by this author on sea baths, published at Harlem in 1829, and which was "crowned" by the Academy of Sciences of that city, but I am unable to find the title of it.

1841. MUHRY, C. Medicinische Fragmente, betreff.: eine Allgem. Lehre des Seebadens und der Seebäder, &c. Hanover, 12mo, pp. 168.

The author appears to have visited many of our English bathing resorts, in order to compare their advantages with those on the Continent. See review in *London Med. Gazette*, May 21st. 1841, p. 356.

1843. PAQUIER, —. Notice sur l'Eau épurée. Paris, 12mo.

M. Paquier, *pharmacien* of Fécamp, prepared sea-water for internal use by filtering it and introducing, under pressure, three or four parts of carbonic acid. In this state, under the name of *Eau de Mer gazeuse*, it is reported to act as a purgative and to be far less disagreeable to the taste than ordinary sea water; hence to be preferable in all cases requiring the internal administration of this remedy.

1848. VERHAEGHE, L. Die Seebäder zu Ostende, ihre Wirkung und Anwendung. Berlin, 12mo, pp. 128.

1850. VERHAEGHE, L. Du traitement des Maladies Nerveuses par les Bains de Mer. Bruxelles, 8vo. 2me éd. Anvers, 1853, 8vo, pp. 92.

The author puts forth his views in a clear and concise manner, and shows the advantages to be derived, particularly in nervous complaints, from a judicious and properly conducted course of sea-bathing.—*Med. Times*, October 19th, 1850.

- Dr. Lisle has done good service in calling attention to the medical properties of sea-water. He does not claim for it any specific property in the cure of disease, but regards it as a simple hygienic agent, useful only in an indirect manner by its general operation on the blood and the nutritive functions. His sea-water bread and "thalassic elixir and syrup," as he names them, appear to him indicated as hygienic and preservative agents against disease in persons who are healthy but of delicate constitution, in convalescence from acute diseases, apyretic stomach affections, anæmia, chlorosis, scrofulous and tubercular manifestations, and in diabetes in all its phases. He claims for sea-water all the properties of a mineral water, and furnishes some comparative analyses in support of this view.—See further *Brit. and For. Med.-Chir. Rev.*, Oct., 1875, p. 454-5.

1760. MONRO, A. (nepos). Treatise on Mineral Waters. London, 2 vols. 8vo. *Bibl. Acad. Edin.*
1765. SHORT, T. A general Treatise on various Cold Mineral Waters

in England, but more particularly those of Harrowgate, Thorp-Arch, Dorset-Hill, Wigglesworth, Neville-Holt, and others of a like nature; with their principles, virtues, and uses.

London, 8vo.

1769. OWEN, W. An Account of the nature, properties, and uses of all the remarkable Mineral Waters of Great Britain. Appended to the fifth edition of "Russell on Sea Water," *q. v.*

London, 8vo.

A very useful compilation, containing brief notices of upwards of ninety British mineral waters, many of them very little known.

1770. MONRO, DONALD. A Treatise on Mineral Waters London, 2 vols. 8vo. *Bibl. Manchester Med. Soc.; Acad. Edin.* (1760?)

Monro gives an account of all English, Scotch, and Irish waters.—*Dr. J. Macpherson.*

1781. ELLIOT, J. Account of the nature and medicinal virtues of the principal Mineral Waters of Great Britain and Ireland.

London, 8vo, plates. Second ed. 12mo. *Ibid.* 1789.

Bibl. Med.-Chir. Soc.

1790. MEADE, W. *Diss. chem. de Aquis Mineralibus. Edin. 8vo.

Bibl. Acad. Edin.

1799. KIRWAN, R. An Essay on the Analysis of Mineral Waters. London, 8vo.

Bibl. Acad. Edin.

1800. SAUNDERS, W. A Treatise on the chemical history and medical powers of the most celebrated Mineral Waters.

London, 8vo. Second ed. 1805.

Bibl. Acad. Edin. (Alt. ed.); *Med.-Chir. Soc.* (2nd ed.)

Saunders' work contains a great deal of practical information about British mineral waters.—*Dr. J. Macpherson.*

1802. NESBITT, W. A Medical Guide to the principal Watering Places of Great Britain. London, 8vo.

1818. ARMSTRONG, J. On Scarlet Fever, &c...with remarks on Sulphureous Waters. London, 8vo. Second ed. *Ibid.* 1818.

Bibl. Med.-Chir. Soc.

1819. MACKENZIE, P. Practical observations on the medical powers of the most celebrated Mineral Waters.

London, 12mo, pp. 151.

1820. SCUDAMORE, SIR C. *Vide* "Buxton," 1820.

1821. MILLER, J. Practical observations on cold and warm bathing, and descriptive notices of Watering Places in Britain.

London, 12mo.

1823. WADE, W. M. Delineations of the Watering and Sea-bathing places of Scotland, &c. Paisley and Edin. 12mo.

1829. DAUBENY, C. Analysis of Mineral Waters. (Ex. in *Phil. Magazine and Annals of Philosophy*, 1829, and in *Philosoph. Trans.*, 1830, 1831, 1833.

In treating of British mineral waters, Dr. Daubeny's researches should not be overlooked.—*Dr. J. Macpherson.*

- 1829—43. OSANN, E. *Physikalisch-medicinische Darstellung der bekannten Heilquellen der vorzüglichsten Länder Europa's.* Berlin, 3 vols. 8vo. *Bibl. Med.-Chir. Soc. ; Coll. Phys. Edin.*

The second division of the third part contains a capital account of all the mineral waters of Great Britain, with an excellent bibliography.—*Dr. Macpherson.*

1830. BOOTH, A. *On the natural and chemical properties of Water, and on various British Mineral Waters.* London, 8vo, pp. 196.

1832. GAIRDNER, M. *Essay on the natural history, origin, and medicinal effects of Mineral and Thermal Springs.* Edin. 8vo. *Bibl. Coll. Phys. Edin.*

Contains the best English view of the whole theory of mineral waters, supplying also much information about English springs.—*Dr. Macpherson.*

1836. LEE, EDWIN. *Account of the most frequented Watering Places on the Continent...and an Appendix on the principal Mineral Waters of England.* London, 8vo, pp. 232.

1837. LEE, EDWIN. *Additional Remarks on the use of English Mineral Springs, especially those of Bath, Cheltenham, and Leamington.* London, 8vo, pp. 20.

1837. DAUBENY, C. *Report on the present state of our knowledge with respect to Mineral and Thermal Waters.* London, 8vo.

1841. GRANVILLE, A. B. *The Spas of England.* London, 3 vols. 8vo.

More adapted for the general than the professional reader. A table at the end of each volume, containing the analyses of the various springs, is the part which chiefly interests the physician.—*Brit. and For. Med. Rev.*, Oct., 1842, p. 318.

1843. JOHNSON, J. *Excursions to the principal Mineral Waters of England.* London, 8vo. *Bibl. Med.-Chir. Soc.*

1848. LEE, EDWIN. *The Baths and Watering Places of England considered with reference to their curative efficacy.* Second ed. 8vo, pp. 212. Third ed. 1854, pp. 280.

The first part contains an account of those localities which are characterised by thermal and slightly mineralised springs; these are not very numerous. In the second part we have the saline, aperient, and chalybeate springs. Such a division is artificial and arbitrary: thus Bath might come under either head, but it is here separated from the chalybeate springs. Part 3 is devoted to a topographical and climatic description of the principal places of winter resort on the English coast. Of these he gives a very fair account. The chemical properties of the different waters, with their uses in various forms of disease, are described at sufficient length for the non-medical reader.—*London Med. Gazette*, Sept. 8th, 1848, p. 429.

1857. GLOVER, R. M. *On Mineral Waters, their physical and medicinal properties, with descriptions of different Mineral Waters of Great Britain and the Continent, &c.* London, 8vo, pp. 375. *Bibl. Med.-Chir. Soc.*

A very useful and agreeable book; a complete repertorium of knowledge, with regard to mineral waters, compressed into a very moderate compass.

The main portion of the work is divided into five parts, which treat successively of mineral waters north of the Trent, and those south of the Trent; of the waters of Belgium and France; of the waters of Germany, Switzerland, Savoy, and Italy; of those of Ireland and Scotland; and of some miscellaneous matters, comprising notices altogether of no less than 156 spas. The last part contains an enumeration of the diseases in which mineral waters are beneficial.—*Lancet*, Aug. 22nd, 1851, p. 199.

1858. SEEGEN, J. *Compendium der allgemeinen und speciellen Heilquellenlehre.* Wien, 2 vols. 8vo, pp. 292, 363.

Dr. Seegen has produced a treatise (a work of immense labour) which, while it contains a detailed account of the physical and chemical properties and geological sources of the principal mineral springs of the Continent, possesses also the advantage of giving both to the student and physician such practical information on the physiological effects and therapeutic uses of the various waters as will render it a valuable adjunct to the library of either.—*Dublin Quart. Journ. Med. Sci.*, Feb., 1859, p. 172.

1860. DURAND-FARDEL, M., LE BRET, E., et LEFORT J. *Dictionnaire général des Eaux Minérales et d'Hydrologie Médicale.* Paris, 2 vols. 8vo, pp. 704, 960.

The most complete work on mineral waters in any language, containing notices of all the known mineral springs of the world, arranged alphabetically. A work of great labour. Those of Great Britain are duly noticed, and their composition and medical properties fairly stated. The practical remarks on diseases and their appropriate hydrological treatment are valuable, and constitute a very important part of the work.

1862. DURAND-FARDEL, M. *Traité Thérapeutique des Eaux Minérales de France et de l'Etranger.* Paris, 8vo, pp. 773.

An exhaustive work on the subject. It is divided into two parts, the first of which is devoted to what the author calls the *Materia Medica* of mineral waters; the second to the consideration of their therapeutical history, this latter constituting by far the largest portion of his treatise. Appended is a most valuable coloured map, showing every station of importance, the colours being so arranged as to indicate the predominating chemical characteristic of the spa.—*Dublin Quart. Journ. Med. Sci.*, May, 1864, p. 108.

1864. ROTUREAU, A. *Des principales Eaux Minérales d'Europe—France, Angleterre, &c.* Paris, 8vo, pp. 604.
Bibl. Med.-Chir. Soc.

1871. MACPHERSON, J. *Our Baths and Wells. The Mineral Waters of the British Islands, &c.* London, 8vo, pp. 205.

Pleasantly and lucidly written, and contains in small compass the essence of what we require to know in regard to the springs most in use, besides a great deal of interesting antiquarian information in regard to them.—*Edin. Med. Journ.*, Sept., 1871, p. 270.

Contains a mass of information respecting the spas of Great Britain. The author deals successively with the composition of various waters, the mode of selecting a suitable spa in particular ailments, and then proceeds to deal with saline, thermal, and earthy, salt, chalybeate, and sulphur waters and wells in detail, under the three heads of England, Wales, and Scotland. Dr. Macpherson knows what he is writing about, and his book is a very acceptable addition to medical literature.—*Lancet*, Aug. 5th, 1871, p. 193.

OF PARTICULAR LOCALITIES IN ENGLAND AND
WALES.

ARRANGED ALPHABETICALLY.

ABERDEEN (SCOTLAND).

1580. Broadside on the Well at Woolman's Hill (Aberdeen).

1837. LEE, E. *Vide* "Mineral Waters of Great Britain," 1837.

1837. EDWARDS, C. T. Observations on the medical properties of the Bladud (Bath?) Spa Waters. London, 8vo.
1850. TUNSTALL, J. The Bath Waters, their uses and effects in the cure and relief of various Chronic Diseases. London, 8vo, pp. 144. Second ed. 1861, pp. 167. Third ed. 1864. Fourth ed. 1867, pp. 164.
- In this interesting little work the history, properties, and composition of Bath waters are all most fully treated. The diseased conditions in which these waters are admissible, as well as the reverse, and the diet and regimen to be observed under their employment, are all discussed at sufficient length. An ingenious and novel form of diagram forms a frontispiece to the volume, showing at a glance the diseases in which Bath waters are useful, as well as their comparative utility in different diseases.—*London Med. Gazette*, Dec. 27th, 1851, p. 1103.
1857. PARKER, W. New Physiological Views: with an Appendix on the Bath Thermal Waters. Bath, 8vo?
 This pamphlet as presented to us was accompanied by a printed handbill, in which Mr. Parker offers a reward of £100 to any one who will refute in writing the principles unfolded in his "New Physiological Views." Mr. Parker is perfectly safe in offering the reward, for after perusing his pamphlet we can find nothing worth refuting. Whatever is true in its pages is not new; and as to any novelty, we have not been able to discover it.—*Medical Times and Gaz.*, Feb. 14th, 1857, p. 174.
1860. FALCONER, R. W. The Bath Mineral Waters in cases of Rheumatism, Sciatica, Gout, &c. Third ed. London, 8vo, pp. 50. Fourth ed. 1867, 8vo, pp. 54.
 "The following pages," to quote the author's own words, "contain a description of the admirable and extensive arrangements provided for the employment of the mineral waters of Bath; together with brief notices of the impregnations and medicinal uses of the waters; and of the Bath General or Mineral Water Hospital; the whole being prefaced with a general account of the early history of the mineral waters and baths of Bath." The historical sketch contains an interesting account of the notice which has been bestowed upon these waters in different ages.—*Medical Times and Gaz.*, Oct. 6th, 1860, p. 341.

1773. HUNTER, A. Treatise on the Buxton Waters. Third ed. London, 8vo. *Bibl. Med.-Chir. Soc.*
1784. PEARSON, G. Chymical history of the Tepid Springs of Buxton...with a chronological relation of the use of Buxton Water from the earliest records, &c. London, 2 vols. 8vo, pp. 327, 227, plate. *Bibl. Med.-Chir. Soc.*; *Acad. Edin.*
1784. PEARSON, G. Directions for impregnating the Buxton Water with Gases. London, 8vo. *Bibl. Med.-Chir. Soc.*; *Radcliffe.*
1792. DENMAN, J. Observations on the effects of Buxton Water. London, 8vo, pp. 144.
1820. SCUDAMORE, SIR C. A Chemical and Medical Report of the properties of the Mineral Waters of Buxton, Matlock, Tunbridge Wells, Harrogate, Bath, Bristol, Cheltenham, Leamington, Malvern, and the Isle of Wight. London, 8vo. Second ed. corrected and much enlarged. (including Brighton and the Beulah Spa, Norwood), London, 1833, 8vo, pp. 215.
- A brief geological sketch is given of the places visited by the author; the chemical analysis of each mineral water is then stated, and their medical properties are described. Sir Charles indulges in no exaggerated account of the superiority of one particular water over another, but assigns to each its fair and honest value.—*London Med. Phys. Journ.*, lxx, 1833, p. 243.
1833. SCUDAMORE, SIR C. Analysis and medical properties of the Tepid Springs of Buxton. London, 8vo. Third ed. 1836. *Bibl. Med.-Chir. Soc.*
1838. ROBERTSON, W. H. Buxton and its Waters. An analytical account of their medicinal properties and general effects. London, 12mo, pp. 147.

1846. ROBERTSON, W. H. A Guide to the use of Buxton Waters. Third ed. ? London, 8vo, pp. 31. Seventh ed. Ibid. 1852. pp. 40.

An excellent and useful guide to these waters.—*Dublin Quart. Journ. Med. Sci.*, xiv, 1852, p. 18.

1852. ROBERTSON, W. H. A Letter to Dr. Lyon Playfair; being a Medical Commentary on the results of the recent analysis of the Buxton Tepid Water. London, 8vo, pp. 19.

Dr. Playfair having shown the large proportion of nitrogen in this water, Dr. Robertson addresses this letter to him, with the view of showing that most of its therapeutical value may be ascribed to the presence of this gas.—*Dublin Quart. Journ. Med. Sci.*, xvi, 1852, p. 18.

1854. ROBERTSON, W. H. Handbook to the Peak of Derbyshire and the use of Buxton Mineral Waters. London, 8vo, pp. 22. *Bibl. Med.-Chir. Soc.*

A model for books of the kind.—*Glover*.

1861. PEARSON, J. A. Reports of cases treated at the Buxton Bath Charity and Devonshire Hospital. 8vo, pp. 36.

This pamphlet contains notes of a hundred cases, which are possibly useful, and an inkling of some of the small medical jealousies of a watering-place, which is amusing. The author dissents from the opinion that nitrogen is the useful element in the Buxton waters, and advocates their use by themselves, without a farrago of drugs.—*Medical Times and Gaz.*, June 22, 1861, p. 658.

CAERNARVON, KING ARTHUR'S WELL.

1858. WILLIAMS, A. WYNN. King Arthur's Well, Caernarvon. Pamphlet.

This well was discovered by Dr. Williams about 1856. In this *brochure* he gives an interesting account of the scenery round the well, which is situated in the County of Caernarvon, near the Snowdon ranges. The water contains a large proportion of iron in the form of carbonate of protoxide.—*Medical Times and Gaz.*, Nov. 6, 1858, p. 478.

CANTERBURY.

1702. (Anon.) Canterbury Wells: a discourse by way of dialogue upon the Mineral Waters lately discovered in that city. London, 8vo.

An account of two mineral springs at Canterbury is given by Dr. S. De Moulins in *Phil. Trans.*, No. 312, p. 2462.

CAVERSHAM.

1790. TAYLOR, J. Medical Treatise on the virtues of St. Bernard's Well (in Edinburgh.) Edin. 8vo. *Bibl. Med.-Chir. Soc.*

EPSOM, SURREY.

1695. GREW, N. Tractatus de Salis cathartici amaro in Aquis Ebeshamensibus et hujusmodi aliis contenti natura et usu. London, 12mo. English transl. by Dr. J. Bridges (with animadversions on a late corrupt translation by Francis Moulst, chymist.) London, 1697, 12mo. *Bibl. Coll. Surg. Lond.* (both).

This is probably the first authentic account of the Epsom or Ebesham saline waters: it is divided into two parts, the first relating to the nature of the purging salt; the second, treating of its uses. From this account it would seem to have been regarded as a cure for all the complaints flesh is heir to. For a short analytical notice of Dr. Bridge's translation, by A. F. Haselden, see *Proceedings of Pharm. Conference*, 1870, App., p. 53.

1768. INGRAM, D. Enquiry into the origin, &c., of Magnesia Alba, and the properties of Epsom Waters. London, 8vo. *Bibl. Roy.*

N.B.—For further notices of Epsom waters see "Allen's Chalybeat and Purging Waters of England," 1699, and "Owen's Mineral Waters of Great Britain," 1769, p. 217. In *Lloyd's Evening Post* for August, 1769, there is a "Concise historical account of the Old Epsom Wells on Epsom Common."

ESSEX, COUNTY OF.

1783. TRINDER, Rev. W. M. An Inquiry by experiments into the properties and effects of the Mineral Waters in the County of Essex. London, 8vo. *Bibl. Med. Soc. Lond.*

GILSLAND.

1816. CLANNY, W. R. On the Mineral Waters of Gilsland in Cumberland. Sunderland, 8vo. *Bibl. Med.-Chir. Soc.; Radcliffe.*

GLASTONBURY, SOMERSET.

1751. (Anon.) Wilt thou be made whole? or the virtues and efficacy of the Water of Glastonbury, illustrated in above twenty remarkable cases fully described of persons who, by the use of that water, have been cured of disorders of the most obstinate and deplorable kinds, such as the asthma, rheumatism, dropsy, king's evil, deafness, blindness, wens, cancers, ulcers, old swellings, leprosy, &c. London, 8vo.

1751. (Anon.) A short description of the Waters of Glastonbury; together with an impartial account of the effects thereof, in a variety of cases. By a disinterested clergyman not at all obliged to the inhabitants, nor in the least concerned in the interest of the town (!). Oxon. 8vo. *Bibl. Med. Soc. Lond.*

1758. LINDEN, D. W. On Chalybeat Waters, &c...with Appendix on...the Glastonbury Waters. London, 8vo, plate. Second ed. 1752. Ibid. 1755. *Bibl. Med.-Chir. Soc.*

GLOUCESTER.

1789. HEMMING, J. The history and chemical analysis of the Mineral Waters in the City of Gloucester, the various diseases to which it is applicable, &c. London, 8vo.

GRANGE, LANCASHIRE.

1870. BARBER, H. Holywell Spa, Grange, Lancashire: its history, nature, and properties. With directions for drinking the water. Ulverston and London, 12mo, pp. 16.

HAMPSTEAD.

1734. SOAME, J. Hampstead Wells, or Directions for drinking those Waters. London, 8vo.

Bibl. Med.-Chir. Soc.; Med. Soc. Lond.

1802. BLISS, J. On the Medicinal Waters of Hampstead and Kilburne. London, 8vo, pp. 58. *Bibl. Acad. Edin.*

The author has done an acceptable service to the public by reminding them of these long neglected but formerly celebrated waters, and by presenting an accurate analysis of them.—*London Med. Rev.*, vii, 1802, p. 244.

1804. GOODWIN, T. Account of the Neutral Saline Waters recently discovered at Hampstead, with chemical analysis, observations on their medicinal application and effect in certain diseases, &c.

London, 12mo.

HANLEY, SALOP.

1768. LINDEN, D. W. A medical and experimental history and analysis of the Hanley Spa, saline, purging, and chalybeate waters, near Shrewsbury. London? 8vo.

A full abstract of Dr. Linden's observations on this spring is furnished in Owen's "Mineral Waters of Great Britain," p. 327, *seq.*

HARROGATE.

1626. DEANE, E. Spadacrene Anglica, or the English Spaw Fountaine, being a briefe Treatise of the Fountaine in the Forest of Knaresborow. London, 4to. Alt. ed. York, 1649, 4to, and 1654, 12mo. Reprinted, with additional observations, by Dr. Stanhope and others, under the title Spadacrene Anglica, or English Spaw: being an Account of the Waters of Harrogate and parts adjacent. Leeds, 1736, 8vo. *Bibl. Med.-Chir. Soc.* (ed. 1736).

A learned and ingenious treatise.—*Nicholson (Lowndes).*

1627. STANHOPE, M. *Vide* "Knaresborough," 1627.

1652. FRENCH, J. The Yorkshire Spaw; or a treatise of four famous Medicinal Wells, viz.:—the Spaw, or Vitrioline Well; the Sulphur Well; the Dripping, or Petrifying Well; and St. Magnus' Well, near Knaresborough. London, 12mo. Reprinted at Halifax, 1760, 12mo. *Bibl. Med. Soc. Lond.* (ed. 1760).

1740. NEALE, G. Spadacrene Eboracensis, or the Yorkshire Spaws near Knaresborough. Inserted in Dr. Short's "History of Mineral Waters," *q. v.* p. 286.
1769. HARGROVE, E. History of Knaresborough, with Harrogate and its Medicinal Waters. York, 12mo. Sixth ed. 1809. *Bibl. Acad. Edin.*

1784. WALKER, J. Essay on the Waters of Harrogate and Thorp-Arch in Yorkshire, &c. London, 8vo. *Bibl. Med.-Chir. Soc.; Acad. Edin.*
1786. WILLAN, R. Experiments and Observations on the Waters of Croft and Harrogate. London, 8vo. *Bibl. Med. Soc. Lond.*
1789. HARGROVE, E. *Vide* "Knaresborough," 1789.
1792. GARNETT, T. Treatise on the Mineral Waters of Harrogate. Bradforth, 8vo. Second ed. Leeds, 8vo, 1794. Seventh ed. Knaresborough, 1822. *Bibl. Acad. Edin.* (1792); *Radcliffe* (1794).
1819. HUNTER, A. Essay on two Mineral Springs recently discovered at Harrogate, and on the springs of Thorp Arch and Ilkley, &c. London, 8vo, pp. 134. An elegantly written and erudite work.—*London Med. Phys. Journ.*, xlii, 1819, p. 524.
1820. SCUDAMORE, SIR C. *Vide* "Buxton," 1820.
1830. HUNTER, A. Treatise on the Mineral Waters of Harrogate and its vicinity. London, 12mo, pp. 138.
1853. KENNION, G. Observations on the Medicinal Springs of Harrogate. London, 8vo, pp. 31. Seventh ed. enlarged and revised, by Adam Bealey, London, 1870, 8vo. This little work, which is intended for the public more than the profession, has been reprinted several times, and forms an appendix to the "Illustrated Handbook of Harrogate." Harrogate, 1858, 12mo, pp. 160.
1855. HOFMANN, A. W. Harrogate and its Resources. Chemical Analysis of its Mineral Waters. With an Appendix on the mode of their Administration by the Committee. Loc? 8vo, pp. 54. A committee of the inhabitants of Harrogate employed Professor Hofmann to examine its mineral waters, and the result is the present very elaborate and lengthened report, the details of which the chemical philosopher will doubtless find very interesting, but the general or even the medical reader will consider them dry and tedious. The medical remarks in the appendix drawn up by the committee may be read with advantage by those visiting these waters, for the purpose of trying their effects for the removal of cutaneous diseases, or the mitigation of liver and stomach affections.—*Glasgow Med. Journ.*, Oct., 1855, p. 347.
1856. PIGGOTT, G. W. On the Harrogate Spas and Change of Air, exhibiting a Medical Commentary on the Waters, founded on Professor Hofmann's Analysis, &c. New ed. London, 12mo, pp. 280. A useful little handbook for visitors to the Harrogate springs and baths,

as it not only points out their constitution, and the maladies to which they are applicable, but enters into histories of the neighbourhood, of baths in general, and other subjects, well calculated to amuse and interest the leisure of an invalid.—*Lancet*, June 21st, 1856, p. 689.

Conveys much information in a light and pleasing style.—*Dublin Quart. Journ. Med. Sci.*, xxiii, 1837, p. 7.

1867. MYRTLE, A. S. Practical Observations on the Harrogate Mineral Waters, with cases. London, 8vo, pp. 98.

A good book on the Harrogate waters. The author describes the physical characters of Harrogate, the general character of the waters, gives analytical tables of them, details their effects, and the cases best suited for their use, points out the best time of the year for sending patients to Harrogate, and other matters of interest. The practitioner will find in this book every information that he needs to possess on the subject of Harrogate and its waters.—*Lancet*, July 6th, 1867, p. 13.

A reliable guide to the effects of the spa of which it treats. The addition of a number of interesting cases adds considerably to its practical value.—*Medical Times and Gaz.*, June 29th, 1867, p. 724.

HARTFELL SPAW.

1754. HORSBURGH, W. Experiments and observations upon the Hartfell Spaw. Edin. 8vo. *Bibl. Acad. Edin.*

HOLT, WILTS.

1723. (Anon.) An historical account of the cures done by the Mineral Waters at Holt, with some short observations concerning its nature, virtues, and the method of using them.

London? 12mo, pp. 16.

1731. EYRE, H. (Sworn Purveyor to Her Majesty for all Mineral Waters.) A brief account of the Mineral Waters at Holt, near Bath, in Wiltshire. London, 8vo. *Bibl. Radcliffe.*

In this treatise, "one hundred and twelve eminent cures" are narrated as having been effected by use of the Holt Waters after medicine had been used in vain.—*Britton's Hist. of Wiltshire*, p. 496.

1820. WEATHERHEAD, G. H. Analysis of the Leamington Spa in Warwickshire, with remarks on its uses and medicinal qualities. Second ed. London, 8vo. *Bibl. Med.-Chir. Soc.*
1820. SCUDAMORE, Sir C. *Vide* "Buxton," 1820.
1828. LOUDON, C. Practical Dissertation on the Waters of Leamington Spa, including the history of the Springs. A new analysis, rules for drinking the Waters, &c. Leamington, 8vo. Third ed. London, 8vo, 1830. *Bibl. Radcliffe* (1830).

The author has very satisfactorily effected the object he had in view, of giving to the profession a monograph to refer to, that they may be able to judge of the nature of the mineral springs at Leamington, and of the various ways in which they may be used.—*London Med. Phys. Journ.*, lxi, 1829, p. 569.

1837. LEE, E. *Vide* "Mineral Waters of Great Britain," 1837.
1838. FAIRFAX, —. Leamington Guide. Leamington, 8vo (map).

LIBBERTON. *Vide* "MOFFAT."

LINCOMB.

1742. HILLARY, W. On the medicinal virtues of Lincomb Spa Water, near Bath. London, 8vo. *Bibl. Radcliffe ; Med. Soc. Lond.*

LINCOLNSHIRE See "SCARBOROUGH," 1734.

LIVERPOOL.

1773. WORTHINGTON, J. Experiments on the Spa at Mount Sion, near Liverpool, with a view to ascertain its contents, and to investigate its medicinal qualities. London, 8vo. *Bibl. Acad. Edin.*
1773. HOULSTON, T. Essay on the Liverpool Spa Water. Liverpool, 8vo.

LLANDRINDOD, RADNORSHIRE.

1744. (Anon). A journey to Landrindod Wells in Radnorshire with a particular description of those Wells, &c.
London? 8vo. Second ed., London, 1746.
1756. LINDEN, D. W. On the medicinal Mineral Waters at Llandrindod, in Radnorshire, South Wales. London, 8vo. Ibid. 1761? *Bibl. Med.-Chir. Soc.*
1817. WILLIAMS, R. An analysis, &c., of the medicinal Waters of Llandrindod, in Radnorshire, with observations on the diseases to which they are applicable. London, 8vo. *Bibl. Radcliffe.*

LLANGYBI, CAERNARVONSHIRE.

1767. LINDEN, D. W. Inquiry into the properties of the Mineral Waters of Llangybi, in Caernarvonshire. London? 8vo.

LEWISHAM, KENT.

1681. PETERS, J. A treatise on the Lewisham Wells in Kent, showing the time and manner of their discovery, the minerals with which they are impregnated, &c. London, 12mo.
This well was known sometimes as Sydenham, sometimes as Dulwich. There was a second well discovered near Dulwich, but it never had the repute of the one at Sydenham.—*Dr. Macpherson.*

LONDON AND ITS VICINITY.

See "Bagnigge Wells," "Islington" (Sadlers Wells), "Lewisham" (Dulwich), "Norwood" (Beulah Spa), "Hampstead and Kilburn," "Shadwell," "Bromley," "Barnet," "Streatham," and "Epsom."

In addition to these should be noticed amongst London springs "the Purgig Water of the Dog and Duck," of which Mr. Owen in his work on British Mineral Waters p. (263), furnishes a full account. The "Dog and Duck" was a noted public-house in St. George's Fields, in the parish of Lambeth, close to the Deptford Road. From the reports of Dr. Baynard and others, it seems to have enjoyed repute in cancerous, leprous, and scrofulous cases, and in skin diseases.

MALVERN.

- 175-. WALL, J. Experiments and Observations on the Malvern Waters. Worcester, 8vo. Second ed. Ibid. 1757; third ed. Ibid. 1763. Republished in his "Medical Tracts," Oxford, 8vo, 1760, and also in a separate form under the title of "Malvern Waters," by his son, Dr. Martin Wall. Oxford, 8vo, 1806.
Bibl. Med.-Chir. Soc. (1763, 1780), Radcliffe (1757, 1806).
1805. WILSON, A. PHILIP. Analysis of the Malvern Waters. Worcester, 8vo. Ibid. Edin. 1806. *Bibl. Med.-Chir. Soc.*
1820. SCUDAMORE, Sir C. *Vide* "Buxton," 1820.
1828. ADDISON, W. On the nature and properties of the Malvern Water, &c. London, 8vo, pp. 192.
The author first describes the beauties and attractions of Malvern, and

particularly the nature of its waters, and remarks on their long established character in scrofula, glandular obstructions, old and fistulous ulcers, nephritic disorders, skin diseases, and thoracic affections. He attributes the benefit experienced in such cases partly to the salubrity of the air and partly to the extreme purity of the water, not believing that it contains any particular ingredients in sufficient quantity to produce much effect.—*London Med. Gaz.*, July 19, 1828, p. 213.*

MATLOCK-BATH.

1730. MEDLEY, J. Essay upon Matlock-Bath in Derbyshire, &c. Nottingham, 8vo. *Bibl. Med.-Chir. Soc.*
1802. LIPSCOMB, G. Description of Matlock-Bath, with an attempt to explain the causes of the heat, and of the petrifying quality of the springs. To which is added some account of...the Mineral Waters of Quarndon and Kidleston. London, 8vo.
1820. SCUDAMORE, SIR C. *Vide* "Buxton," 1820.

MIDDLE-HILL, WILTS.

1786. FALCONER, W. Account of the Mineral Water at Middle-Hill near Box, Wiltshire. Bath (?) 8vo. *Bibl. Med.-Chir. Soc.*

MOFFAT, SCOTLAND.

1659. MACKAILLE, M. Descriptio topographico-spagyrica fontium mineralium Moffetensium in Annandia Scotiæ. Edin, 8vo. An English translation, to which is appended a description of the Oily Well at St. Catherine's Chapel, in the parish of Libberton, was published in 1664. (Edin. 12mo.) *Bibl. Acad. Edin.* (both).

* N.B.—Malvern Spa has been made the subject of poems by Mr. Perry (inserted in "Dodsley's Collection of Poems," vol. v), Mr. Cottle, Dr. Brooker, and others; but none for originality are more worthy of note than one by the parish clerk of Malvern, about 250 years since, first published in 1778 in Nash's "Survey of Worcestershire." The four following stanzas may not be considered out of place here:—

Out of that famous hill
There daily springeth
A water passing still,
Which always bringeth
Great comfort to all them
That are diseased men,
And makes them well again
To praise the Lord.

Hast thou a wound to heal,
The which doth grieve thee,
Come then unto this well,
It will relieve thee
Noli me tangeres,
And other maladies,
Have here their remedies,
Praised be the Lord.

To drink thy waters' store
Lie in thy bushes,
Many with ulcers sore,
Many with bruises,
Who succour find from ill
From money given still,
Thanks to the Christian will,
O praise the Lord.

A thousand bottles there
Were filled weekly,
And many costlils rare
For stomachs sickly;
Some of them into Kent,
Some were to London sent
Others to Berwick went,
O praise the Lord.

1854. KEDDIE, W. Moffat: its Walks and Wells; and Report on, and Chemical Analysis of, its Mineral Wells, by J. Macadam. Glasgow, 8vo, pp. 163.

An admirably designed and elegantly written guide to these waters.—
Dublin Quart. Journ. Med. Sci., Nov., 1854, p. 16.

MOIRA. Vide "ASHBY-DE-LA-ZOUCH."

NEVIL-HOLT, LEICESTERSHIRE.

1740. SHORT, T. Vide "Mineral Waters of Great Britain," 1740.
1749. (Anon.) The contents, virtues, and uses of Nevil-Holt Spa Water, further proved, illustrated, and explained from experiments and reason. Second ed. London, 8vo, with a postscript printed in 1750. *Bibl. Med.-Chir. Soc.; Med. Soc., Lond.*

NEWCASTLE-ON-TYNE.

1760. TYTLER, J. On Newcastle-on-Tyne Waters.

NEWMAN, WARWICKSHIRE.

1587. BAYLEY, WALTER. A brief Discourse on certain Medicinal Waters in the County of Warwick, near Newman. London, 12mo.

NORWOOD (BEULAH SPA).

1832. WEATHERHEAD, G. H. Account of the Beulah Saline Spa at Norwood, Surrey: containing a description of its medicinal properties and effects, of the diseases in which it is remedial, and directions for its use. London, 8vo, pp. 39. *Bibl. Med.-Chir. Soc.*

The diseases in which these waters are remedial, according to Mr. Weatherhead, include dyspepsia, liver and bilious complaints, jaundice, chlorosis, hypochondriasis, chronic and strumous ophthalmia, skin diseases, scrofula, "and many other disorders too numerous to mention!" He had better have said at once "all the ills to which flesh is heir!" See notice in *London Med. Phys. Journ.*, vol. lxxvii, 1832, p. 244.

1832. MAXFIELD, A. Observations on the medical virtues of the Beulah Saline Spa, Norwood, and on the disorders in which it is most efficacious, especially those connected with derangement of the digestive organs. London, 8vo, pp. 82.

If reliance may be placed upon the analysis of these waters, made by Faraday and Hume, Mr. Maxfield has some ground for his assertion that "Beulah Spa is the most potent and valuable specimen of a saline spring that this country possesses, and is deserving of a higher reputation than any of them as a medicine." See *London Med. Phys. Journ.*, vol. lxxviii, 1832, p. 154.

1833. SCUDAMORE, SIR C. Vide "Buxton," 1820.

NOTTINGTON, DORSETSHIRE.

1792. GRAVES, R. On the Sulphureous Water at Nottingham, near Weymouth, with Observations relative to its application in the cure of diseases. Sherborne, 8vo. *Bibl. Radcliffe.*

1798. CRANE, J. Account of the nature, properties, and medical uses of the Mineral Water at Nottingham, near Weymouth.
London, 12mo, pp. 44.

PETERHEAD, ABERDEENSHIRE.

1636. M[OOR] A[NDREW]. ΠΙΔΑΞ ΠΕΤΡΕΙΑ (Pidax Petreia), or the Discoverie of St. Peter's Well at Peterhead, in Scotland, showing the admirable virtues thereof against many deplorable diseases, by A. M., Student in Medicine. Edinburgh, 8vo.

This work, which is very rare, is given on the authority of Dr. Macpherson, to whom I am indebted for a notice of it. There is a copy of it in the Advocate's Library, Edinburgh.

PITCAITHLY AND DUNBARNEY, PERTSHIRE.

1814. HORSLEY, W. Remarks on the Pitcaithly and Dunbarney Mineral Waters in Perthshire, illustrative of their composition and medicinal properties. London? 12mo.

PURTON, WILTS.

1861. BAKEWELL, R. H. A Visit to Purton Spa, with a short Account of the extraordinary properties and effects of its Sulphated and Bromiodated Spring. Loc.? 8vo? pp. 22.

These waters, which contain about 350 grains of saline matter to the gallon, chiefly of alkaline sulphates, with minute traces of iron, iodine, and bromine, are said to be pleasant to the taste, gently aperient, diuretic, and alterative, and probably will suit some persons who cannot afford to migrate to Carlsbad or Kissingen.—*Medical Times and Gaz.*, July 20th, 1861, p. 66.

QUARNDON. Vide "MATLOCK BATH," 1802.

RADNORSHIRE AND BRECONSHIRE.

- n. d. JONES, J. R., and PRYSE, J. Radnorshire and Breconshire Springs. Llanidloes.

ROAD, WILTS.

1731. WILLIAMS, S. An experimental history of Road Water, in Wiltshire, with a short mechanical account of its virtues, and of chronical disorders, in a Letter to the Rev. Dr. Derham. London, 8vo. *Bibl. Med.-Chir. Soc.; Med. Soc. Lond.*

SANDROCKS, ISLE OF WIGHT.

1812. LEMPRIERE, W. On the medicinal effects of an Aluminous Chalybeate Water lately discovered at Sand Rocks, in the Isle of Wight, pointing out its efficacy in the Walcheren and other diseases incident to soldiers who have been abroad, &c. London, 8vo. Ibid. 1820. Second ed. Newport, 1827, 12mo, pp. 67.

Review in *London Med. Phys. Journ.*, xxviii, 1812, p. 72. There is also a pamphlet by this author, without date, on the chalybeate spring at Chall, Isle of Wight, printed at Newport. Whether it is the same as the above I know not.

1817. WATERWORTH, T. L. Letter on the Aluminous Chalybeate Water at Sand Rocks, Isle of Wight. Isle of Wight, 12mo, pp. 28. *Bibl. Med.-Chir. Soc.*

SCARBOROUGH.

1660. WITTIE, R. Scarbrough Spaw, or description of its nature and virtues. London, 12mo. Idem, augmented with a relation of cures done by the Waters. York, 1667, 18mo.
Bibl. Med.-Chir. Soc. (both).

- 17—. SCHOFIELD, J. An historical and descriptive Guide to Scarborough. York, 8vo, pp. 192.
1734. SHORT, T. History of the Mineral Waters of Derbyshire, Lincolnshire, and Yorkshire, particularly those of Scarborough. London, 4to.
Bibl. Med.-Chir. Soc.; Radcliffe.
1734. SHAW, P. Enquiry into the virtues, &c., of the Scarborough Spaw Waters. London, 8vo. Appended to his translation of "Hoffmann on Mineral Waters." London, 1743.
Bibl. Med.-Chir. Soc.; Radcliffe.
1869. BREAREY, C. B. Medical Guide to Scarborough. Fourth ed. (27th thousand!).

A very useful little book for visitors. It gives a good account of the climate, and vital statistics of the town, with directions for sea-bathing and taking the waters.—*Medical Times and Gaz.*, Sept., 1869, p. 369.

SHADWELL.

1749. LINDEN, D. W. Directions for the use of Berry's Shadwell Spa in Sun Tavern Fields, Shadwell. London, 8vo.
Bibl. Med. Chir.-Soc.; Coll. Surg. Lond.
1777. BARNES, A. Essay on the virtues and properties of the Shadwell Spa. London, 8vo.
Bibl. Med.-Chir. Soc.

SHAP, WESTMORELAND.

1828. ALDERSON, R. A chemical analysis and medical treatise on the Shap Spa. Loc. (?)

The title of this pamphlet is cited from the "Handbook to Shap Spa," 4th ed. Dalston, 1866.

SOMERSHAM, HUNTINGDONSHIRE.

1759. LAYARD, D. P. An account of the Somersham Spa. London, 8vo. Ibid. 1767. *Bibl. Coll. Surg. Lond.; Med. Soc. Lond.*

The author's together with Dr. Morris's experiments with this water are inserted in the *Philosophical Trans.*, vol. liv, art. 3.

STOW-IN-THE-WOLD.

1808. FARMER, R. Analysis of the Carbonated Chalybeate, near Stow (in-the-Wold). Evesham, 8vo. *Bibl. Radcliffe.*

If this analysis is correct, this water contains considerably more iron and carbonic acid than either Tunbridge, Cheltenham, or even Spa.—*Lond. Med. Phys. Journ.*, vol. xxii, 1809, p. 246.

STRATFORD, WARWICKSHIRE.

1743. BAYLIES, W. Remarks on Perry's Analysis of the Stratford Mineral Water, with a short essay on the same waters.

Stratford-on-Avon, 8vo.

Bibl. Med.-Chir. Soc.; Coll. Surg. Lond.

1744. PERRY, C. An account of an Analysis made on the Stratford Mineral Waters, comprehending near thirty different experiments.

Northampton, 8vo.

STRATHPEFFER, ROSS-SHIRE.

1856. MANSON, D. On the Strathpeffer Spa. Inverness, 8vo, pp. 15.

1869. MANSON, D. On the Sulphur Waters of Strathpeffer, in the Highlands of Ross-shire. Inverness, 8vo, pp. 62. Second ed. London, 1877, 8vo, pp. 73.

A sensibly written *brochure* setting forth in a favorable light the virtues of this spa, which evidently deserves to take a high rank amongst sulphurous waters, whether British or Continental.

STREATHAM.

- . Anon. The Analysis of Streatham Waters: with experiments on Mineral Waters in general.

Sine loc. et ann.

Bibl. Coll. Surg. Lond.

SUNNING HILL.

1851. HOLMES, H. Sunning Hill Wells: or a Practical Inquiry into the action of Iron as a constituent of the blood in health and disease, in connexion with that Chalybeate Spring.

London, 8vo, pp. 103.

The first 97 out of the 103 pages of this *brochure* are taken up with the consideration of the uses of oxygen in the animal economy and a variety of other topics. At page 98 we first meet with a reference to Sunning Hill, at

the wells of which place, we are informed, iron exists in precisely that form in which it is met with in *venous* blood—viz. the carbonate of the protoxide—a circumstance which, according to the author, distinguishes that spring as a most effective chalybeate.—*London Med. Gazette*, Sept. 12, 1851, p. 509.

THETFORD.

1819. ACCUM, F. Guide to the Chalybeate Spring of Thetford, exhibiting the general and primary effects of Thetford Spa, &c. London, 8vo, pp. 159. *Bibl. Med. Soc. Lond.*

THORP-ARCH.

1819. HUNTER, A. *Vide* "Harrowgate," 1819.

TILBURY, ESSEX.

1737. ANDREE, J. An account of the Tilbury Water, containing a narrative of the medicinal qualities of this Spring, &c. London, 8vo. *Ibid.* 1740, 1764, &c.
Bibl. Radcliffe; Med.-Chir. Soc. (5th ed., 1781), *Med. Soc. Lond.* (Eds. 1737, 1740, 1764).

TREFRIW AND VALE OF CONWAY SPA (WALES).

1865. HAYWARD, J. W. The Vale of Conway Spa: its nature, property, and uses, mode of administration and season, origin, source, locality, and discovery. Liverpool, 8vo, pp. 36.
1872. HAYWARD, J. W. Guide to Trefriw and the Vale of Conway Spa. Second edition. London, 8vo, pp. 64.

In this *brochure* the author sets forth the virtues of this comparatively little known Welsh Spa, and considering its character (chalybeate-aluminous) there is no doubt that it is capable in many cases of debility of effecting much of the good attributed to it by Dr. Hayward.

TUNBRIDGE WELLS.

1633. ROWZEE, L. The Queen's Wells: that is, a Treatise on the nature and virtues of Tunbridge Water, together with an enumeration of the chiefest diseases which it is good for, and against which it may be used, and the manner and order of taking it. London, 12mo. Alt. ed. 1656, 1670, 1671, 12mo, pp. 82.

Reprinted in vol. viii of the *Harleian Miscellany*.

1687. MADAN, P. Essay on the Waters of Tunbridge. London, 4to. *Bibl. Med.-Chir. Soc.; Med. Soc. Lond.*
1725. ROUSE, L. Tunbridge Wells, or a Directory for the drinking of those waters, &c. London, 12mo. *Bibl. Med.-Chir. Soc.; Med. Soc. Lond.*
1760. SMITH, HUGH. On the use and abuse of Mineral Waters: also Rules necessary to be observed by individuals who visit the Chalybeate Spring of the Old and New Tunbridge Wells. London, 8vo.

Vide "Islington."

WIGHT, ISLE OF.

1820. SCUDAMORE, SIR C. *Vide* "Buxton," 1820, also "Sandrocks."

WILLOWBRIDGE, STAFFORDSHIRE.

1676. GILBERT, S. Fons Sanitatis; or the healing Spring of Willowbridge, in Staffordshire, found out by Lady Jane Gerard, Baroness of Bromley, published for the common good by Samuel Gilbert, Rector of Quatt. London, 12mo.

For a more recent and rather full account of this spring see Owen, "British Mineral Waters," p. 312, who quotes passages from Dr. Plot's "Natural History of Staffordshire" respecting its virtues.

WINGATE.

1792. DAVIDSON, S. History and properties of Wingate Spaw. London, 12mo. *Bibl. Med. Soc. Lond.*

WITHAM, ESSEX.

1737. TAVERNER, J. An Essay on the Witham Spa, or a brief enquiry into the nature, virtues, and uses of a Mineral Chalybeate Water at Witham. London, 8vo. *Bibl. Med. Soc. Lond.*

WORCESTERSHIRE.

1740. SHORT, T. *Vide* "British Mineral Waters," 1740.
1834. HASTINGS, SIR C. Illustrations of the Natural History of Worcestershire, &c., including also a short account of its Mineral Waters. London, 8vo, pp. 184.
1835. HASTINGS, SIR C. On the Salt Springs of Worcestershire; a Lecture. London, 8vo.

Both the general reader and the geological will find matter in this lecture to interest him.—*London Med. Gazette*, August, 22nd, 1835. *Vide* "Droitwich."

WOODHALL, LINCOLNSHIRE.

1867. CUFFE, R. *The Woodhall or Iodine Spa.* London, 8vo.
Third ed. London, 1868, 8vo, pp. 27.

Contains a simple and interesting account of this spa, which, from its constituents and from the recorded experience of Mr. Cuffe, is evidently an agent of no mean value in all that class of cases usually benefited by the iodides and bromides.

MINERAL WATERS OF IRELAND.

1684. BELLON, P. *The Irish Spaw: being a short discourse on Mineral Waters in general...and a brief account of the Mineral Waters at Chappel-Izod, near Dublin.* Dublin, 12mo.
Bibl. Coll. Surg. Lond.

1724. TAAFE, —. *On the Mineral Spring at Ballyspellan.*

So high was the repute of this water at the time of the publication of this work that it was emphatically called "The Irish Spa." For an amusing notice of it, and of the poetical contest about it between Dr. Sheridan and Swift, see *Dublin Quart. Journ. Med. Sci.*, vol. iii, p. 260.

1772. RUTTY, J. *Natural History of the County of Dublin...and of some lately discovered Mineral Waters, particularly the Sulphureous Water at Lucan, and its medicinal virtues, &c.*
Dublin, 2 vols. 8vo.

1781. ELLIOT, J. *Vide "Great Britain,"* 1781.

1825. RYAN, M. *Treatise on the most celebrated Mineral Waters of Ireland, &c., and of the Spa lately discovered at Brownstown, near Kilkenny.* Kilkenny, 8vo.

1845. KNOX, A. *The Irish Watering Places, &c., with analyses of the principal Mineral Springs by R. Kane.*
Dublin, 12mo, pp. 336. *Bibl. Med-Chir. Soc.*

A useful, well-written, learned, and amusing work, containing in a small compass a great mass of information about our national watering places.—*Dublin Journ. Med. Sci.*, xxvii, 1845, p. 468.

1846. KNOX, A. *The Ballynahinch Mineral Waters.*
Belfast, 12mo, pp. 47.

1856. APJOHN, J. *The Spas of Lisdoonvarna, with a report, and analysis thereon.*
Dublin, 8vo, pp. 27.

A very interesting little pamphlet, containing a complete analysis of the sulphur and chalybeate spas which exist in County Clare, near one of the best sea-bathing districts on the west coast of Ireland.—*Dublin Quart. Journ. Med. Sci.*, November, 1856.

1867. FAUSSET, W. Mineral Springs of Lisdoonvarna, County Clare. Dublin, 8vo, pp. 20.
1871. MAPOTHER, E. D. Lisdoonvarna Spa and Sea Side Places of Clare. Dublin, 8vo, pp. 47. Second ed. 1872. Third ed. 1876.
A thoroughly reliable guide to this spa.—*Dublin Quart. Journ. Med. Sci.*, August, 1871, p. 189.
1872. LABAT, A. Étude hydrologique du pays de Galles et d'Irlande. Paris, 8vo, pp. 31.

Chaulmoogra.

1878. LEPAGE, R. C. Papers on the plant *Gynocardia odorata*, from which the Chaulmoogra Oil is obtained.

London, 8vo, pp. 32.

This pamphlet, as indicated by the title, is simply a collection of papers from medical and other publications on the chaulmoogra, and its uses in leprosy, skin diseases, &c., in which it has long been an established remedy amongst the natives of India. The only point of novelty in the pamphlet is the announcement, on the authority of Mr. R. Jones, late of Calcutta, that it is "a specific in consumptive cases!" This statement is partly explainable by the fact that *cod-liver oil* is the vehicle advised for its administration!

INDEX OF DISEASES.

The figures indicate dates (unless otherwise stated) at which, under the respective articles, mention of the disease occurs.

Where a small numeral between brackets occurs after a date, it signifies the number of works on the subject published in that year.

Abortion. Chloral (with opium), 1873. Opium, 1864. See also *Labour, premature.*

Abdomen, tubercular disease of. Iodine, 1824.

Abscess. Special Therapeutics, 1856 (Joachim). Antiseptics, 1875. Caustics, 1779. Collodion, 1854. Ferrum, 1738. Iodine, 1831, 1839, 1848, (injections of) 1853, 1854. Salix, sp. of, 1792.

"Absinthisme." Alcohol, 1864. Artemisia absinthium (Absinthe) 1862, 1864, 1867, 1871.

Acids, mineral, poisoning by. Acids, 1804, 1872 (in Addenda, p. 806).

Aene. Hydrargyri iodidum, 1857. Sapo, 1875.

Acute Diseases. Special Therapeutics, 1810 (Aubry). Alteratives, 1859. Purgatives, 1775, 1834, 1852. Stimulants, 1860. Vesicants, 1768. Alcohol, 1867, 1872. Antimonium tartaratum, 1806. Hydrargyrum (Ptyalism), 1824. Phosphorus, 1818. Quinine, 1857. Vinum, 1600. Water, 1863, 1874.

Ague. See *Fever, intermittent.*

Air-passages. See *Lungs.*

Albuminuria. Diuretics, 1864. Alcohol (as a cause of), 1874. Calcis phosphas, 1868. Iodine, 1869. Nitric acid, 1843.

Alcoholismus. Alcohol, 1851 (Huss), 1855 (Monguzzi), 1860 (Racle, Marcet), 1864 (Voisin), 1866 (Juliano), 1867 (Foville), 1868 (Leclère), 1869 (Gachet), 1870 (Langlois), 1870 (Bouvet), 1871 (Castoldi), 1872 (Marty), 1873 (Troyon), 1873 (Gambus), 1873 (Magan), 1874 (Pauchon), 1875 (Marfaing), &c.

Alkalies, poisoning by. Alkalies, 1842.

Amaurosis. Alcohol (as a cause of), 1850. Arnica, 1773. Hydrargyrum (Ptyalism), 1713. Strychnia, 1835, 1871. Veratria, 1834.

Amblyopia. Alcohol (as a cause of), 1850, 1868. Iodine, 1857. Strychnia, 1871. Tabacum (as a cause of), 1868.

Amblyopia nicotinicæ. Quinine, 1873 (3).

Amenorrhœa. Art. "Emmenagogues," p. 159. Ammonia, 1823. Ammonii chloridum, 1796. Apioi, 1855, 1864. Ferri iodidum, 1834. Juniperus communis, 1818. Ruta graveolens, 1818. Solanum Dulcamara, 1771. Strychnia, 1830.

Anæmia. Ferrum, 1863. Ferri acetat, 1866. Ferri lactas, 1840. Sea-water (internally), 1875.

Anasarca. See *Dropsy.*

Aneurism. Antiphlogistics, 1826. Digitalis, 1819, 1875. Ferri perchloridum, 1854 (2), 1855, 1857, 1858. Iodine (Iod. of potassium), 1863.

"*Angine couenneuse.*" See *Laryngismus stridulus*.

Angina laryngea. See *Croup*.

Angina pectoris. Special Therapeutics, 1865 (Ullersperger), Aconitum napellus, 1845.

Anthrax. See *Carbuncle*.

Anus, affections of. See *Rectum*.

Aphonia. Topical Medication, 1854.

Aphthæ, and Aphthous ulceration. See *Stomatitis*.

Apoplexy. Special Therapeutics, 1691 (Camper), 1791 (Bezold), 1811 (Richelmi), 1866 (Mushet), Ammonia, 1777, 1779. Antimonium tartaratum (as preventive), 1817. Coffea Arabica (Coffee as a predisposing cause), 1718. Oxygen, 1868. Sodæ carbonas (alkalies), 1854.

Arsenic, ill effects of, and poisoning by. See "Arsenic, Toxicology of," p. 263.

Articular affections. See *Joints*.

Arthritis. See *Gout*.

Ascarides. See *Worms*.

Ascites. See *Dropsy*.

Asphyxia. Special Therapeutics, 1825 (Plisson). Ammonia, 1777, 1779 (against). Oxygen, 1784. Tabacum (glysters of), 1797.—*From Carbonic acid and Charcoal fumes*, p. 311.—*From Drowning.* Special Therapeutics, 1799 (Bloesch) Tabacum (enemas of tobacco smoke), 1785, 1797.

Asthma. Special Therapeutics, 1752 (Wendt). Inhalation, 1829, 1830, 1837, 1847. Diaphoretics, 1705. Diuretics, 1623. Purgatives, 1696. Nitrite of Amyl, 1873. Antimonium tartaratum, 1817. Assafœtida, 1769. Colchicum, 1763, 1777. Datura Stramonium, 1811 (2) 1835, 1836. Digitalis, 1785, Gambogia, 1628. Gratiola officinalis, 1813. Hydrocyanic acid, 1819, 1820. Ipecacuanha, 1774. Lobelia inflata, 1829, 1830. Mentha, 1767. Oxygen, 1845, 1868. Phellandrium aquaticum, 1771. Scilla maritima, 1722, 1737, 1759. Senega, 1782. Sinapis (sinapisins), 1636. Tabacum (smoking), 1610, 1648, 1700. Taraxacum, 1754. Valeriana officinalis, 1828. Zinci sulphas, 1791. Water, 1689.

Ataxy, progressive locomotor. Arsenic, 1865. Argenti nitras, 1862, 1863. Phosphorus, 1868, 1869.

Atrophy. Glechoma hederacea, 1787.

Atropia-poisoning. See *Belladonna*.

Belladonna, poisoning by. Atropa Belladonna, 1810, 1869. Opium, 1810, 1866, 1869. Physostigma venenosum (as antagonistic to Atropia), 1870, 1872, 1875.

Bilious and Biliary affections. See *Liver and Gall-stones*.

Bladder, affections of. Diuretics, 1713. Camphor (and Hyoseyamus), 1826. Cantharides, 1698, 1808. Carbonic acid, 1864. Terebinthina, 1699, 1818, 1819. Uva Ursi, 1764. Veronica officinalis, 1694.—*Paralysis of.* Cantharides, 1808. Ergot, 1860.—*Hæmorrhage from.* See *Hæmaturia*.—*Inflammation of.* See *Cystitis*.

Blenorrhagia. See *Gonorrhœa*.

"*Blépharite ciliare*" Special Therapeutics, 1873 (Hermanowicz).

Bones, affections of. Argenti nitras, 1871. Iodine, 1831. Juglans regia, 1841. Morrhuæ oleum, 1843. See also *Caries*, *Exostosis*, and *Syphilis*.

Bowels, affections of. Egle Marmelos, 1853, 1854. Ailantus excelsa, 1870. Carbo vegetab., 1855, 1865.—*Spasms of.* Linum (linseed oil), 1767.—*Obstructions of.* Hydrargyrum (erude mercury), 1786. Serum Lactis, 1664.—*Constipation of.* See *Constipation*.

- Brachialgia.* Morphia (hypodermically), 1872.
- Brain, diseases of.* Special Therapeutics, 1825 (Guérin), 1844 (Pinel), 1854 (Leubuscher). Nareotics, 1654. Tonics, 1843. Hydrocyanic acid, 1825.—*Softening of.* Special Therapeutics, 1862 (Romand-Picquand).—*Irritation of.* Thea Chinensis (green tea), 1827.—*Inflammation of.* See *Meningitis*.
- Breast.* See *Mamma*.
- Bright's Disease.* Special Therapeutics, 1856 (Welenzas) Lac (Skim-milk), 1871. Nitric acid, 1843.
- Bronchitis.* Inhalation, 1837, 1841. Antimonium tartaratum, 1845. Oxygen, 1868. Sulphur (inhalations), 1866. Tabacum (snuff-taking as a preventive), 1870.—*Acute.* Nitrite of Amyl, 1873. Phystostigma venenosum, 1863.—*Chronic.* Morphia, 1856. Phellandrium aquaticum, 1828.
- Bronchocele.* Hypodermic method, 1875. Ferri iodidum, 1834. Iodine, 1821, 1824, 1825, 1838, 1848 (Injections iodées), 1872 (ditto). See also art. "Strychnia," 1830.
- Bruises.* Arnica, 1719. Sibura (Oil of laurel), 1830.
- Bubo.* Special Therapeutics, 1820 (Müller). Emollients (cataplasms), 1819. Vesicants, 1862. Iodine, 1854.—*Suppurated.* Injections into closed cavities in, 1847. Iodine (injections), 1847.
- Burns and Scalds.* Special Therapeutics, 1843 (Winder). Ammonia, 1777. Argenti nitras (externally), 1850. Carbolic acid (Phénol sodique), 1865. Collodion, 1854. Gossypium (Cotton), 1831. Iodine (locally), 1839. Momordica Balsamina, 1720. Succinum (Vernix succinata), 1783. Typha latifolia, 1833. Water (as sole dressing), 1816.
- Cachexia.* Special Therapeutics, 1834 (Brandis). Arsenic, 1865, 1866. Carbonic acid, 1779.—*Arising from Intermittent Fever.* Cinchonine, 1816.
- Calculous Affections.* Special Therapeutics, 1806 (Malvigne), 1816 (Marie de Saint-Ursin), 1821 (Feuner). Cantharides, 1741. Carbonic acid, 1778, 1779, 1787. Citrus (Lemon juice), 1653. Guaiacum, 1536. Hypericum perforatum, 1716. Juniperus communis, 1864. Lithium (salts of), 1873. Pareira Brava, 1719. Ol. Ricini, 1764. Saps (Scap lye), 1745. Sodæ bicarbonas, 1826. Sulphuric acid, 1780. Tabacum, 1669. Thea Chinensis, 1684. Water, 1724. Bristol mineral waters, 1652.
- Calculi, solvents of.* Art. "Lithontriptics," p. 163. Aq. Calcis, 1743, 1764. Carbonic acid, 1777. Gastric juice, 1802. Uva Ursi, 1764.—*Renal.* Lithium (salts of), 1873.
- Cancer.* Special Therapeutics, 1856 (Parker), 1871 (Devergie), 1872 (Arnott). Intraleptic method, 1856. Hypodermic method, 1869. Local Anæsthetics (cold), 1851. Canstics, 1856, 1868. Acetic acid (subcutaneous injection of), 1866. Aconitum napellus, 1762, 1845. Arsenic, 1774, 1809, 1816. Arsenical paste, 1817 (ditto); 1820, 1825, 1810. Atropa Belladonna, 1739, 1760, 1765, 1826. Aq. Calcis, 1769. Calcis carbonas, 1802. Carbolic acid, 1865. Carbonic acid, 1794. Cimicifuga fetida, 1774. Cinchona, 1746. Clematis erecta, 1769, 1777. Conium, 1760, 1761 (3), 1763 (3), 1764 (2), 1765, 1766 (2), 1767 (2), 1771. Conia, 1852. Cundurango, 1873. Ferri carbonas, 1806. Gastric juice (locally), 1869. Hydrargyrum, 1682, 1755, 1756. Lac (milk diet), 1749. Lacerta, sp. of, 1782, 1784 (2), 1785. Nitric acid (locally), 1847. Onopordum acanthium, 1739. Oxygen, 1868. Plocaria helminthocorton, 1822. Potassæ nitras, 1820. Sanguinaria Canadensis, 1857. Sedum acre, 1784. Zinci chloridum, 1835, 1836, 1862, 1866.
- Carbon, Sulphuret, injurious effects of.* Caoutchouc, 1856 1863. Art. "Sulphuret of Carbon," 1867, 1872, 1874.
- Carbuncle.* Cinchona, 1866. Iodine (locally), 1839. Juglans regia, 1857.
- Carcinoma.* See *Cancer*.
- Cardialgia.* Bismuth, 1792. Lactuca (virosa), 1837.

Caries. Special Therapeutics, 1868 (Magitot). *Artemisia moxa* (Moxa), 1817, Barium, 1851. Conium, 1761. Oleum Morrhuæ, 1861, 1869. Phosphoric acid, 1802, 1808. Ol. Terebinthinæ, 1869.

Cataract. Special Therapeutics, 1853 (Richard). *Aconitum napellus*, 1856. *Arnica*, 1856. Phosphorus, 1871.

Catarrhal Affections. Inhalation, 1829, 1855. *Digitalis*, 1801. *Euphrasia officinalis*, 1857. Hydrocyanic acid, 1819. Opium, 1691. Sulphur, 1815. Tabacum, 1693. Vinum, 1644. Water, 1776. Sea-water, 1868.

Cerebral Affections. See *Brain, affections of.*

Cerebral Congestion. Arsenic, 1863, 1870. Sodæ carbonas (alkalies), 1854.

Chancre. Special Therapeutics, 1861-2 (Rollet), 1874 (Daffner).—*Phagedenic.* Calomel, 1862, 1868.

Charcoal, burning, noxious effects of. Art. "Carbo. vegetabilis," p. 311. Carbonic acid, 1782, 1785.

Cherry-laurel, poisoning by. See *Prunus Laurocerasus*, p. 644.

Chilblains. Collodion, 1854. Iodine, 1839.

Children, Diseases of. See *Infancy.*

Chlorosis. Special Therapeutics, 1823 (Kummer), 1826 (Hildebrand). Purgatives, 1805. Arsenic, 1865. Ferrum, 1761, 1832, 1839, 1847, 1863. Ferri bromidum, 1875. Ferri iodidum, 1834. Ferri lactas, 1840. Ferri sulphas (et Potassæ carb.), 1832. *Gratiola officinalis*, 1775. Phosphorus, 1815. Sea-water (internally), 1875. Bath mineral waters, 1800.

Cholera. Special Therapeutics, 1832 (Bartels), 1832 (Prost), 1835 (Pullino), 1837 (Perone), 1838 (Schartler), 1849 (Henriques), 1860 (Lichtenstein), 1865 (Pacini), 1868 (Toffoletto), 1871 (Robbe). Fumigation, 1836. Venous injections, 1855, 1866, 1873, 1874. Acids, 1854. Alkalies, 1832, 1850. Anthelmintics, 1874. The Chlorides (as prophylactic), 1832. Cholagogues, 1866. Disinfectants, 1832, 1867, 1871. Evacuants, 1866. Metals, 1853. Purgatives, 1849. Salines, 1832, 1864, 1866. *Aconitum napellus*, 1866. *Ailantus excelsa*, 1870. Alcohol, 1833. Antimonium tartaratum, 1833 (in Addenda, p. 808), 1834. Argenti nitras, 1849. Arsenic, 1871. Bismuth, 1831, 1832. Calcis carbonas, 1855. *Calumba radix*, 1854. Camphor, 1848, 1853, 1857. *Cannabis sativa*, 1839. *Cantharides* (externally to abdomen), 1830. Carbolic acid, 1865. Carbonic acid, 1831, 1836. Chloral (?), 1873. Chlorine, 1831, 1835, 1849, 1867. Chloroform, 1856. Collodion (to abdominal surface), 1869. Cnprum (prophylactic and curative), 1853, 1867 (2), 1873. *Drosera rotundifolia*, 1867. Ergot, 1849. Ether (sulphuric), 1857. Ferri ammonio-citras, 1867. Ferri citras, 1868. Ferri perchloridum, 1866. Calomel, 1833, 1834, 1850, 1866 (in Addenda, p. 809). *Hydrargyri sulphuretum nigrum*, 1872, 1875. Hydrocyanic acid (connection between), 1868, 1874. *Juniper communis* (oleum), 1831. *Mastranzo*, 1860. *Mikania Guaco*, 1832, 1853. Peroxide of nitrogen, 1831, 1832. Opium, 1830, 1832. Oxygen, 1832 (2), 1849, 1855. *Platanus orientalis*, 1837. Liquor Potassæ, 1834. Quassia (hypodermically), 1859. Quinine, 1836 (as a preservative), 1865. *Rhubarb*, 1628. *Sinapis* (sinapisms), 1865. *Strychnia* 1854 (3). Sulphur, 1849, 1854, 1866. Sulphuric acid, 1854, 1855. *Sumbul*, 1850. Tannin, 1848. *Zinci valerianas*, 1856. Water, 1849, 1853, 1854 (hot water applications), 1855, 1862 (copious draughts of).—*Infantile.* Alcohol, 1873.

Chorea. Purgatives, 1805. Antimonium tartaratum (externally), 1822. Arsenic, 1867, 1868. *Atropiæ valerianas*, 1866. Chloral, 1869. Eserine, 1875. Ether (spray of, to spine), 1875. Hyoscyamine, 1875. Iodine, 1825. Potassii bromidum, 1870. *Viscum album*, 1719. Zinc, 1812.

Chronic Diseases. Special Therapeutics, 1805 (Giraudy), 1844 (Debreyne), Fumigation, 1862. Alteratives, 1859. Purgatives, 1805, 1834. Conium, 1765. 1771. Ferrum, 1751. Serum Lactis (whey-cure), 1860. Phosphorus, 1818. *Rhubarb*, 1771. Water, 1863. Bath mineral waters, 1822, 1850. Bristol waters, 1739.

Circulatory Organs, affections of. Special Therapeutics, 1861 (Günzburg).

Colic. Special Therapeutics, 1820 (Marmet). Purgatives, 1684. Chloroform, 1857. Cocos Maldivica, 1634. Conium, 1763. Mentha, 1767. Opium, 1784. Ricinus (Castor oil), 1806. Tabacum, 1785.—*Hepatic.* Chloroform, 1861. Ol. Terebinthinæ (with sulphuric ether), 1790.

Colica pictonum. Antiphlogistics, 1826. Atropa Belladonna, 1850. Ferri carbonas, 1844. Linum (Linseed oil), 1767. Ricinus (Castor oil), 1764.

Colour-blindness. Alcohol (as a cause of), 1871. Tabacum (ditto), 1871.

Condylomata. Chloracetic acid, 1868.

Conjunctiva, affections of. Calomel, 1832.

Constipation. Emetics, 1822.—*Habitual.* Enemas 1830. Fel (Ox-gall), 1846.

Consumption. See *Phthisis.*

Contagious Diseases, prevention and cure of. Art. "Disinfectants," p. 149. Sulphur (sulphurous acid gas), 1866. Chlorine, 1833.

Convulsions and Convulsive Diseases. Special Therapeutics, 1717 (Fischer), 1792 (Moritz). Antiphlogistics, 1872. Cannabis sativa, 1839. Chloroform, 1859. Cocos Maldivica, 1634. Datura Stramonium, 1772, 1777. Hyoseyamus 1777. Hyoseyamine, 1873. Moschus, 1780. Opium, 1805. Rhus radicans, &c., 1799. Viscum album, 1719, 1783. Zinci sulphas, 1772.—*Puerperal.* Chloral, 1873, 1874. Chloroform, 1867, 1871. Ergot (as predisposing to), 1842. Potassii bromidum, 1870.—*Infantile.* Cannabis sativa, 1839.

Cornea, ulcers of, &c. Special Therapeutics, 1870 (Saemisch). Calomel, 1832.

Copper Poisoning. See art. "Cuprum," p. 392. Saccharum, 1832.

Corrosive Sublimate Poisoning, p. 501.

Coughs. Inhalation, 1830, 1837. Antimonium tartaratum (externally), 1808. Colchicum, 1763. Euphrasia officinalis, 1857. Gratiola officinalis, 1813. Hydrocyanic acid, 1819 (2). Hyoseyamus, 1777. Ipecacanha, 1774. Lichen pyxidatus, 1785. Lobelia inflata, 1829.—*Convulsive.* See *Pertussis.*

Coxalgia. Special Therapeutics, 1867 (Philippeaux).

Croup. Special Therapeutics, 1816 (Krieger), 1865 (Herland). Inhalation, 1829, 1834, 1867. Emetics, 1867. Topical remedies, 1834, 1849, 1854. Alum, 1867. Antimonium tartaratum, 1867, 1872. Argenti nitras, 1849, 1867. Moxa, 1826. Carbolic acid, 1873. Copaiba, 1866. Cubebs, 1866. Cuprum, 1852. Ferri perchloridum, 1859, 1869. Glycerine, 1870. Hydrargyri sulphuretum, 1867, 1868. Lactucarium, 1820. Potassii sulphuretum, 1815. Sodæ biboras, 1860.

Crusta lactea (Porrijo larvalis). Viola tricolor, 1779.

Cynanche maligna. Acetum, 1772. Ammonia (carb. of), 1802. Cinchona, 1786.—*Trachealis.* See *Croup.*

"*Cystite ammoniacale.*" Benzoic acid, 1874.

"*Cystite hémorrhagique.*" Balsamics, 1861.

Cystitis, chronic. Argenti nitras (injections of), 1849, 1872.

Cysts, sebaceous. Antimonium tartaratum (injections of), 1872.

Dartre. See *Herpes.*

Deafness. Ether, 1860 (2). Glycerine, 1851. Iodine, 1825.—*Nervous.* Hydrargyrum, 1822.

Debility. Special Therapeutics, 1820 (Rousseau). Argenti oxidum, 1852. Eupatorium perfoliatum, 1813. Vinum, 1721 (Hungarian wines), 1721, 1759.—*Nervous.* Oxygen, 1800, 1845.—*Diseases of indirect.* Hydrargyrum, 1797. Phosphorus, 1800.

Delirium. Camphor, 1763. Datura, 1762. Hyoseyamus niger, 1762. Opium, 1809.—*Traumatic.* Opium (endermically), 1836.

Delirium Tremens. Special Therapeutics, 1829 (Neuberth). Inunction, 1850. Alcohol (treatment without stimulants or opiates), 1854. Arsenic, 1867. Can-

nabis sativa, 1839. Datura Stramonium, 1762. Digitalis, 1835, 1866. Opium, 1864. Physostigma venenosum, 1863. See also *Alcoholismus*.

Diabetes and Diabetes mellitus. Special Therapeutics, 1803 (Dietrel), 1828 (Stosch), 1865 (Grünbaum, 1869 (Brouardel), 1871 (Durand-Fardel), 1873 (Lecorché), 1873 (Foster), 1874-5 (Külz). Arsenic, 1871. Creasote, 1835. Ergot, 1867. Iodine, 1865. Lac (Ass's milk), 1672, 1871 (Skim-milk). Morphia, 1873. Opium, 1820. Oxygen, 1868. Rhubarb, 1733, 1737. Sea-water (internally), 1875. Bristol mineral waters, 1740.

Diarrhœa. Ægle Marmelos, 1853, 1854. Antimonium, 1833. Chrome (sesquioxide of), 1868. Hæmatoxyton, 1780. Ipecacuanha, 1706. Kalmia latifolia, 1802. Kino, 1757. Krameria, 1822. Lac (Milk diet), 1872, 1873. Monesia, 1839. Plumbum (enemas of acetate of lead), 1855. Rhubarb, 1567, 1752. Simaruba, 1730, 1758. Sulphuric acid, 1854. Zinci oxidum, 1874. —*Chronic or Habitual*. Argenti oxidum, 1852. Ergot, 1859. Fel (Ox-gall), 1846. Strychnia, 1830.—*Choleraic "cholérine."* Cholagogues, 1866. Chlorine, 1867. Collodion (to abdominal surface), 1869. Sulphuric acid, 1854.

Digestive Organs, affections of. Special Therapeutics, 1857 (Delore et Thurnam), 1875 (Tropea). Enemas, 1832. Emetics (improper use of in), 1806. Lactates, alkaline 1862 (2). Carbo vegetab., 1855, 1865. Carbonic acid, 1864. Centaurea centaurium, 1765. Cornus coccinata, 1828. Fel (Ox-gall), 1846. Potassæ acetat., 1869. Serum Lactis (whey-cure), 1860. Rhubarb, 1865. Cheltenham waters, 1821. See also *Stomach, affections of*.

Diphtheria. Special Therapeutics, 1871 (Fleury), 1875 (De Petri). Balsamics, 1874, 1875. Caustics, 1875. Permanganates (locally), 1866. Sulphites, 1869, 1874. Calcis phosphas, 1868. Copaiba, 1866. Cubebs, 1866, 1870. Ferri perchloridum, 1864, 1867. Hydrargyri cyanidum, 1868. Potassæ chloras, 1856, 1862. Quinine (as a gargle), 1875. Sulphur, 1866, 1874.

Diplopia. Special Therapeutics, 1863 (Giraud-Teulon).

Dislocations, to reduce. Anæsthetics, 1857. Chloroform, 1848.

Dropsy. Special Therapeutics, 1617 (Bertram), 1804 (Döring), 1824 (Venables), 1862 (Fourès), 1865 (Cantani). Inunction, 1822, 1850. Injections into closed cavities, 1850. Diaphoretics, 1715. Diuretics, 1681, 1720, 1786. Purgatives, 1825, 1860. Asarum Europæum, 1721. Caineæ radix, 1827, 1828, 1831. Cajeputi oleum, 1754. Cimicifuga foetida, 1774. Cinchona, 1738, 1740, 1782, 1809. Colchicum, 1763, 1764, 1777. Colocynthis, 1822. Digitalis, 1785, 1789, 1790, 1799, 1807, 1809, 1826. Gambogia, 1628, 1638, 1777. Guaiacum, 1536. Hydrargyrum, 1820. Calomel, 1780. Iodine, 1832, 1850 (injections of), 1858 (2), ditto; 1861 (ditto); 1866 (ditto); 1870 (ditto). Lac (Milk), 1832, 1871, 1872. Opium, 1754. Potassæ acetat., 1857. Pyrola umbellata, 1814. Saccharum (sugar), 1845. Scilla maritima, 1715, 1722, 1759, 1797, 1871. Senega, 1782. Sodii chloridum, 1702. Solanum (nigrum), 1757. Spartium scoparium (Broom seed), 1783, 1835. Tabacum, 1648, 1785. Taraxacum, 1754. Thea Chinensis, 1692. Veratria, 1834.—*Scarlatinal*. Antimonium tartaratum, 1834.

Drowning. See *Asphyxia from drowning*.

Drunkeness. See *Ebrietas*.

Dysentery. Special Therapeutics, 1801 (Harles), 1828 (Malik). Enemas (large), 1833, 1849, 1850. Astringents, 1626. Cholagogues, 1866. Diuretics, 1643. Emetics, 1803. Evacuants, 1800. Purgatives, 1709. Aconitum napellus, 1819. Ægle Marmelos, 1853, 1854. Argenti nitras, 1861, 1871. Atropa Belladonna, 1866. Bismuth, 1866, 1869. Calcis chloridum, 1827. Carbonic acid, 1836. Cocos Maldivica, 1634. Creasote, 1855. Ergot, 1859. Ferri perchloridum, 1858. Hæmatoxyton, 1780. Hydrargyrum, 1784, 1815, 1846. Hydrargyrum (Ptyalism), 1824. Calomel, 1825, 1865. Hydrarg. corrosivum sublimatum, 1738. Iodine (injections of), 1853. Ipecacuanha, 1688, 1690, 1696, 1698, 1705, 1706, 1732, 1745, 1764, 1774, 1872, 1875. Krameria, 1799 (?), 1822. Lac (milk), 1645, 1873 (3). Serum Lactis (whey), 1636, 1653. Lactuca, sp. of, 1780. Narcissus pseudo-narcissus, 1833. Opium, 1656, 1703, 1795, 1875. Opuntia Indica 1808. Orchis (Salep), 1738. Piper Betle, 1804. Plumbum (enemas of

acetate of lead), 1855. *Quercus* (acorns), 1782. *Rhubarb*, 1567, 1752, 1800. *Simaruba*, 1738. *Sodæ sulphas*, 1875. *Tabacum*, 1785.—*Camp or Scorbutic*. *Creasote*, 1855.

Dysmenorrhœa. *Apiol*, 1864.

Dyspepsia. *Ægle Marmelos*, 1853. *Argentii oxidum*, 1852. *Chiretta*, 1830. *Fel* (Ox-gall), 1846. *Ferri iodidum*, 1834. *Hydrocyanic acid*, 1820. *Ipecacuanha*, 1806. *Maltine*, 1874. *Oxygen*, 1868. *Pancreatin*, 1874. *Pepsin*, 1854, 1856, 1858, 1874. *Quassia*, 1799. *Sinapis* (white mustard seed), 1826. *Strychnia*, 1835. *Bath mineral waters*, 1800.

Dyspnœa. *Special Therapeutics*, 1721 (Ludolph).

Dysphagia. *Iodine*, 1825.

Dysuria. *Purgatives*, 1696. *Tabacum*, 1785.

Ear, affections of. *Special Therapeutics*, 1863 (Triquet), 1868 (Menière). *Astringents*, 1866.

Ebrietas. *Ammonia*, 1820. *Amygdalus* (bitter almonds), 1586.

Eczema. *Hydrargyrum*, 1875 (in *Addenda*, p. 809).

Elephantiasis. *Arsenic*, 1803.

Ephidrosis. *Aconitum napellus*, 1855.

Emissions, nocturnal. *Ferri sulphas*, 1763.

Entozoa. *Special Therapeutics*, 1817 (Lundborg).

Epidemic Diseases. *Prophylactics*, 1813, 1815, 1852, 1873.

Epilepsy. *Special Therapeutics*, 1858 (Wittmaack). *Anodynes*, 1724. *Art. "Anti-epileptics,"* p. 129. *Narcotics*, 1769. *Amanita muscaria*, 1778. *Ammonia*, 1851. *Nitrite of Amyl*, 1875. *Argentii nitras*, 1826. *Argentii oxidum*, 1852. *Moxa*, 1827. *Artemisia vulgaris*, 1825, 1827. *Atropa Belladonna*, 1783. *Atropiæ valerianas*, 1858. *Citrus* (orange leaves), 1766. *Cocos Maldivica*, 1634. *Convallaria majalis*, 1737. *Creasote*, 1835. *Cuprum* (Ammoniacal sulphate of copper), 1851, 1870. *Datura Stramonium*, 1762, 1777. *Dictamnus albus*, 1777. *Digitalis*, 1785, 1823, 1841, 1860. *Guaiaicum*, 1536, 1593. *Hyoseyamus*, 1762. *Indigo*, 1834. *Oleum animale empyreumaticum*, 1725, 1732. *Oxygen*, 1800, 1868. *Pœonia officinalis*, 1680. *Phosphorus*, 1851. *Picrotoxiue*, 1875. *Potassii bromidum*, 1865, 1867, 1868, 1869, 1871. *Rhus radicans*, &c., 1799. *Strychnia*, 1867, *Strychnos Ignatii* (St. Ignatius' Bean), 1793. *Strychnos nux vomica*, 1788. *Sumbul*, 1850. *Thea Chinensis*, 1672. *Valeriana officinalis*, 1828. *Viscum album*, 1719, 1806. *Zinci sulphas*, 1772, 1870. *Zinci lactas*, 1856.

Épilepsie absinthique. *Artemisia absinthium*, 1871.

Epistaxis. *Ergot*, 1831.

Ergotism. *Art. "Ergot,"* 1710 et seq.

Erysipelas. *Purgatives*, 1780. *Aconitum napellus*, 1845. *Alcohol*, 1870. *Ammonia* (locally), 1802. *Argentii nitras* (externally), 1850. *Collodion*, 1854 (2). *Ferri perchloridi tinct.*, 1851, 1857, 1858, 1864. *Hydrargyrum*, 1837 (mercurial frictions). *Iodine* (locally), 1839, 1853. *Physostigma venenosum*, 1863. *Quinine*, 1863.

Erythema. *Local Anæsthetics* (congelation), 1854.

Exanthemata. *Enemas*, 1756, 1757 (2). *Refrigerants*, 1778. *Sulphites* (alkaline), 1862. *Vesicants*, 1758. *Aqua Calcis*, 1743. *Ledum palustre* (locally), 1775. See also *Variola*, *Rubeola*, &c.

Exostosis. *Hydrargyrum* (mercurial frictions), 1756.

External Diseases. *Intraleptic method*, 1804. *Acids*, 1807. *Alcohol*, 1791. *Lepidium ruderales*, 1816.

Eye, diseases of. *Special Therapeutics*, 1835 (Labat), 1841 (Furnari), 1844 (Rognetta), 1852 (Sichel). *Inhalation* (atomised fluids), 1862. *Topical remedies*, 1804, *Argentii nitras*, 1837, 1840, 1842, 1854. *Atropa Belladonna*, 1802. *Bignonia catalpa*, 1834. *Citrus* (oil of, locally), 1828. *Collodion*, 1872. *Euphrasia*

officinalis, 1717, 1857. *Herniaria glabra*, 1706. *Hydrargyrum*, 1841. Calomel, 1832. Hydrocyanic acid (vapour), 1843. Hyoscyamine, 1875. Iodine, 1859. Morphia, 1826, 1869. *Physostigma venenosum*, 1863 (2), 1864, 1874. Plumbum (*P. acetis*), 1819. Strychnia, 1873. Tabacum, 1865, 1867. *Ol. Terebinthinæ*, 1829. *Valeriana officinalis*, 1732. *Zinci sulphas*, 1772.—*Catarrhal inflammation of. Enphrasia officinalis*, 1857.—*Veneral and other inflammation of. Ol. Terebinthinæ*, 1829.

Eye, operations on. Anæsthetics, 1850, 1852, 1855, 1861, 1872, 1875 (2). *Atropa Belladonna*, 1802.

Fever and Fevers generally. Special Therapeutics, 1695 (Stahl), 1709 (Torti), 1755 (Heister), 1836 (Reiss), 1850 (Bischoff), 1875 (Liebermeister). Inunction, 1850. Acids, 1697, 1813. Antiphlogistics, 1862, 1869. Aperients, 1733, 1813. Diaphoretics, 1705, 1749. Emetics, 1399, 1780, 1783, 1818. Art. "Febrifuges," p. 161. Purgatives, 1628, 1780, 1807, 1824. Refrigerants, 1569 et seq. Stimulants, 1860. Sulphites, 1862. Tonics, 1796. Vesicants, 1752, 1776. Alcohol, 1865. Antimony, 1773, 1774, 1783. *Antimonium tartaratum*, 1774, 1801 (in large doses), 1817 (in small doses), 1842. "Art. "Pulvis Jacobi," p. 245. *Arnica*, 1775, 1778. *Artemisia cœrulea*, 1800. Anrum, 1762. *Calcei chloridum*, 1827. Citrus (Lemon juice), 1665. *Digitalis*, 1862. *Eupatorium perfoliatum*, 1813. *Geum urbanum*, 1784, 1786. *Hydrargyrum*, 1804, 1813, 1823, 1846. Iodine, 1857. *Ipecacuanha*, 1732, 1754, 1774. Lac (milk), 1820. Opium, 1693 (enemas of), 1780, 1784 (2), 1786, 1800, 1809 (opiate friction), *Sodii chloridum*, 1702. Vinum, 1630, 1654, 1703 (Rhine wine), 1797, 1798. Water, 1559, 1684, 1691, 1722, 1725, 1726, 1774, 1797 (affusion, Currie), 1799, 1804, 1805, 1808, 1811, 1815, 1817 (2), 1818 (2), 1820 (2), 1822, 1823 (2), 1824, 1836, 1853, 1861, 1868, 1869, 1872, 1873, 1874.

Fever, Acute, Inflammatory, "Ardent," and Continued. Special Therapeutics, 1772 (Baldinger). Inunction, 1850. Enemas, 1757. Acids, 1781. Diaphoretics, 1780. Evacuants, 1784. Purgatives, 1706. Vesicants, 1776. *Aconitum napellus*, 1856. Alcohol, 1867. Camphor, 1712. Camphor (with calomel) 1771. *Cinchona*, 1767, 1775. Calomel (with camphor), 1771, 1825. *Ipecacuanha*, 1754. Manganese, 1793. Opium, 1860. Quinine, 1866. *Senegæ radix*, 1740. *Valeriana officinalis*, 1789. Vinum, 1630. Water, 1559, 1591, 1723, 1820, 1824.

Fever, Intermittent. Special Therapeutics, 1777 (Mera), 1829 (Dompierre), 1831 (Guérin), 1841 (Ritter). Endermic method, 1834 (2). Art. "Antiperiodics," p. 130. Diaphoretics, 1696. Emetics, 1782, 1788, 1803. Febrifuges, 1798, 1809, 1811, 1813, 1850. Narcotics, 1780. Sulphites and Hyposulphites, 1862, 1872. Topical med., 1873. *Aconitum napellus*, 1856. *Æsculus Hippocastanum*, 1733, 1780, 1782, 1788, 1810. *Ammonii chloridum*, 1716. *Angusture cortex*, 1791. *Anthemidis flores*, 1757, 1775, 1783, 1810. Antimony, 1792. *Apiol*, 1855. *Aranea* (Spider's web), 1686, 1809, 1811. Arsenic, 1786, 1804, 1809 (2), 1811, 1812 (against), 1813, 1842, 1850, 1851, 1857, 1863, 1864, 1866 (2). Beberine, 1835, 1845. Berberine, 1853. *Bittera*, 1857. *Buxus sempervirens*, 1859. Caffeine (arsenate of), 1863. *Calcei phosphas* (cum sulphure), 1852. *Cathartides*, 1785. Carbolic acid (subcutaneously), 1873. *Cascarilla*, 1692. Chloroform, 1850, 1860. Art. "Cinchona," p. 327.¹ *Conia*, 1849. *Convallaria majalis*, 1737. *Datisca cannabina*, 1799. *Digitalis*, 1823. *Erythraea centaureum*, 1713. *Eucalyptus globulus*, 1872, 1873. Ferrum, 1856. *Ferri ferro-sesquicyanidum*, 1822. *Ferri perchloridum*, 1866. *Ferri sulphas*, 1810. *Fraxinus excelsior*, 1712, 1791, 1808. Gelatine, animal, 1803, 1808. *Geum urbanum*, 1786. *Hydrargyrum*, 1742. Calomel, 1825. *Hlex aquifolium*, 1831, 1833. *Khaya Senegalensis* (Cailcedra), 1854, 1856, 1858. *Krameria*, 1822.

¹ So large a proportion of the numerous works on *Cinchona* treats, whether expressly stated so or not in the title page, on the powers of this remedy in intermittent fevers, that it would have created confusion rather than otherwise to have particularised the date of each publication; hence the student is referred to the article as a whole.

Laurus, sp. of, 1751. Lycopus Europæus, 1820. Olea Europæa (leaves of), 1815; (gum-resin of), 1831. Oleum animale empyreumaticum, 1747. Opium, 1783. Ostrea edulis, 1865. Parmelia parietina, 1815, 1817 (2). Phloridzine, 1836. Picric acid, 1868. Pinus (écorce de Pin), 1805. Piper et Piperine, 1823, 1831. Potassii bromidum, 1873. Punica granatum (Pomegranate bark), 1809. Quinine and Cinchonine, 1816, 1821, 1822, 1826, 1827 (endermically), 1828 (ditto), 1829, 1830 (2), 1831, 1835, 1850, 1853, 1860, 1866 (2) (hypodermically), 1867, 1874, 1875 (with alcohol). Quinite, 1869. Rhus Cotinus, 1815. Salicine, 1830, 1833, 1834, 1835 (2), 1861. Salix, sp. of, 1772, 1782, 1792, 1798, 1803. Simaba Cedron, 1854. Sinapis (sinapisms), 1812. Sodii chloridum, 1852. Sodium (Cyano-ferrure de sodium), 1861. Lignum Colubrinum, 1749. Swietenia cortex, 1793. Tannin, 1862. Warburg's Drops, 1847, 1849, 1869. Water, 1689 (as a drink in tertians), 1858.

Fever, Periodic, Malarious, or Miasmatic. Special Therapeutics, 1709 (Torti). Febrifuges, 1870. Sulphites, 1869. Arsenic, 1786, 1842, 1875. Bebeerine, 1835, 1845. Carbolic acid, 1869 (in Addenda, p. 808). Cascarella, 1692. Chloroform, 1850. Dictamnus albus, 1777. Eupatorium perfoliatum, 1813. Hydrargyrum, 1742. Magnesia sulphis, 1870. Narcotine, 1832. Piper et Piperine, 1823, 1831. Quinine, 1866 (2) (hypodermically), 1867 (as a prophylactic). Quinite, 1869. Warburg's Drops, 1847, 1849, 1869.

Fever, Remittent. Enemas (large), 1849. Arsenic, 1786, 1842. Cinchona, 1696, 1712, 1762 (with camphor), 1790, 1821. Ferri ferro-sesquicyanidum, 1822. Calomel, 1825. Quinine, 1866.

Fever, Puerperal. Special Therapeutics, 1841 (Trier), 1845 (Sinogowitz). Emetics, 1830. Sulphites and Hyposulphites, 1862, 1867. Alcohol, 1875. Ammonia (carb. of), 1850. Carbolic acid, 1874. Hydrargyrum, 1830. Quinine, 1863, 1875. Ol. Terebinthinae, 1814.—*Preventive of.* Iodine (injections), 1870.

Fever, Typhoid. Special Therapeutics, 1829 (Louis), 1864 (Lang), 1873 (Vopelius). Enemas (cold), 1875. Antiseptics, 1869. Purgatives, 1837 (2), 1872. Stimulants, 1868. Sulphites and Hyposulphites, 1862. Tonics, 1816. Aconitum napellus, 1875. Alcohol, 1871, 1873. Antimonium tartaratum, 1842. Arsenic, 1866, 1871. Baptista tinctoria, 1872. Carbolic acid, 1865, 1873, 1874. Cinchona, 1857, 1860. Collodion (to abdominal surface), 1869. Creasote, 1874. Hydrargyrum, 1813, 1837 (mercurial frictions). Calomel, 1852 (2), 1853, 1857 (2). Potassæ chloras, 1864. Quinine, 1842, 1857, 1870. Water, 1815, 1861, 1864, 1866, 1867, 1869, 1870, 1874 (g), 1875.

Fever, Typhus. Special Therapeutics, 1801 (Würth), 1850 (Zuppinger), 1856 (Diétl). Inunction, 1850. Purgatives, 1805. Acetum (internally), 1818. Arsenic, 1871. Chloral (as hypnotic), 1870. Nitrous acid, 1795, 1796. Opium, 1786, 1809 (opiate frictions). Phosphoric acid, 1814. Phosphorus, 1751, 1790, 1815. Quinine, 1874. Thea Chinensis (tea), 1866. Vinum, 1827, 1839. Water, 1802, 1806, 1818, 1861.—*Typhus abdominalis.* See *Typhoid Fever.*

Fever, "Asthenic," "Adynamic," "Malignant," "Patrid," "Petechial," "Contagious," "Pestilential," &c.¹ Acids (mineral), 1803. Emetics, 1777, 1792, 1799. Stimulants, 1787, 1790. Vesicants, 1591, 1592, 1727. Arnica, 1775. Camphor (with cinchona), 1762; 1815. Cinchona, 1764, 1766, 1817. Hydrargyrum, 1750, 1806. Lac (Milk), 1536. Nitrous acid, 1795, 1796. Olea Europæa (leaves of), 1815. Oxalis acetosella, 1709, 1717. Phosphorus, 1751. Potassæ nitras, 1772. Salix, sp. of, 1793. Sinapis (sinapisms), 1593. Vinum, 1703 (Rhine wines), 1778 (Champagne). Water, 1559, 1767, 1806, 1820.

Fever, Yellow. Special Therapeutics, 1839 (Louis et Trouseau), 1855 (La Roche), 1857 (Lyons). Prophylactics, 1826. Salines, 1846. Antimonium, 1796. Cinchona, 1826. Serpens (Crotalus horridus), 1861.

¹ The fevers enumerated in this section belong probably to the previous section, "Typhus Fever," but as in some instances there may be a doubt, it has been thought better to retain the designations employed by the authors themselves.

Fever, Eruptive. Water, 1853, 1870.—*Gastric.* Evacuants, 1793. Stimulants, 1813. Antimonium tart., 1821.—*Nervous.* Calomel, 1814. Water, 1820.—*Chirurgical.* Prophylactics, 1872. Ferri perchloridum, 1874. *Purulent.* Ferri perchloridum, 1866.—*Of Walcheren.* Hydrargyrum, 1810.—*Rheumatic.* See *Rheumatism, acute.*—*Scarlet.* See *Scarlatina.*

Fistulæ. Zinci chloridum, 1874.

Fistula lachrymalis. Antimonii terchloridum, 1873 (in Addenda, p. 808). Argenti nitras, 1837. Iodine, 1825.

Fistula in Ano. Iodoform, 1869.

Flatulence and Flatulent Colic. Special Therapeutics, 1790 (Phœbus.) Carminatives, 1784, 1800. Carbo vegetab., 1865.

Fluor albus. See *Leucorrhœa.*

Fractures (compound.) Special Therapeutics, 1829 (Valet), 1868 (Bottini), 1870 (Neroni). Alcohol (locally), 1867. Collodion, 1869. Gutta percha, 1851. Water, 1872 (irrigation in compound fractures).

Furunculus. Local Anæsthetics (congelation), 1834.

Gall-stones. Chelidonium majus, 1785. Chloroform, 1861. Juniperus communis, 1864. Nitric acid, 1817. Ol. Terebinthinæ (with sulphuric ether), 1790.

Gangrene and Hospital Gangrene. Special Therapeutics, 1754 (Hamberger). Idem, 1796 (Wolterbeck). Antiphlogistics, 1848. The Chlorides, 1827. Tonics, 1831. Acetum, 1772. Camphor, 1714, 1770, 1871, 1872. Carbo vegetab., 1809. Carbolic acid, 1865. Carbonic acid, 1785. Caryophyllus (Oil of cloves locally), 1717. Cinchona, 1729, 1732, 1734, 1737, 1746, 1754, 1769. Coal tar, 1873. Ferri perchloridum, 1859, 1860 (3). Iodine (tinct. of, locally), 1856, 1871. Opium, 1779. Polygonum amphibium (Persicairia), 1806. Potassæ chloras, 1866. Potassæ permanganas, 1869. Styrax (locally), 1805. Tabacum, 1648. Sea-water, 1671.

Gangrene, senile. Argenti nitras, 1850.

Gastralgia and Gastrodynia. Aconitum napellus, 1845. Argenti oxidum, 1852.

Gastric Affections. See *Stomach and Digestive Organs.*

Gastritis, alcoholic. Alcohol, 1865.

Genito-urinary Organs, affections of. Argenti nitras, 1859. Carbonic acid, 1864. Juniperus communis, 1819. Potassii bromidum, 1872. Triticum repens, 1747.

Gingivitis. Potassæ chloras, 1858.—*Ulcerata.* Nitric acid, 1849.

Glanders. Creasote, 1835.

Glands, enlargement of. Conium, 1776. Iodine, 1831, 1839 (locally). Juglans regia, 1841. Tussilago Farfara, 1807.—*Affections of.* Bitumen (Rock oil of Barbadoes), 1830. Sea-water, 1756, 1769.

Gleet. Cantharides, 1806. Iodine, 1854.

Gonorrhœa. Special Therapeutics, 1823 (Pleindoux), 1861-2 (Rollet), 1875 (Müller.) Injections (urethral), 1741, 1773 (2), 1802, 1814. Acids (with cubebs), 1839. Balsamics, 1875. Diuretics, 1822. Purgatives, 1822. Alcohol (as predisposing to), 1870. Apium petroselinum, 1835. Argenti nitras, 1830, 1843 (2), 1845. Bismuth (injections), 1860. Cadmium (sulphate of), 1874. Camphor (with Hyoscyamus), 1826. Copaiba, 1827, 1861. Cubebs, 1821, 1822, 1826, 1839. Ergot, 1833. Gratiola officinalis, 1775. Hydrargyrum, 1763?, 1781. Calomelas (Plummer's pill), 1759. Juniperus communis, 1736. Monesia, 1839. Opium, 1780. Pyrothionide (injections of), 1827. Santalum (Sandal-wood oil), 1874. Terebinthina, 1699, 1874.

Gout. Special Therapeutics, 1816 (Marie de Saint-Ursin). Fumigation, 1838. Hypodermic method, 1865. Narcotics, 1668. Tonics, 1871. Vesicants, 1779. Aconitum napellus, 1762, 1768, 1784. Aloes, 1803. Antimonii pentasulphuretum, 1759. Aretium Lappa 1758 (2). Aristolochia clematitis, 1719. Artemisia moxa

(Moxa), 1644, 1677, 1682, 1683, 1685, 1714, 1825. *Ballota lanata*, 1832. *Calumbæ radix*, 1694. *Camphor* (vapour), 1829. *Carbonic acid*, 1778. *Cimicifuga foetida*, 1774. *Cinchona*, 1802, 1807. *Colfea Arabica* (Coffee as a preservative), 1833. *Colchicum*, 1825 (2), 1831, 1845, 1860 (2). *Eau Médicinale d'Husson*, 1810, 1814. *Conium*, 1760, 1761, 1784. *Gamboge*, 1625, 1628. *Guaiacum*, 1536, 1779, 1782, 1786, 1798. *Hirudo* (Leeches), 1699, 1789. *Humulus lupulus*, 1806, 1811. *Hydrargyrum* (mercurial inunction), 1646. *Hydrarg. corrosivum sublimatum*, 1808. *Hydrochloric acid*, 1792. *Iodine* (locally), 1839. *Juniperus communis*, 1864. *Lac* (Milk diet), 1663, 1670, 1675, 1705, 1725 (Ass's milk). *Oleum Morrhuæ*, 1841. *Opium*, 1671. *Prunus padus* (cortex), 1812. *Quinine* (with *Colchicum*), 1831. *Rhododendron corymbosum*, 1779, 1810. *Saccharum Lactis*, 1700, 1701, 1713. *Tabacum*, 1648. *Thea Chinensis*, 1657, 1684 (2), 1696. *Veratria*, 1834, 1835. *Vinum*, 1703 (Rhine wines), 1721 (Hungarian wines). *Water*, 1649, 1689, 1724, 1804, 1843. *Sea-water*, 1813. *Bath mineral waters*, 1722, 1800, 1822, 1827.—*Gouty deposits*. *Lithium* (salts of), 1873.

Granulations, exuberant. *Clematis erecta*, 1777.

Gravel. See *Calculous Affections*.

Hæmorrhage. *Special Therapeutics*, 1785 (Rutter). *Idem*, 1797 (Hufeland), 1874 (Simon). *Astringents*, 1685, 1729, 1734 (with opium), 1801. *Derivatives*, 1837. *Cynomorium coccineum* (*Fungus melitensis*), 1755. *Digitalis*, 1807. *Ergot*, 1831, 1833, 1843. *Ferri perchloridum*, 1866. *Ferri sulphas*, 1763. *Hyoscyamus*, 1762. *Krameria*, 1799, 1817, 1822. *Opium*, 1801. *Potassæ nitras*, 1799. *Salix*, sp. of, 1792. *Water*, 1783, 1851.—*Periodic.* *Quinine*, 1857.—*From wounds, &c.* *Art. "Styptics,"* p. 186. *Agaric of the oak*, 1754, 1755, 1757. *Alcohol* (locally), 1683, 1762. *Alum*, 1824. *Ammonia* (carb. of, locally), 1793. *Borassus flabelliformis*, 1850. *Collodion*, 1854. *Creasote*, 1833, et seq. *Ergot*, 1855, 1871. *Ferri perchloridum*, 1858, 1866. *Ferri sulphas*, 1860. *Matico*, 1844. *Spongia*, 1762, 1797, 1872. *Terebinthinæ oleum*, 1679. *Water*, 1797, 1851.

Hæmatemesis. *Purgatives*, 1805.

Hæmaturia. *Argenti oxidum*, 1852. *Ergot*, 1831.

Hæmoptysis. *Special Therapeutics*, 1844 (Smyth). *Emetics*, 1813. *Argenti oxidum*, 1852. *Digitalis*, 1873. *Ergot*, 1831, 1873. *Krameria*, 1821. *Lythrum salicaria*, 1762. *Monesia*, 1839. *Plumbum* (*P. acetas*), 1818. *Rubia tinctorum*, 1691 (in *Addenda*, p. 810).

Hæmorrhoids. *Fumigation*, 1838. *Achillea millefolium*, 1857. *Aloes* (abuse of, in), 1781. *Cimicifuga foetida*, 1774. *Ferri perchloridum*, 1858. *Hirudo* (leeches locally), 1699, 1750. *Monesia*, 1839. *Nitric acid* (as an escharotic), 1843, 1859. *Scrophularia nodosa*, 1720. *Tabacum*, 1648. *Water*, 1850.

Hallucinations. *Arsenic*, 1870. *Datura Stramonium*, 1841.

Headaches. *Local Anæsthetics* (congelation), 1849. *Menyanthes trifoliata*, 1701. *Salvia officinalis*, 1689.—*Nervous.* *Ammonii chloridum*, 1859. *Bittera* (n. d.) *Opium* (opiate frictions), 1809. *Sibura* (Oil of laurel), 1830. *Tabacum* (snuff-taking as a cause of), 1733. *Ol. Terebinthinæ*, 1864. *Thea Chinensis* (green tea), 1827.—*Periodical.* *Arsenic*, 1786. *Phosphorus*, 1815. *Tenacium marum*, 1794.—*Rheumatic.* *Bryonia alba*, 1825. *Sibura* (Oil of laurel), 1830.—*"Sick."* *Guarana*, 1873.—*Supervening on catarrh.* *Euphrasia officinalis*, 1857.

Heart, diseases of. *Inhalation* (medicated), 1837. *Aconitum napellus*, 1845. *Antimonium*, 1867. *Arsenic*, 1867, 1874. *Digitalis*, 1860, 1871. *Ferrum*, 1845. *Oxygen*, 1868. *Veratria*, 1834.—*Aneurism of.* *Digitalis*, 1819.—*Palpitations of.* See *Palpitations*.

Hemeralopia. *Oleum Morrhuæ*, 1863, 1864.

Hemicrania. *Special Therapeutics*, 1788 (Anon). *Bryonia alba*, 1825. *Ether*, 1778.

Hemiplegia. See *Paralysis*.

Hepatitis. See *Liver, inflammation of.*

Hernia. Anæsthetics, 1848 (Guyton.) Caustics, 1774. Purgatives (after herniotomy), 1855. Atropa Belladonna, 1837, 1840. Caoutchouc, 1875. Coffea, 1862. Helix Pomatia, 1808. Opium, 1863. Tabacum, 1648.

Hip joint, diseases of. See *Morbus Coxarius.*

Herpes and Herpetic eruptions. Anthrakokali, 1837, 1840. Hydrarg. corrosivum sublimatum, 1772. Iodine, 1825. Rhus radicans, 1788, 1799. Solanum Dulcamara, 1780, 1784. Sea-water, 1699.

Hydrarthrosis. Special Therapeutics, 1858 (Schveing). Fumigation, 1838. Barium, 1836. Iodine, 1825, 1831, 1857. Oxygen, 1800. Water, 1836.

Hydrocele. Injections into closed cavities, 1791, 1808, 1826. Argenti nitras, 1770, 1783, 1787, 1860, 1871, 1874. Vinum (vinous injections), 1874.

Hydrocephalus. Special Therapeutics, 1844 (Smyth). Inunction, 1850. Antimonium tartaratum, 1832. Oxygen, 1800. Digitalis, 1785, 1790. Ergot (as a cause of), 1842. Moxa, 1819.

Hydrocyanic acid, poisoning by. Ferrum, 1867? Art. "Hydrocyanic Acid," 1805, 1818, 1823, 1824 (2), 1829, 1838, 1843, 1857, 1868.

Hydrophobia. Special Therapeutics, 1862 (Matton). Acetum, 1757. Alisma Plantago, 1817. Ammonia, 1777. Anagallis arvensis, 1790. Atropa Belladonna, 1781, 1782, 1795. Cannabis sativa, 1839. Cantharides, 1762. Carbolic acid, 1865. Chlorine (prophylactic) 1820, 1825. Chloroform, 1872. Datura Stramonium, 1777, 1809. Euphorbia (villosa), 1828. Genista tinctoria, 1853. Helleborus niger, 1610. Hydrargyrum, 1761, 1852. Hydrargyrum (Ptyalism), 1760. Cinnabar (with Musk), 1764. Hydrargyri sulphuretum nigrum, 1875. Meloe majalis, 1778, 1781, 1783 (2). 1788. Moschus, 1750, 1755, 1764. Oleum animale empyreumaticum, 1740. Opium, 1766. Quinine (hypodermically), 1867. Scutellaria lateriflora, 1819, 1820. Spartium (Genista tinctoria), 1853.

Hydrothorax. Digitalis, 1785, 1807 (2), 1809, 1810, 1822. Calomel, 1822. Nitrous acid, 1798. Scuega, 1782.

Hygroma. Iodine, 1838.

Hypochondriasis and Hypochondriac Affections. Special Therapeutics, 1810 (Bährens). Ferrum, 1654. Hirudo (Leeches), 1699. Hydrarg. corrosivum sublimatum, 1797. Lac (Ass's milk), 1725. Melissa (et Mentha), 1864. Vinum, 1721 (Hungarian wines); 1759.

Hysteria and Hysterical Affections. Special Therapeutics, 1830 (Dumont). 1859 (Briquet). Anæsthetics, 1858. Purgatives, 1805. Tonics, 1867. Arsenic, 1867. Bismuth, 1792. Chloroform, 1858. Collodion (to abdominal surface), 1869. Ergot, 1811. Ferrum, 1832. Hyoseyamus, 1777. Melissa (et Mentha), 1864. Mentha, 1767. Moschus, 1628. Opium, 1677. Quassia, 1777. Ruta graveolens, 1735. Sumbul, 1850. Valeriana officinalis, 1828. Vinum, 1616. Water, 1689.—*Mental alienation of.* Opium, 1860.

Ileus vel Iliac Passion. Atropa Belladonna, 1850, 1860.

Impetigo. Special Therapeutics, 1871 (Devergie).

Impotence. Special Therapeutics, 1844 (Smyth).

Incurable Diseases. Lac (Milk-diet), 1871. Oxygen, 1868.

Indigestion. See *Dyspepsia.*

Infancy and Childhood, diseases of. Special Therapeutics, 1829 (Tourtual), 1838 (Ure), 1846 (Bérton et Lehuby), 1849 (Beck), 1857 (Gerloni), 1861 (Hagen), 1864 (Dillnberger). Calcis phosphas, 1853. Calomel, 1823, 1830. Opium, 1830. Potassii bromidum, 1869. Quinine, 1859 (by friction), 1868.—*Convulsions of.* See *Convulsions, infantile.*

Inflammation and Inflammatory Diseases. Special Therapeutics, 1722 (Fischer), 1804 (Flégein), 1820 (Mantovani), 1850 (Bischoff), 1874 (Tronessart). Antiphlogistics, 1874 (in Addenda, p. 806). Derivatives, 1829, 1837. Purgatives, 1826. Stimulants, 1803, 1860. Topical appl., 1751, 1836. Vesicants, 1774, 1798. Alcohol, 1836. ("Brandy and salt"); 1865, 1867. Antimonium, 1783. Antimonium tartaratum, 1801, 1817. Antimonii tersulphuretum, 1733. Camphor, 1714,

1788. Cantharides, 1810. Colchicum, 1820. Hirudines, 1804. Hydrargyrum, 1794 (2), 1810, 1819, 1864. Calomel (with opium), 1785, 1803. Opium, 1696, 1757, 1774, 1784, 1800, 1805, 1828. Potassæ nitras, 1849. Ol. Terebinthinæ, 1814. Vinum, 1630. Water, 1836.

Inflammation, acute. Alcohol, 1867. Digitalis, 1837.—*Internal.* Vesicants, 1817. Hydrargyrum (mercurial frictions), 1836.—*External or local.* Local Anæsthetics (congelation), 1852, 1854. Astringents, 1787. Derivatives, 1870. Antimonium tartaratum, 1820. Argenti nitras, 1850, 1866. Belladonna, 1840. Collodion, 1854.—*Phlegmonous.* Argenti nitras, 1850. Mikania Guaco, 1863.—*Of Mucous membranes.* Rubefaciants, 1824. Copaiba, 1823. Opium, 1828.—*Of Serous membranes.* Opium, 1828.—*Of Fibrous tissues.* Opium, 1828.

Insanity. Special Therapeutics, 1785 (Agassiz), 1828 (Guérin), 1851 (Parigot). Inunction, 1850. Narcotics, 1797, 1845, 1863. Neurotics, 1871. Alcohol (as a cause of), 1847, 1872 (ditto), 1875 (ditto). Antimonium tartaratum, 1869. Arsenic, 1870. Atropa Belladonna, 1691, 1783, 1789. Bromine, 1853. Cannabis sativa, 1845, 1870. Chloral, 1872. Conium, 1873. Datura Stramonium, 1762, 1777. Digitalis, 1785, 1810. Gratiola officinalis, 1775, 1793, 1818. Hellebore, 1818. Hyoscyamus, 1762, 1872. Morphia, 1874, 1875. Opium, 1856, 1860, 1870. Potassii bromidum, 1870, 1872. Water (cold affusions, baths, &c.), 1859.—*Hallucinations and cerebral congestions of.* Arsenic, 1870.

Internal Diseases. Special Therapeutics, 1816 (Achard-Lavort), 1868 (Lazansky). Endermic method, 1834. Iatroleptic method, 1804. Acids, 1806. Derivatives, 1816. Emetics, 1853. Ferrum, 1855. Iodine, 1854. Lepidium rudemale, 1816. Phosphorus, 1815. Water, 1803 (cold water and ice).

Intestinal Lesions. Enemas, 1873.—*Occlusions.* Enemas, 1873. Opium, 1874.

Iris, and its affections. Special Therapeutics, 1800 (Nickels). Belladonna, 1803, 1853, 1856. Atropia, 1856, 1873.—*Paralysis of.* Hyoscyamus (as causing), 1803.

Iritis, acute. Atropia, 1866. Hydrargyrum, 1857, 1866. Hydrargyrum. (Ptyalism), 1868.

Ischuria vesicæ. Special Therapeutics, 1868 (Vittadini). Emetics, 1694.

Jaundice. Special Therapeutics, 1727 (Ludolph). Cholagogues, 1866. Agrimonia, 1768. Aloes, 1811. Hydrargyrum (Ptyalism), 1799. Menyanthes trifoliata, 1701. Bath mineral waters, 1785.

Joints, affections of. Special Therapeutics, 1853 (Bonnet). Fumigation, 1838. Injections into closed cavities, 1869. Antiphlogistics, 1830. Argenti nitras, 1871. Moxa, 1825. Bitumen (Rock oil of Barbadoes), 1830. Chloroform, 1860. Clematis erecta, 1769. Conium, 1761. Iodine, 1831. Oxygen, 1845.—*Rheumatic swellings of.* Hydrarg. corrosivum sublimatum, 1808.—*Wounds of.* Antiphlogistics, 1830. Refrigerants, 1850. Vesicants, 1836. Water, 1836.—*Resection of.* Tonics, 1856.—*Effusion into.* See *Hydrarthrosis*.

Keratitis, panniform. Ferri perchloridum, 1858.

Kidneys, affections of. Special Therapeutics, 1863 (Rosenstein). Diuretics, 1572, 1713, 1752 (as a cause of). Terebinthina, 1699. Uva Ursi, 1763, 1764, 1778.

Labours. Art. "Anæsthetics, p. 107 et seq. Stimulants (uselessness of) 1833. Anemone pratensis, 1853. Atropa Belladonna, 1820, 1860. Cannabis sativa, 1851. Chloral, 1870, 1871, 1872, 1873 (2), 1875. Art. "Chloroform," p. 330 et seq. Ciachona (as an oxytoxic), 1870. Cinnamon, 1787. Cocos Maldivica, 1634, 1694. Ergot, 1867 et seq. Opium, 1781, 1838, 1864. Quinine (as an oxytoxic), 1870, 1873 (3), 1874 (4), 1875. Uva Ursi, 1858.—*For inducing premature.* Carbonic acid, 1858. Laminaria digitata, 1867 (4). Quinine, 1873, 1874, 1875.

Laryngismus stridulus. Ferri perchloridum, 1859, 1869, 1872. Hydrochloric acid, 1859.

Laryngitis. Topical medication, 1854.

Larynx, affections of. Special Therapeutics, 1829 (Albers). Inhalation (atomised fluids), 1855, 1862, 1866. Sulphur (Sulphurous inhalations), 1866.

Lead Palsy and other Saturnine affections. Iodine (Iod. of potassium), 1865, 1867. Art. "Plumbum, Injurious and Poisonous Effects of," p. 629. Sodii chloridum (Hypochlorite of soda externally), 1870.

Lepra. Conium, 1761. Hydrargyrum, 1698. Ledum palustre (locally), 1775.

Leprosy. Calotropis gigantea, 1833. Hydrocotyle Asiatica, 1853, 1855, 1856, 1859. Gynocardia odorata, 1878 (in Addenda, p. 809).

Leucorrhœa. Argenti nitras (appl. to os and cervix uteri), 1830. Balsamum Peruvianum, 1703. Cantharides, 1806. Conium, 1761, 1764. Dictamnus albus, 1777. Ergot, 1831, 1833. Helleborus viridis, 1775. Krameria, 1822. Lythrum salicaria, 1762. Mentha, 1767. Monesia, 1839. Pichurim bean, 1815. Pyrothionide (injections of), 1827. Salix, sp. of, 1792. Terebinthina, 1699. Thea Chinensis (injections of green tea), 1870.

Leukæmia. Special Therapeutics, 1872 (Mosler).

Liver, inflammation of. Special Therapeutics, 1781 (Miquet). Ammonii chloridum, 1870. Hydrargyrum, 1809, 1846. Hydrargyrum (Ptyalism), 1824. Calomel, 1816, 1825. *Chronic and other affections of.* Art. "Cholagogues," p. 143. Agrimonia, 1768. Alcohol (as causing), 1875. Antimonium tartaratum (externally), 1822. Chlorine, 1822. Fel (Ox-gall), 1846. Hydrargyrum, 1809 (2), 1811, 1820. Calomel, 1825. Nitro-hydrochloric acid (externally), 1822. Oxygen, 1868. Quassia, 1799. Ol. Ricini, 1764. Sinapis (White mustard seed), 1826 (2). Ol. Terebinthine, 1790. Bath mineral waters, 1800. Cheltenham waters, 1803. Harrogate waters, 1855. *Abscess of.* Ammonii chloridum, 1870. *Hydatid cyst of.* Iodine (injections), 1864.

Lochia, suppression of. Hirudines, 1778.

Lumbago. Morphia (hypodermically), 1872. Moxa, 1825, 1827.

Lungs and Air passages, affections of. Special Therapeutics, 1823 (Weber), 1861 (Günzburg), 1870 (Buck), 1875 (Tropea). Art. "Inhalation," p. 92 et seq. Emetics, 1810. Evacuants, 1863. Topical med., 1854, 1855, 1860, 1863. Agaricus piperatus, 1799. Ammonii chloridum (vapour of), 1873. Antimonium tartaratum (externally), 1822, 1828, 1833. Calcis phosphas, 1872. Carbonic acid, 1864. Digitalis, 1804. Eucalyptus globulus (Eucalyptol), 1873. Calomel (with Opium), 1828. Hydrocyanic acid, 1819 (2), 1820, 1821, 1823. Iodine (vapour of, with Conium), 1834. Koumis, 1874, 1875. Lac (Milk), 1687, 1726, 1754. Menyanthes trifoliata, 1701. Mytilus edulis, 1857. Phellandrium aquaticum, 1771. Pistachia terebinthus, 1842,¹ Salvia officinalis, 1723. Scrophularia nodosa, 1862. Sulphur (Sulphurous fumes), 1866. Tabacum (smoking), 1610. Tannin, 1863. Water, 1870.—*Emphysema of.* Antimonium, 1869. Arsenic, 1869. *Gangrene of.* Thymic acid (inhalation of), 1869.—*Inflammation of.* Alcohol, 1869. Antimonium, 1869. Antimonium tartaratum, 1824. Prunus laurocerasus (Cherry-laurel water), 1823.—*Tubercular disease of.* See *Phthisis*. See also *Pneumonia* and *Pleuritis*.

Lupus. Chloracetic acid, 1868. Hydrargyri pernitras, 1826. Iodine, 1839.

Lymphatic System, affections of. Aurum, 1811, 1819, 1820. Calcis murias, 1808. Mytilus edulis, 1857. See also *Scrofula*.

Malignant Diseases. Zinci chloridum, 1836.

Mamma, affections of. Conia, 1852.—*Inflammation of.* Iodine locally, 1839.

Mania. See *Insanity*.

Marasmus of Childhood. See *Tabes mesenterica*.

Measles. See *Rubeola*.

Melancholia. Special Therapeutics, 1811 (Haindorf). Diluents, 1716, 1737. Belladonna, 1783. Manna, 1685. Opium, 1804.

Phagedæna. See *Gangrene.*

Pharynx, affections of. Topical medication, 1860. Sulphur (sulphurous inhalations), 1866.

Phosphorus, poisoning by. See art. "Phosphorus: its poisonous and injurious effects," p. 615.

Phthisis pulmonalis. Special Therapeutics, 1791 (Petit), 1823 (Wcler), 1825 (Louis), 1830 (Harel du Tancrel), 1865 (Fonssagrives), 1867 (Ullersperger), 1869 (Pidoux), 1871 (Mayer), 1874 (Brechmer), 1875 (Mey). Inunction, 1850. Fumigation, 1868. Inhalation, 1767 (in Addenda, p. 806), 1829, 1830, 1831, 1837, 1841, 1817, 1855, 1858, 1859, 1865, &c. The Chlorides (chlorine), 1829. Emetics, 1795, 1824, 1852. Hypophosphites (alkaline), 1859, 1864, 1868. Oils (various fatty), 1855. Prophylactics, 1875. Tonics, 1793, 1801. Topical med., 1860. Antimonium tartaratum, 1817. Aristolochia clematidis, 1807. Arsenic, 1869, 1875. Boletus suaveolens, 1784. Calcis phosphas, 1872. Carbonic acid, 1796 (2). Cetraria Islandica, 1802, 1803, 1846. Chlorine, 1830 (2). Cinchona, 1779, 1782, 1792. Colchicum, 1763. Conium, 1761, 1834 (inhalation of). Creasote (inhalation of), 1835, 1836. Digitalis, 1785, 1801 (2), 1804, 1807, 1808. Ergot, 1841. Ether (etherised cod-liver oil), 1868. Ferrum, 1866. Ferri perchloridum, 1862. Gratiola officinalis, 1813. Guaiacum, 1804. Gynocardia odorata, 1878 (in Addenda, p. 809). Helicine, 1854. Hydrocyanic acid, 1819 (2), 1820. Iodine, 1824, 1829 (inhalation of), 1834 (inhalation of with conium), 1851. Koumis, 1875 (2). Lac (milk diet), 1536, 1622, 1674, 1687, 1725 (Ass's milk), 1751, 1803, 1806, 1870. Serum Lactis, 1870. Lactuca (Lactucarium), 1816. Monesia, 1839. Morphia, 1856. Oleum Morrhuæ, 1816, 1849, 1850 (2), 1851. Naphtha, 1843, 1844, 1846. Oxygen, 1860, 1868, 1873. Pepsin, 1854. Phellandrium aquaticum, 1771 (?), 1802. Phosphorus, 1871. Pix liquida (tar vapour), 1817, 1818, 1823, 1860. Plumbum (P. acetas), 1801, 1818. Liquor Potassæ, 1841. Potassæ chloras, 1860, 1872. Quinine, 1842. Quinæ tannas, 1873. Scrophularia nodosa, 1862. Serpens (excreta of reptiles), 1862. Sodii chloridum (as a cause), 1850. Sulphur (sulphurous inhalations), 1866. Tabacum (snuff-taking as a preventive), 1870. Tannin, 1863. Tussilago Farfara, 1714. Uva ursi, 1805. Veronica officinalis, 1694. Water, 1689.—*Sweats of.* Agaric of the Larch, 1832. Atropia, 1873. Calcis phosphas, 1875.—*Diarrhœa of.* Ipecacuanha, 1774.

Placenta, retention of. Special Therapeutics, 1862 (Hegar).

Plague. Inunction, 1809, 1844. Acetum, 1653. Coffea Arabica, 1721. Oleum Olivæ (frictions with warm oil), 1800. Oxalis acetosella, 1717. Pix liquida (tar water), 1747. Sodii chloridum, 1702. Water, 1722.

Plethora. Derivatives, 1837. Serum Lactis (whey-cure), 1860.

Plica polonica. Lycopodium clavatum, 1702.

Pleuritis. Special Therapeutics, 1691 (Camper). Idem, 1803 (Conradi). Emetics, 1782. Vesicants, 1776. Cetaceum, 1744. Crotonis oleum (a counter-irritant), 1874. Hirudines, 1804. Opium, 1674, 1774. Senega, 1782. Sinapis (sinapisms), 1636. Tannin, 1873.—*Of infancy.* Digitalis, 1867.—*Pleuro-pneumonia.* Senega, 1740.

Polypus, nasal. Caustics, 1825.

Pneumonia. Special Therapeutics, 1803 (Conradi), 1838 (Ritscher). Vesicants, 1794, 1835. Alcohol, 1867 (2) 1868, 1869, 1870, 1872, 1874. Antimonium tartaratum, 1828, 1830, 1831, 1835 (2), 1841, 1845, 1871. Antimonii oxidum, 1834. Chloroform, 1853. Digitalis, 1857, 1861, 1870, 1872. Ferrum, 1832. Calomel, 1850. Moschus, 1870. Phosphorus, 1815. Plumbum (P. acetas), 1871. Prunus lauro-cerasus (cherry-laurel water), 1858. Quinine, 1871. Senega, 1782. Veratria, 1855, 1858, 1870. Veratrum viride, 1866, 1870.—*Of infancy and childhood.* Digitalis, 1867.—*Catarrhal (péripneumonie catarrhale).* Potassæ carbonas, 1815.

Pregnancy, diseases, &c. of. Aperients, 1801. Assafœtida, 1855. Lac (milk), 1536. Opium, 1781, 1864. Potassii bromidum, 1869. Quinine, 1875.

Prostate Gland, affections of. Special Therapeutics, 1842 (Boys de Lowry), 1858 (Schleiss von Löwenfeld).

Prurigo. Pix liquida, 1832.

Pseudo-membranous Affections. Special Therapeutics, 1857 (Beck). Bromine, 1856.

Psoas Abscess. Phellandrium aquaticum, 1828.

Psoriasis. Bitumen (oil of petroleum), 1872. Copaiba, 1871. Hydrargyrum, 1875 (in Addenda, p. 809).

Ptyalism. See *Salivation*.

Puerperal State and Affections. Special Therapeutics, 1571 (Le Bon), 1835 (Joerg), 1866 (Winckel). Injections (vaginal and intra-uterine), 1866, 1869, 1870. Aperients, 1801. Alcohol, 1872, 1874. Carbolic acid, 1874. Chloral, 1871. Citrus (lemon-juice), 1665. Hirudo (leeches to the uterus), 1665. Moschus, 1613. Opium, 1762, 1781, 1809, 1864.—*Peritonitis.* Purgatives, 1820. Carbolic acid, 1873. Hydrargyrum (mercurial frictions), 1824. Ol. Terebinthinæ, 1830.—*Mania.* Opium, 1860.—*Convulsions.* See *Convulsions, puerperal.*—*Fever.* See *Fever, puerperal.*

Purulent Infection. Ferri perchloridum, 1860 (2). Magnesiæ sulphis, 1866.

Purpura. Ferri perchloridum, 1858.

Pustule malignæ, F. See *Carbuncle*.

Pyæmia. Sulphites and Hyposulphites, 1862. Carbolic acid, 1873, 1874. See also *Purulent Infection*.

Pyrosis. Argenti oxidum, 1852.

Rabies canina. See *Hydrophobia*.

Rachitis. Special Therapeutics, 1844 (Smyth), 1863 (Ritter von Rittershain). Ferri iodidum, 1834. Oleum Morrhuæ, 1861. Rubia tinctorum, 1758, 1769.

Rattle-snake, poison of. Hieraceum venosum, 1828. Senegæ radix, 1749.

Rectum and Anus, affections of. Special Therapeutics, 1873 (Pinquet).—*Trolapsus of.* Enemas, 1782. Nitric acid (locally), 1859.

Respiratory Organs. See *Lungs*.

Rheumatism (in general). Special Therapeutics, 1860 (Eisenmann). Endermic method, 1828. Fumigation, 1838. Hypodermic method, 1865. Antiseptics (sulphurous acid), 1874. Diaphoretics, 1666. Vesicants, 1779. Antimonium tartaratum, 1835. Arnica montana, 1744. Ballota lanata, 1832. Camphor (vapour), 1829. Cinchona, 1786. Citrus (lemon juice), 1849. Hydrargyrum (mercurial inunction), 1834 (2). Juniperus communis, 1864. Lac (milk), 1663. Oleum Morrhuæ, 1835, 1841, 1843. Prunus Padus, 1812. Senega, 1782. Solanum Dulcamara, 1771. Sulphur (fumigation), 1820, 1830, 1871 (Sulphurous acid). Veratria, 1834. Water, 1843. Bath mineral waters, 1795, 1800, 1822.

Rheumatism, acute. The Cyanides (of Zinc and Potassium), 1875. Diaphoretics, 1795. Stimulants, 1860. Sulphites and Hyposulphites, 1862. Vesicants, 1795, 1864. Aconitum napellus, 1845. Antimonii oxidum, 1834. Atropa Belladonna, 1870. Atropia (to control the sweats), 1873. Cannabis sativa, 1839. Cinchona, 1807. Citrus (lemon juice), 1849, 1858. Digitalis, 1866, 1867. Ergot, 1874. Opium, 1836. Physostigma venenosum, 1863. Plumbum (P. acetas), 1866. Potassa nitras, 1849. Propylamine, 1873.—*Cerebral complications of.* Water (cold baths, &c.), 1874, 1875 (3).

Rheumatism, chronic. Diaphoretics, 1795. Vesicants, 1795. Aconitum napellus, 1845. Antimonium tartaratum, 1806. Arsenic, 1804. Moxa, 1823, 1825, 1827. Cannabis sativa, 1839. Datura Stramonium, 1822. Formic acid, 1822. Nitrous (Nitro-hydrochloric) acid, 1798. Ononis spinosa, 1855. Opium, 1809. Rhododendron chrysanthum, 1779, 1810. Sulphur (fumigations), 1820 (2), 1830.

Rheumatic Gout. Antiseptics (Sulphurous acid), 1871. Antimonium tartaratum, 1827, 1866. Antimonii oxidum, 1872. Moxa, 1825. Ballota lanata, 1832. Citrus (lemon juice), 1858. Digitalis, 1866, 1867. Ergot, 1874. Morphia,

(endermically), 1836. Opium, 1746, 1792. Quinine (hypodermically), 1866. Sulphur (Sulphurous acid), 1871. Trimethylamine, 1873 (2), 1874. Chlorhydrate of trimethylamine, 1873.

Ringworm. Sulphur (Sulphurous acid gas), 1866.

Rubeola. Inunction, 1850, 1853. Ammonia (carb. of), 1802. Digitalis, 1807.

Salivation, mercurial. Calcis sulphuretum, 1796. Art. "Hydrargyrum (Ptyalism)," p. 486. Potassæ chloras, 1856, 1860.

Sarcina ventriculi. Sodæ sulphas (sulphis ?), 1872.

Scabies. Special Therapeutics, 1816 (Folie). Carbo vegetab., 1804. Inula Helenium, 1787. Ledum palustre, 1775. Plumbago Europæa, 1781. Potassii sulphuretum, 1815. Sulphur, 1765, 1814 (sulphurous baths). Sulphuric acid, 1762. Tabacum, 1793. Terebinthina, 1699. Veronica officinalis, 1694.

Scarlatina. Special Therapeutics, 1827 (Seifert), 1837 (Ingalls), 1853 (Morris). Inunction, 1810, 1848, 1850, 1853. Disinfectants, 1875. Prophylactics, 1827. Permanganates (locally to sore throat), 1866. Purgatives, 1799, 1805. Acetic acid, 1846. Ammonia (carb. of), 1802, 1833, 1842, 1843, 1862 (2). Atropa Belladonna, 1824 (as a prophylactic), 1825 (ditto), 1826 (2), (ditto), 1827, 1828 (2), 1830, 1843. Carbolic acid, 1873. Digitalis, 1807. Quinine, 1857. Sulphur (and Sulphuric acid), 1787. Water, 1808, 1810, 1818, 1820, 1824.

Sciatica. Special Therapeutics, 1869 (Lagrette). Aconitum napellus, 1845. Argenti nitras (injection of), 1872. Arsenic, 1864. Artemisia (Moxa), 1825, 1827. Ergot, 1872. Morphia (hypodermically), 1872. Solanum Dulcamara, 1771. Ol. Terebinthina, 1823. Water, 1649.

Scirrhus. Atropa Belladonna, 1826. Cicuta virosa, 1874. Conium, 1760, 1761 (2), 1763. Ferri iodidum, 1834. See also *Cancer*.

Sclerotitis. Iodine, 1849.

Scrofula and Scrofulous Affections. Special Therapeutics, 1837 (Meissner), 1838 (Disse), 1843 (Bender), 1858 (Buzer), 1860 (Hübener), 1871 (Dauvergne), Iatroleptic method, 1856. Tonics, 1831. Agave et Begonia, sp. of, 1794. Ammoniac carb., 1812. Ammonii iodidum, 1875. Aurum (salt of), 1811, 1819, 1820, 1837, 1839, 1851, 1870. Barium (salts of), 1794, 1802, 1844, 1851. Calcis murias, 1808. Carbonic acid, 1798. Cimicifuga fetida, 1774. Cinchona, 1783, 1786. Conium 1761, 1771. Digitalis, 1786, 1790, 1792, 1801. Ferri iodidum, 1834. Hydrargyri iodidum, 1831. Iodine, 1824, 1824, 1825, 1829, 1831, 1832. Juglans regia, 1811, 1812, 1845, 1858. Lobelia syphilitica, 1791. Monesia, 1839. Oleum Morrhuæ, 1835, 1841, 1842, 1850. Mytilus edulis, 1857. Oxygen, 1800, 1863. Liquor Potassæ, 1811. Solanum Dulcamara, 1805. Sulphur, iodide of, 1855. Tabacum, 1648, 1669. Tussilago Farfara, 1807. Sea-water, 1769, 1813, 1865, 1866, 1875 (internally).—*Of the Eyes.* See *Ophthalmia, scrofulous.*—*Ulcers.* See *Ulcers, scrofulous.*

Scurey. Special Therapeutics, 1807 (Marquis), 1826 (Götte), 1866 (Krebel). Art. "Antiscorbutics," p. 132. Tonics, 1831. Aquilegia vulgaris, 1716. Carbonic acid, 1778. Cardamine pratensis, 1785. Citrus (lemon-juice), 1791, 1857. Cochlearia officinalis, 1674. Conium, 1791. Galium aparine, 1784. Hydrargyrum (inefficacy of), 1773. Lac. 1725 (ass's milk), 1726 (with mineral waters). Opium, 1797. Opuntia Indica, 1808. Phellandrium aquaticum, 1771. Quercus (oak-bark), 1792. Rumex aquaticus, 1765. Sodii chloridum, 1702. Tabacum 1672 (tobacco as a cause of), 1744 (tobacco-chewing recommended). Thea Chinensis, 1684. Vinum, 1835 (Moselle).

Sedentary life, diseases of. Fel (Ox-gall), 1816.

Serpents, venomous, bites of. Ammonia, 1719 (in "Addenda," p. 807), 1777. Ammonia (subcutaneous injection of), 1869, 1874. Oleum Olivæ, 1736, 1783. See also art. "Serpens," 1872.

Short-sightedness. Atropia, 1874.

Skin diseases. Special Therapeutics, 1834 (Fracon), 1863 (Courtyllier et Meynet), 1868 (Fracon), 1875 (Fox). Fumigation, 1818, 1838. Caustics, 1819, 1825. Alcohol (as predisposing to), 1874. Arsenic, 1850, 1857, 1866. Barium, 1794, 1851. Bismuth (ointment), 1792. Bitumen (Rock-oil of Barbadoes), 1830.

Caoutchouc (covering), 1875. Carbo vegetab., 1804. Carbolic acid, 1865, 1873. Eupatorium perfoliatum, 1813. Ferri perchloridum, 1860. Graphite, 1809. Gratiola officinalis, 1799. Guano, 1852. Hydrargyrum, 1852. Hydrarg-corrosivum sublimatum, 1766, 1772. Hydrocotyle Asiatica, 1859. Iodine, 1831, 1857. Manganese, 1800. Oxygen, 1798. Pix, 1832. Sulphur (fumigations), 1816, 1818, 1820, 1821, 1830. Sulphuric acid, 1672. Tabacum, 1618. Ulmus campestris, 1772. Zinci sulphas, 1841. Sea-water, 1856. Bath mineral waters, 1800, 1822. Harrogate waters, 1855.

Spasms and Spasmodic affections. Special Therapeutics, 1822 (Clarus), 1828, (Grützner). Art. "Antispasmodies," p. 136. Artemisia (Moxa), 1827. Cocos maldivica, 1634. Dictamnus albus, 1777. Hydrocyanic acid, 1825. Hyoseyamine, 1873, Indigo, 1834. Lac (milk), 1726. Opium (opiate frictions), 1809. Sumbul, 1850. Ol. Terebinthine, 1814. Viscum album, 1783. Zinci sulphas, 1772.

Spine, curvatures of. Special Therapeutics, 1857 (Ulrich), 1874 (Ulrich). Iodine, 1825.—*Irritation of.* Aconitum napellus, 1815. Hydrocyanic acid, 1825.—*Hyperæsthetic condition of.* Physostigma venenosum, 1863.

Spleen, diseases of. Special Therapeutics, 1847 (Heinrich). Ferrum, 1649, 1675. Hirudo (leeches), 1699. Quinine, 1831.

Spontaneous Combustion. Special Therapeutics, 1839 (Pfister).

Stammering. Special Therapeutics, 1836 (Colombat), 1871 (Coën).

Staphyloma. Argenti nitras (locally), 1823.

Sterility. Special Therapeutics, 1844 (Smyth). Coffee (as a cause of), 1695. Sea-water (baths, douches, &c.), 1856.

Stomach, affections of. Special Therapeutics, 1832 (Bloesch), 1873 (Leube). Astringents, 1635. Emetics (improper use of, in), 1806. Tonics, 1843. Ailantus excelsa, 1870. Antimonium tartaratum, 1822. Argenti oxidum, 1852. Carbo vegetab., 1855, 1865. Carbonic acid, 1779. Centaurea centaurium, 1765. Chiretta, 1830. Gastric juice (as a medicine), 1792. Hydrocyanic acid, 1820. Ipecacuanha, 1806. Monesia, 1839. Tabacum (tobacco as a cause of), 1761. Sea-water (internally), 1875. Harrogate mineral waters, 1855. See also *Digestive Organs, affections of.*—*Ulcer of.*—Special Therapeutics, 1858 (Schmidt).

Stomatitis, Aphthous or Ulcerous. Potassæ chloras, 1855, 1857, 1860.—*Mercurial.* See *Salivation.*

Strabismus. Special Therapeutics, 1863 (Giraud-Teulon). Hyoseyamus, 1859.

Stricture of Urethra. See *Urethra.*

Strychnia, poisoning by. Chloral, 1874 (in Addenda, p. 808). Nicotine, 1856. Physostigma venenosum, 1867, 1875. Potas-ii bromidum, 1868. Art. "Strychnia," 1835, 1856, 1857 (2), 1858, 1860, 1865, 1866, 1870, 1872, 1875, &c. Tannic acid, 1856.

Sulphuric Acid, poisoning by. Sulphuric acid, 1826, 1838, 1842, 1846.

Syphilis and Syphilitic Affections. Special Therapeutics, 1622 (Macollone), 1788 (Spichmann), 1809 (Louvrier), 1818 (Lafontaine), 1823 (Pleindoux), 1826 (Vering), 1834 (Bonorden), 1836 (Lucas-Championnière), 1838 (Ricord), 1848 (Schlesinger), 1851 (Zeissl), 1852 (Lippert), 1861 (Diday), 1861-2 (Rollet), 1863 (Reder), 1867 (Geigel), 1868 (Marques), 1869 (Müller). Fumigation, 1743, 1776. Hypodermic method, 1868, 1873, 1875. Acids, 1798, 1837. Alteratives, 1743. Antiphlogistics, 1827, 1828, 1830, 1831 (2), 1836, 1838. Art. "Antisyphilitics," p. 136. Aconitum napellus, 1762. Agave et Begonia, sp. of, 1794. Alcohol (as predisposing to), 1870. Ammonia, 1774, 1781. Ammonii iodidum, 1874, 1875. Antimonium tartaratum, 1842. Argenti nitras, 1836, 1839. Astragalus exscapus, 1790. Aurum (salts of), 1811, 1812, 1817, 1819, 1821, 1827, 1828, 1829, 1834, 1835, 1870. Carex arenaria, 1772, 1784. Cuscuta Europæa, 1718. Gratiola officinalis, 1775. Guaiacum, 1518, 1519, 1525, 1529, 1536, 1537, 1541, 1542, 1566, 1593, 1594, 1642, 1659, &c. Hydrargyrum, 1527, 1566, 1596, 1606, 1642, 1649, 1673, 1684, 1698 (2), 1717, 1727, 1732, 1747, 1752, 1755, 1756, 1758, 1762, 1764, 1765, 1766, 1768, 1769, 1770, 1772, 1773, 1774, 1776 (2), 1777 (fumigation), 1778, 1780 (iatraleptically), 1781, 1782, 1787, 1788, 1789, 1790 (2)

1792, 1798, 1801, 1809, 1812, 1814 (2), 1815 (2), 1818 (2), 1819, 1820 (2), 1821, 1823, 1824 (Ether mercuriel), 1824, 1825, 1827, 1828 (2), 1833, 1837, 1840, 1845 (mercurial vapour-bath), 1847, 1851, 1852 (fumigation), 1852 (mercurial frictions), 1855 (inunction), 1857, 1858 (4), 1860 (2), 1863, 1865, 1866 (2), 1868, 1869, 1872, 1874 (3), 1875 (fumigation). Ptyalism, 1668, 1710, 1723, 1750, 1765, 1780, 1793, 1817. Calomel, 1824, 1846, 1872 (hypodermically), 1873 (ditto), 1874 (ditto), 1875 (fumigation). Cinnabar (fumigation), 1780. Hydrarg. corrosivum sublimatum, 1762, 1763, 1764, 1767, 1771, 1774, 1775, 1780 (2), 1801, 1826 (inunction), 1869 (hypodermically), 1871 (ditto), 1872 (ditto), 1873 (2), (ditto), 1874 (2), (ditto). Hydrarg. oxidum nigrum, 1801. Hydrarg. oxidum rubrum, 1808, 1818, 1830, 1831. Iodine, 1840, 1843, 1845 (2) (Iod. of potassium), 1845 (other preparations), 1848 (Iod. of potassium), 1859 (ditto), 1860 (ditto), 1865 (ditto). Iodoform, 1871. Juglans regia, 1795. Lobelia syphilitica, 1782, 1791. Mikania Guaco, 1861, 1863. Nitrous acid, 1796, 1798 (2), 1800, 1802 (2). Opium, 1781, 1785, 1788, 1792, 1835. Oxygen, 1798, 1802. Potassæ bichromas, 1866. Potassæ chloras, 1798. Saponaria officinalis, 1756. Smilax aspera, 1652, 1689, 1813. Smilax China, 1542, 1548, 1553, 1642. Smilax officinalis (Sarsaparilla), 1563, 1593, 1594, 1642, 1782, 1803, 1823, 1826. 1841. Solanum Dulcamara, 1771. Sulphur, 1867. Water, 1853.—*Neonatorum*. Special Therapeutics, 1854 (Putegnat). Hydrargyrum (lavemens mercuriels), 1822.

Syphilitic Diseases of the Skin. Caustics, 1875. Aurum, 1828. Hydrargyrum, 1815. Mercurial baths, 1852 (ditto). Hydrargyri corrosivum sublimatum, 1764, 1766. Zinci chloridum, 1875.—*Of the bones*. Clematis erecta, 1777.—*Nodes*. Veratria, 1834.

Tabes mesenterica. Purgatives, 1805. Ferri iodidum, 1834. See also *Glands, affections of*.

Teeth, affections of. Aectum (vapour), 1772. Hydrargyrum (ill effects of), 1845. Saccharum (sugar as a cause of), 1862. Water, 1840.

Tetanus. Anesthetics, 1848, 1855. Purgatives, 1805. Ammonia, 1866. Atropa Belladonna, 1848. Cannabis sativa, 1839. Chloral, 1870, 1871 (2), 1874 (2) (see also Addenda, p. 808). Chloroform, 1855. Datura Stramonium, 1777. Eserine, 1875 (2). Hydrocyanic acid, 1825. Hyoscyamine, 1873. Nicotine, 1856. Opium, 1794, 1810, 1831, 1874. Physostigma venenosum, 1863, 1867, 1868, 1871. Potassii bromidum, 1872. Rhus radicans, &c., 1799. Tabacum, 1610. Water (hot baths), 1874.

Throat, affections of. Inhalation, 1830, 1837, 1839, 1853, 1855, 1862, 1869, 1871, 1873, &c. Topical applications, 1851, 1854, 1860, 1863, 1866, 1872. Quinine (as a gargle), 1875.

Tic Douloureux; also *Facial neuralgia*. Special Therapeutics, 1873 (Corbetta). Purgatives, 1841. Aconitine, 1835. Aconitum napellus, 1845, 1855. Atropa Belladonna, 1818. Bebeerine, 1845. Ferri carbonas, 1820. Strychnia, 1835.

Tinea capitis. Carbo vegetabilis, 1804. Conium, 1761 (2). Guano, 1852. Ledum palustre, 1775. Terebinthina, 1699.

Tongue and Tonsils, affections of. Iodine, 1839.

Toothache. Special Therapeutics, 1873 (Corbetta). Aconitum napellus, 1845. Tabacum, 1642.

Trachea, affections of. Inhalation, 1830.

Tracheitis infantum. See *Croup*.

Trembling, mercurial. Hydrargyrum, 1818, 1857, 1872. Hyoscyamine, 1873. Iodine (Iod. of potassium), 1867.

Trichina. Special Therapeutics, 1864 (Besnard).

Tuberculous Disease. Alcohol, 1859. See *Scrofula*.

Tumours. Hypodermic method, 1875. Caustics, 1872. Evacuants, 1783. Antimonium tartaratum (externally), 1822. Artemisia (Moxa), 1825. Sulphuric acid (Pâte sulfo-safranée), 1872. Tabacum, 1648.—*Scrofulous*. Iodine, 1831,

1839. Tabacum, 1648.—*Erectile and Varicose*. Caustics, 1858. Ferri perchloridum, 1868, 1872, 1875.

Ulcers. Fumigation, 1838, 1847. Chlorides, 1827. Evacuants, 1783. Argenti nitras, 1823, 1850, 1866. Arsenic, 1819. Balsamum Pernvianum, 1703. Barium, 1794. Bismuth (ointment), 1792. Sulphuret of Carbon, 1875 (2). Carbonic acid, 1864. Chlorine, 1861. Clematis erecta, 1769, 1777. Collodium, 1854. Conium, 1761, 1767, 1776. Daucus carota (poultice), 1806. Gastric juice (locally), 1785. Hydrargyri pernitras (caustic), 1826. Iodine, 1839. Iodoform, 1868, 1869, 1871. Momordica balsamina, 1720. Monesia, 1839. Opuntia Indica, 1808. Phellaudrium aquaticum, 1739, 1771, 1828. Plumbum (P. acetas), 1818. Potassa nitras, 1694. Soda biboras, 1781. Tabacum, 1648.—*Scrofulous*. Cantharides, 1789. Conium, 1771. Hydrocotyle Asiatica, 1855. Iodine, 1831, 1839. Juglans regia, 1841. Nitric acid, 1847.—*Phagedenic and Fetid*. The Chlorides, 1827. Carbonic acid, 1779. Chlorine, 1861. Iodine, 1839. Juniperus communis, 1736.—*Syphilitic*. The Chlorides, 1827. Calotropis gigantea, 1833. Hydrocotyle Asiatica, 1855. Opium, 1815, 1856.—*Varicose*. Chlorine, 1872. Ferri perchloridum, 1856, 1858 (2), 1862. Mikania Guaco, 1863.—*Of Mucous Surfaces*. Glycerine, 1873. Mikania Guaco, 1863.

Urethra, Stricture of. Special Therapeutics, 1842 (Boys de Lowry). Caustics, 1811, 1823 (2), 1837, 1842. Argenti nitras, 1807, 1809, 1835, 1838, 1840. Atropa Belladonna, 1826. Chloroform, 1848. Laminaria digitata, 1870. Potassa fusa, 1841.—*Discharges from*. Caustics, 1842.

Uric Acid Diathesis. Special Therapeutics, 1875 (Vial). Alkalies, 1874.

Urinary Organs, affections of. Special Therapeutics, 1872 (Mallez et Delpsch). Ammonii chloridum, 1851. Argenti nitras, 1836. Cantharides, 1698. Lycopodium clavatum, 1702. Uva ursi, 1764.

Urinary Deposits. Special Therapeutics, 1814 (Golding Bird).

Urine, Retention of. Cantharides, 1810. Vinum (red wine), 1681.—*From Paralysis of the Bladder*. Ergot, 1860.

Uterus, affections of. Special Therapeutics, 1863 (Tilt). Injections (vaginal and intra-uterine), 1840, 1868. Argenti nitras, 1862. Carbonic acid, 1858, 1864. Conia, 1852. Ergot, 1843. Hirudo (leeches locally), 1826. Opium, 1838. Oxygen, 1845. Water, 1861. Sea-water, 1856.—*Chronic Inflammation of*. Special Therapeutics, 1868 (Colmstein). Bismuth, 1866. Hirudo (leeches locally), 1826. Hydrochloric acid, 1866. Thea Chinensis (injections of green tea), 1870.—*Hæmorrhage from*. Special Therapeutics, 1671 (Friderici). Alcohol, 1869. Ergot, 1831. Juniperus Sabina, 1816. Phosphoric acid, 1807. Pyrothonide, 1827. Quinine, 1872. Water, 1785.—*Puerperal Hæmorrhage*. Iodine (injections), 1870, 1875.—*Catarrh of*. Injections (intra-uterine), 1868.—*Cancer of*. Conium, 1763.—*Rigidity of Os Uteri*. Injections (uterine douche), 1860.—*Hour-glass Contractions of*. Ergot (as producing), 1842.—*Discharges from*. Ergot, 1831. Juniperus communis, 1736. Phosphoric acid, 1807.

Varices or Varicose Veins. Ergot (injections), 1875. Ferri perchloridum, 1854, 1856, 1858, 1862, 1868. Iodo-tannin, 1867, 1875.

Variola. Special Therapeutics, 1871 (Desnos), 1873 (Zuelzer). Narcotics, 1740. Prophylactics, 1873. Purgatives, 1719. Topical applications, 1770. Alcohol, 1870. Argenti nitras (externally), 1850. Camphor (locally, to prevent pitting), 1856. Carbolic acid, 1873. Cinchona, 1765, 1766, 1769, 1780. Crocus sativus, 1875. Ferri perchloridum, 1873, 1874. Hydrargyrum, 1778, 1783, 1788, 1793. Manna, 1725 (2). Opium, 1783, 1794. Phosphorus, 1751. Quinine, 1874. Sulphur (Sulphurous acid), 1873. Water, 1740 (cold baths), 1767.

Vomiting. Special Therapeutics, 1828 (Grattenaner). Caffeine (valerianate of), 1874. Creasote, 1835. Mentha, 1767.

White Swelling. See *Hydrarthrosis*.

Whitlow. See *Paronychia*.

Women, diseases of. Special Therapeutics, 1838 (L'Heritier), 1864 (Dillnberger), 1875 (Beigel). Argenti oxidum, 1845. Sea-water (baths), 1852. Bath mineral waters, 1728.

Worms. Special Therapeutics, 1830 (Pergaud). Acids, 1779. Art. "Anthelmintics," p. 127. Emetics, 1765. Art. "Andira," p. 229. Art. "Artemisia Contra," p. 268. Camphor, 1759. Crotonis oleum, 1828. Dietamnus albus, 1777. Fel (Taurinum), 1794. Gambogia, 1777. Hydrargyrum, 1753. Hypericum perforatum, 1776. Juglans regia, 1751. Mucuna pruriens, 1784. Plocaria helminthocorton, 1778, 1780, 1792. Quassia, 1779. Ricinus (castor oil), 1780. Salix, sp. of, 1781. Sodii chloridum, 1702. Spigelia anthelmia, 1758. Stannum, 1789.—*Tenia.* Special Therapeutics, 1844 (Randel), 1852 (Seeger). Anthelmintics, 1795, 1826, 1830, 1833, 1851, 1859, 1872. Andira Surinamensis, 1792. Brayera anthelmintica (Cusso), 1822, 1847, 1851, 1857. Cucurbita pepo, 1867, 1875. Filix mas, 1775 (2), 1777, 1826 (2), 1833, 1864, 1874, &c. Gambogia, 1777. Kamala, 1875. Punica granatum, 1822, 1828, 1831, 1832, 1834. Stannum, 1789.—*Lumbrici.* Anthelmintics, 1715.—*Ascarides.* Anthelmintics, 1843. Artemisia contra, 1843.—*In Children.* Carbo vegetalis, 1855.

Wounds. Antiseptics, 1869, 1870, 1871, 1873, 1874, 1875. Evacuants, 1782, 1783. Oils (oil and wine locally), 1603. Refrigerants, 1857. Alcohol, 1745, 1859, 1864 (2), 1865 (2), 1867, 1868, 1870. Alum, 1847. Argenti nitras, 1826, 1850, 1866. Carbolic acid (Phénol sodique), 1865, 1873. Sulphuret of Carbon, 1875. Carbonic acid, 1860, 1864. Coal tar, 1871, 1873. Collodion, 1854. Ergot, 1855, 1871. Ferri perchloridum, 1860, 1872. Glycerine, 1873. Iodine, 1839. Iodoform, 1868. Lycopodium clavatum, 1702. Opium (locally), 1846. Phellandrium aquaticum, 1739, 1771. Pix liquida, 1871. Plumbum (P. acetis), 1818. Tabacum, 1648. Water, 1542, 1570, 1649, 1797, 1809, 1810, 1836, 1867 (irrigations).—*Gunshot.* Emetics, 1814. Alcohol, 1867. Ammoniac acetis, 1850. Carbolic acid, 1873. Ferri perchloridum, 1860, 1866.—*Poisoned, Dissecting, Bites of rabid animals, &c.* Argenti nitras (locally), 1850. Cantharides, 1762. Oleum Olivæ, 1736 (2), 1751. Tabacum, 1648.—*Suppurating.* Cinchona, 1752, 1757.—*Gangrenous.* Mikania Guaco, 1863.—*Of the Intestines.* Enemas, 1873.

INDEX OF SUBJECTS.

| | | | |
|-------------------------------------|----------|---|----------|
| Absinthe | 267 | Agaricus piperatus | 207 |
| Absorbents | 127 | Agave, sp. of | 208 |
| Acacia officinalis | 199 | Agrimonia eupatorium | 208 |
| Acetum | 199 | Ailantus excelsa | 208 |
| Achillea Clavenæ | 201 | — glandulosa | 208 |
| — millefolium | 201 | Air, fixed, mephitic, &c. see <i>Car-</i> | |
| Acids | 101, 808 | <i>bonic acid.</i> | |
| Acid, acetic | 199 | — dephlogisticated, see <i>Oxygen.</i> | |
| — benzoic | 287 | Akazaga poison | 208 |
| — carbolic | 312 | Alcaloids | 103, 808 |
| — carbonic | 314 | Alcohol | 208, 809 |
| — chloracetic | 325 | Aleurites triloba | 219 |
| — chromic | 335 | Alisma plantago | 219 |
| — citric | 362 | Alkalies | 104 |
| — formic | 444 | Aloes | 219 |
| — gallic | 445 | Alteratives | 106 |
| — hydrochloric | 505 | Alumen | 220 |
| — hydrocyanic | 506 | Alyxia aromatica | 221 |
| — lactic | 545 | Amanita muscaria | 221 |
| — muriatic | 505 | Amber | 700 |
| — nitric | 576 | American hellebore | 738 |
| — nitrous | 576 | — ipeacacuanha | 449 |
| — nitro-hydrochloric | 579 | Ammonia | 222, 809 |
| — osmic | 600 | Ammoniacum (gum) | 227 |
| — oxalic | 600 | Ammonia acetas | 225 |
| — phosphoric | 610 | — carbonas | 222 |
| — picric | 620 | — hydrochloras | 225 |
| — prussic | 506 | — valerianas | 225 |
| — salicylic | 670 | Ammonii bromidum | 225 |
| — sulphuric | 705 | — chloridum | 225 |
| — sulphurous | 701 | — iodidum | 227 |
| — tannic | 720 | Amygdalus communis | 227 |
| — tartaric | 721 | Amyl, nitrite of | 228 |
| — thymic | 731 | Amylene | 229 |
| Aconitine | 202 | Anæsthetics | 107 |
| Aconitum Napellus | 202 | — local | 124 |
| Acoroides resinifera | 205 | Anacardium occidentale | 229 |
| Addenda | 755 | Anagallis arvensis | 229 |
| Adiantum capillus veneris | 205 | Analeptics | 126 |
| Ægle marmelos | 206, 809 | Andira inermis | 229, 809 |
| Æsculus hippocastanum | 206 | — Surinamensis | 229 |
| Æther, see <i>Æther.</i> | 423 | Anemone pratensis | 230 |
| Æthiops mineral | 504 | Anctium graveoleus | 230 |
| Æthusa cynapium | 207 | Angelica Archangelica | 230 |
| Agaric of the larch | 207 | Angusturæ cortex | 231 |
| — of the oak | 207 | Aniline | 232 |
| Agaricus deliciosus | 207 | Anisced | 232 |

| Asclepias vincetoxicum | 396 | Boletus suaveolens | 290 |
| Asli, the common | 444 | Boracic acid | 686 |
| Asparagus officinalis | 271 | Borassus flabelliformis | 290 |
| Assafœtida | 271 | Borax | 686 |
| Astragalus exscapus | 271 | Botany Bay resin | 205 |
| Astringents | 138 | Box, the common | 292 |
| Athamanta oreoselinum | 272 | Brayera anthelmintica | 291 |
| | | Bromides, the | 140 |

| | | | |
|-------------------------------------|----------|---------------------------------------|----------|
| Bromine and its compounds | 291 | Carum carvi | 319 |
| Broom | 691 | Caryophyllus aromaticus | 319 |
| Brucea | 292 | Cascarillæ cortex | 320 |
| Bryonia alba | 292 | Cashew-nut tree | 229 |
| Buchu leaves | 408 | Cassava, bitter | 555 |
| Buck-bean | 561 | Cassia cortex | 362 |
| Buckthorn | 658 | Castoreum | 320 |
| Burdock | 248 | Castor oil and seeds | 662 |
| Burnet saxifrage | 621 | Cat thyme | 725 |
| Butchers broom | 666 | Cat's tail | 733 |
| Butter bur | 608 | Catechu | 321 |
| Buxus sempervirens | 292 | Cathartics | 174 |
| Cabbage bark tree | 229 | Caustics | 140 |
| Cacao | 730 | Cedrela febrifuga | 321 |
| Cadmium and its salts | 292 | Cedron | 680 |
| Cæsalpinia Brasiliensis | 292 | Celandine, great | 324 |
| Caffeine | 293 | Centauria benedicta | 321 |
| — arseniate of | 293 | — centaurium | 322 |
| — valerianate of | 293 | — cyanus | 322 |
| Caïcedra | 534 | Centaury, great | 322 |
| Caincæ vel calincæ radix | 293 | — lesser | 421 |
| Cajuputi oleum | 294 | Cerasse | 563 |
| Calabar bean | 617 | Cerasus lauro-cerasus | 644 |
| Calaguala | 294 | Cerium | 322 |
| Calamus aromaticus | 295 | Cervus elephas | 322 |
| Calcii iodidum | 296 | Cetaceum | 323 |
| Calcis carbonas | 296 | Cetraria islandica | 323 |
| — chloridum | 297 | Ceylon moss | 625 |
| — murias | 297 | Chærophyllum bulbosum | 324 |
| — oxalas | 297 | Chalk | 296 |
| — phosphas | 298 | Chamomile flowers | 232 |
| — sulphuretum | 299 | Charcoal, vegetable or wood | 310 |
| Calcium | 295 | Chelidonium majus | 324 |
| — iodide of | 296 | Chenopodium ambrosiodes | 324 |
| Calomelas (calomel) | 493, 811 | — anthelminticum | 324 |
| Calotropis gigantea, &c. | 299 | — bonus henricus | 325 |
| Calumba vel calumbæ radix | 299 | Cherry-laurel | 644 |
| Calx | 295 | Chicory | 336 |
| Camphor | 300 | China root | 682 |
| — bromide of | 304 | Chinidin | 657 |
| Cannabis sativa | 304, 810 | Chiretta | 325 |
| Cantharides | 305 | Chironia centaurium | 421 |
| Caoutchouc | 309 | Chloracetic acid | 325 |
| Caraway, the | 319 | Chloral, and its hydrate | 325, 810 |
| Carbo vegetabilis | 310 | — croton | 328 |
| Carbolic acid | 312, 810 | — urea | 328 |
| Carbon, sesquichloride of | 314 | Chlorides, the | 142 |
| — sulphuret of | 314 | Chlorine | 328 |
| Carbonic acid | 314 | Chloroform | 330, 810 |
| Cardamomum | 318 | Chocolate | 730 |
| Cardamine pratensis | 318 | Cholagogues | 143 |
| Cardiacs | 140 | Chondrus crispus | 335 |
| Carduus marianus | 318 | Chrome | 335 |
| Carex arenaria | 319 | Chromic acid | 335 |
| Caribæi cortex | 319 | Chrysoplemium alternifolium | 336 |
| Carminatives | 140 | Cichorium intybus | 336 |
| Carpobalsamum | 283 | Cienta virosa | 336 |
| Carrageen moss | 335 | Cimicifuga fetida | 336 |
| Carrot, the | 309 | Cinchona | 337, 810 |
| | | — substitutes for | 358, 810 |

| | | | |
|-------------------------------|-----|-------------------------|----------|
